

Recreating #DIY future <http://payhip.com/astrology> #RTRRT <http://gumroad.com/astrology>
<http://lulu.com/spotlight/astrology> #AcademicZodiac #CoronaCure #1008planets #CancerCure

Future-changing made easy, along with brief instruction how to predict any future in minutes.

RTRRT

A Mini-RTRRT Initiation PDF publication as included in every recent publication: will do the job for you. RTRRT stands for (in) “Real Time” Reality-Rendering (meaning Future-changing) Tools (meaning “magical” intent-enhancing techniques): a comprehensive set of essential DIY self-Initiations as also steadily perused by Eastern sages across thousands of years. The RTRRT require no other “tools” other than intent that is imagination: no pentagrams, candles or invocations at all. The core technique being O5: discreates negativity before any affirmation that is creation: no good to merely affirm if negativity is still there, right?

ACADEMIC ZODIAC

But why recreate an already perfect futurity? Predicting is as easy as future-changing: learned in minutes as performed in minutes. Minutes? Even less than five (5) minutes! One can thus obtain what one wants in the real world in five (5) minutes: suffice intent or as Jesus said: faith.

INITIATION

All material is self-initiating (DIY), but basic training may be obtainable e.g. for investors, traders or even sincere seekers (who are poised for best results against a time unit). “Spiritual” people tend to be more “clean” than this with problems with needles and camels, which makes for quick “instant” results. Results depend on sheer intent even more than said “cleanliness”.

USA ascendant Serpens <http://payhip.com/astrology> Cauda 911 Orion Moon
<http://www.lulu.com/storefront/astrology> NYC <http://gumroad.com/tarant81>

The statue of liberty may not be Osiris exactly but surely *was* targeted in its own torch as ominous Osama Moon entered Orion on 9/11.

In respect to biblical Stargate (see on Auriga and Orion), said torch represents it: crossroad betwixt worlds, not unlike the

Stargate of Hell vis-a-vis under USA ascendant in Serpens Cauda (zodiacal Scutum, Ophiuchus).

The definitively oblique biblical instructions (or rather allusions; mainly unto uncaring Levites who overheard nothing of that) were about primary *and secondary* directions; southern constellations (down-under, southern comets and alike), Auriga, Stargate and Orion.

Much as 911, Osama has natal Moon in Orion conjunct χ_1 Orionis sharp: the second factor was Eris in the zodiacal constellation of Cetus

setting sharp at 0.0000 altitude western. The event was documented through terabytes of original material, for the benefit of further generations. An eventual candidate for first continental Astrologer being nowhere at sight, said material remains USA's only hope.

Orion is standard zodiacal station for all planets and also ascendant; thus one of the 22 zodiacal stations and 16 ascendant:

similarly Cetus and Ophiuchus: both ascendants as well as standard zodiacal stations: we live in the Aeon of Cetus and Age of Pegasus

(Venus in Pegasus). 1992 QB₁, Nemesis and jihadi Varuna; along with a bunch of centaurs, dark planet and dwarf planets are among secondary factors. Are? Can happen again: that is why said case must be presented as-it-was, not as "astrologers" would have it: unremarkable according to their faux skies.

Delusional people do believe in 12 or 13 "zodiacal signs" that don't rise at east at all, but they make them: causing over 90 degrees of error in your horoscope.

Sun in Orion 2020 <https://payhip.com/b/Vkq6> #2020shift <https://payhip.com/b/Y3eD> New 911
#Moon in #Orion #NYC

<https://www.lulu.com/en/us/shop/klaudio-zic/sun-in-orion-2020/ebook/product-rr76k8.html>

Sun in Orion happens (as) every year, but this special year we have New Moon at the 911 NYC
Stargate!

Namely Sun's lower limb touches upon IAU border. Every planet enters Orion. 911 had Osama-
natal Moon in Orion; thus caveats (for NYC): this year New Moon in Orion.

One, especially as New Yorker; can also have “Dalai Lama” Orion ascendant!

The New Moon (thus Sun) can also happen/be in Cetus, Sextans and Ophiuchus.

This is called Academic Zodiac, that is true astronomical positions of planets and ascendant
sets. Sets? Yes, due to precession; the position of the eastern horizon point changes greatly; e.g.
Gemini never rose at east (as ascendant) since Krishna!

In the Year of the Brat, having New Moon (with Sun in Orion) in 911 positions bodes great
news for New York as people are screeching out under prolonged Chinese globaleft
experiment.

Meanwhile a comet returns after 6025 years from Mesopotamia pestilence times. Comets are known to hoard many interesting things in their lap.

As pestilence $Yersinia$ thrives through cometarian rodents (*Yersinia pestis*): especially through big abandoned cities: non-bathing is being enforced although: as every summer; the Sun and thus UV clearly kill viruses. But not this one: it apparently survives deep state dive as well.

Chandra (meaning Moon) Wickramasinghe, known for his work in astronomy as astrobiology, spread the idea that the virus was living on a comet and a piece of that space rock has fallen to Earth during a brief fireball event over China in October 2019. He further stated that comets carrying viruses have caused outbreaks in the past as well.

Wickramasinghe's claim ties into the longstanding theory of panspermia, which poses that life on Earth originated with help from microorganisms and biological material from outer space.

At any rate, the old Chinese would panic on sight of a southern comet: knowing it brings ruin, wars and the fall of the state.

Scientists have found organic molecules such as “GATTACA” amino acids inside meteorites.

In October last year a fragment of a comet exploded in a brief flash in North East China.

We think it probable that this contained embedded within it a monoculture of infective 2019-nCoV virus particles that survived in the interior of the incandescent meteor.

We consider the seemingly outrageous possibility that hundreds of trillions of infective viral particles were then released embedded in the form of fine carbonaceous dust.

We believe infectious agents are prevalent in space, carried on comets, and can fall towards Earth through the troposphere.

Ebola crisis in West Africa, like other modern disease outbreaks, is turning eyes back to the history of epidemics. The term “quarantine,” the isolation of people with potential exposure to a disease, dates back to Medieval Italy, referring to “quaranta” or “forty”—the number of days that incoming ships had to remain in port before crew could come ashore during the Black Death pandemic.

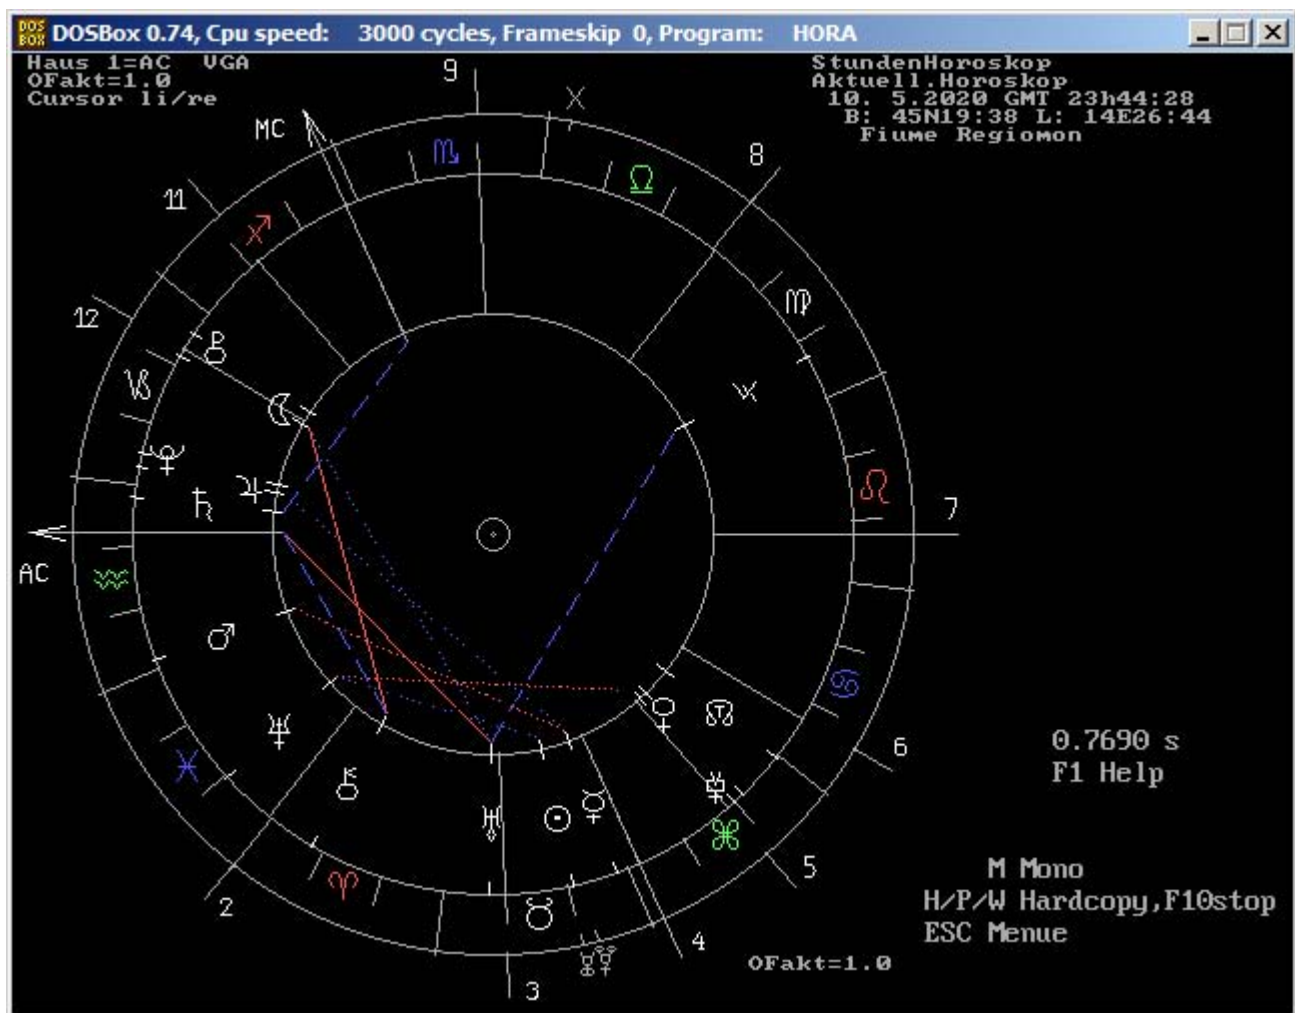

One of the most devastating pandemics in history, the Black Death wiped out a third of Europe’s population in the mid-1300’s. While it is attributed to *Yersinia pestis*, the bacterium responsible for bubonic, septicemic and pneumonic plagues, the attribution relies on medical anthropology and paleomicrobiology, rather than the sophisticated and definitive methods of modern medicine.

Black Death was rather an Ebola-like hemorrhagic virus. For instance, written records of the Black Death indicate swift person-to-person transmission, whereas *Yersinia pestis* infection depends on a cycle of rodent, flea and human hosts. Furthermore, several Black Death outbreaks occurred in the winter, when rodents and fleas are less prevalent. Indeed, it is difficult to imagine any disease traveling 10 miles a day, particularly in the 14th century.

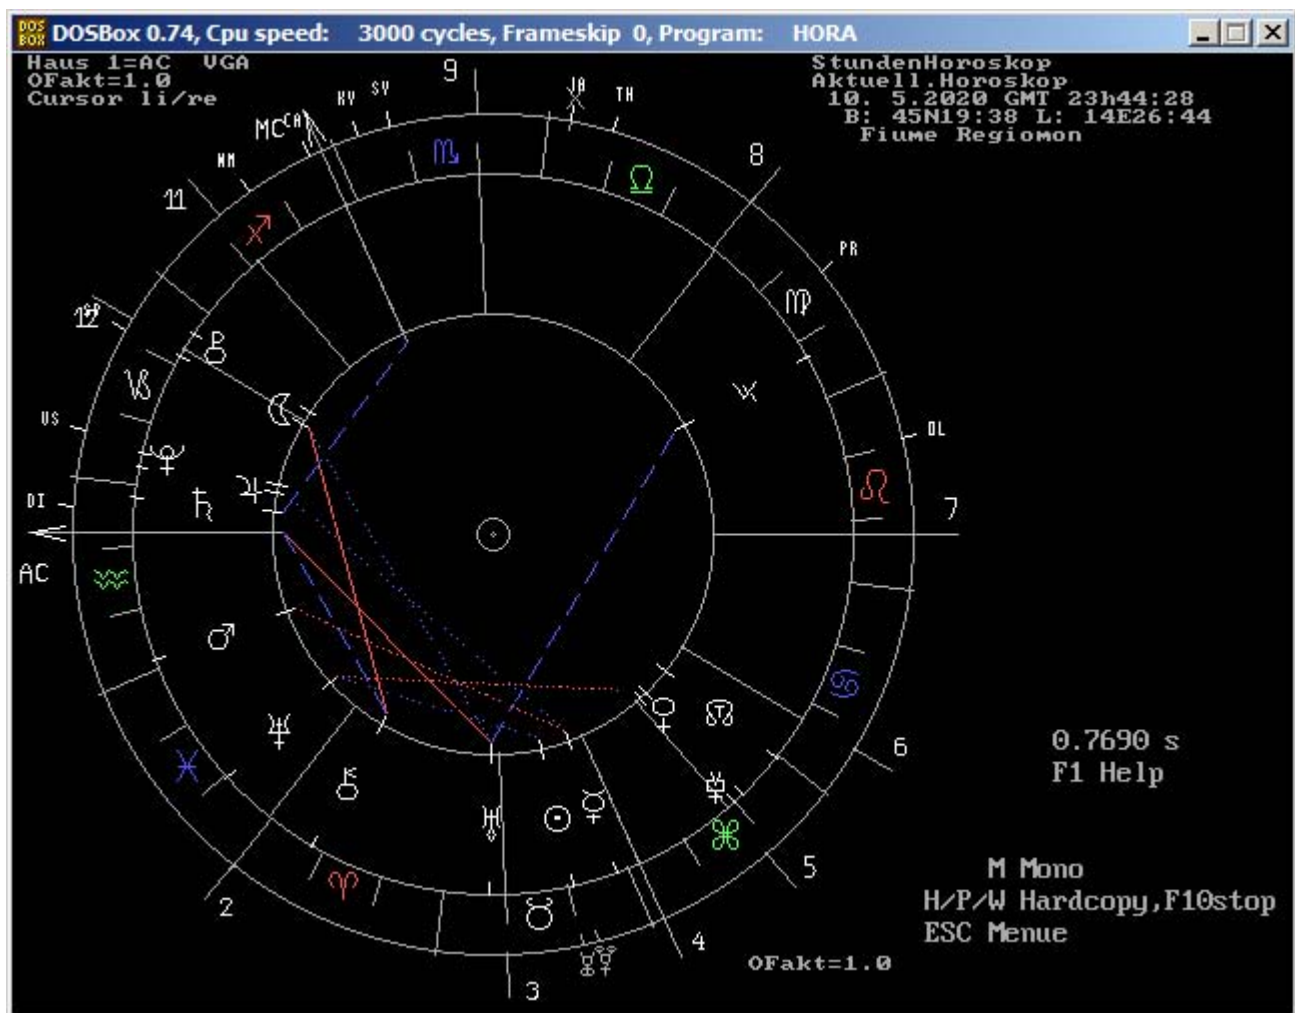

Shamdemic Plandemia apart: not even the best scientists are quite sure about outbreaks and viral circulation, since they keep finding counter-proofs against sound evidence.

Moon with Pholus far away.

17 Dark Planets: HPMHC and Devil's Rose.

Huawei profited from bullish 2014 Venus in Scutum.

Out of touch with reality ~ an essay on real skies ~ Astrology=Astronomy

1. Year 2025 marks the re-entrance of Venus into Pegasus. What does it mean?
2. Is Astrology valid in a predictive science? It is, alright; but only as astronomy proper.
3. Example: Gemini was last seen as eastern ascendant by Krishna: it never rose as ascendant since. Modern “programs” fail 90 degrees: no such thing as Gemini ascendant. You can go on and believe what you want: your alleged program is wrong: when it miscalculates Gemini at east, it is visible at north: but in order to believe, you will simply turn your head while pretending it is either impossible or preposterous, since true to the point. This effect that ruins many lives is called default mind or “tradition” - gross errors must become even larger in order for humanity to parrot upon itself on and on forever – no matter, etc...
4. Neither India nor “the West” produces adequate astrological chart output.
5. India never took notice of the precession of the ascendant sets, whilst said West is completely lost to anything even vaguely resembling Astrology proper: westerners noticed absolutely nothing, and don’t want to: superstition being lucrative sheeple food.

6. Western horoscopes being largely off-mark, we must assume that there was or even is at least some intelligent life even on this God-forsaken planet? In fact there is, but not where or how you'd expect at all. The most pragmatically precise predictions were made by the Chinese: e.g. "The King hunts at 6 AM, returns at 16:22 bagging a tigress, three deer and 15 fowl."
7. That said, we turn to the Egyptians whose galactic interests we can only try and fathom.
8. We are a primitive race. The allegedly Zen-like invention of the iPhone actually contributed to uniform stupidity as people spat on Steve's grave or even cursed him from said iPhone itself.
9. The Egyptians, on the other hand, had variegated versatility along with cosmic opportunity: what was fairly common to Prahlada Maharaj was cosmic catwalk as usual to them Egyptians.
10. The Mayan civilization must have been aware of e.g. Venus in Hydra: thus said priests were quite able or at least invited into prediction on global scale. Year 2025 marks the re-entrance of Venus into Pegasus. What does it mean?
11. Why so-called astrology is out of touch with reality?
12. The dumb-ass skies are frozen: they don't understand precession at all.
13. Their ephemerides and "programs" fake an non-extant sky. This alleged sky exists in their heads only.
14. Apparently it does not matter for a human being whether one is lost – out of mark – deceived as far as everybody else is in the selfsame swamp. They like to wade together through quite unnecessary seas of excrement. They rattle parrot gossip etc, immediately picking up fake news.
15. Facts don't apply to humankind. E.g. with polar bear population growing, they lucratively passed starving bears images in order for culpable innocent children to suffer from guilt over an non-extant climate change.

16. They discharge all evil on innocent children: all kind of filth, especially on white children.
17. They never had interest in skies at all, some even ritually show their buttocks to them skies.
18. Astrology or what goes by that name was mainly mass-superstition as based on faux ego that is the wrong position of the Sun – this is alas true for east and west alike.
19. The importance of the Sun is accordingly largely exaggerated.
20. The Sun does not determine the zodiac at all.
21. The Sun does not rise at east, except from twin short instances.
22. The ecliptic does not determine precessed ascendant set.
23. There are but slight changes in the (Sun's "alignment to") ecliptic as well.
24. There is nothing, never was and never will be as "12 rising signs" in the eastern sky.
25. What you get is endless nonsensical asinine babble, since "persons" who assume to dabble in Astrology can not even predict Full Moon, equinox or noon.
26. They learn to depend on inane "programs" along with a dungheap of pseudo-astrological cookbook material: anything goes. The lured as goaded client will learn absolutely nothing since alleged astrologer could not even fathom one's own Sun sign: ascendant and lunar position being quite out of anybody's league. Client and astrologist understand each other very well as they both like to be deceived, whatever saves them from facing their existential void.
27. Various "systems" that more or less reflect mathematical imperfections were imposed upon the unsuspecting human average: thus e.g. "house systems" would break at Oslo's latitude already.
28. The Cartesian house system operates in outer space, alien solar systems, above Himalayas, comets, under some alien ocean, within the Marianna depths as well as in your Oslo bedroom.
29. At least 1/3rd of "humanity believes" Earth to be flat. No iPhone will help here since evil

and genocide have easily been extolled as “religion”. One does not need a manual in order to stab around and yet, having your blood on their hand as prescribed gives legitimacy to slaughter since and before Jericho: all according to holy tradition: harlot and spies kept safe: even extolled as root of a messianic dynastree alleged.

30. What can you do with people who traditionally believe this or that? Nothing would be as cautious as pragmatic answer: there is nothing to do: at least 1/3rd of humanity is dangerous to the rest who is sometimes even worse-off for whatever unreason among many. There will be no more deluge? Who knows? All those alleged prophets in predicting absolutely nothing nevertheless enforced a day of omniversal rage which as Nibiru comes unexpectedly thus unpredicted; predicting the unpredictable being business as usual.

#Corona #virus: easily removed <http://payhip.com/astrology> pretty much as cancer #CancerCure

https://www.lulu.com/search?adult_audience_rating=00&page=4&pageSize=10&q=KLaudio+Zic+RTRRT

How do you remove any nuisance; said phantom virus including: in yourself and others?

HEAL THE WORLD WITH #RTRRT

- a) You peruse your favorite standard Reality Rendering Tools: typically #Cascade.
- b) Why Cascade? Cascade breaks said virus apart. Discreating tips as follow.
- c) Project said virus unto a mental (or real curtain) screen before you.
- d) Walk through it as it splits apart: never to come back: no second wave with Cascade.
- e) Cascade is like katana blow: use once with great conviction: do not think.
- f) A siddhi-yoga variant works as well: become strong enemy virus yourself or project yourself small but angry: slash said virus while rushing through it: never look back.
- g) The technique is thus no different from original “slash that burger” example along with standard cancer discreation.
- h) Any #RTRRT will *discreate* negativity while recreating the matrix into a better variant.
- i) Essentially, the #RTRRT act as cut and paste **matrix hacking** as one is able to cut a portion of time-space (even in advance) in order to change an (unwanted future or actual) event: patching it as it were with a lively one.

- j)How do we know when e.g. recurring cancer will lurk to hit? We calculate.
- k)All basic and advanced material has been made available through a variety of sites.
- l)Everyone can quickly learn how to calculate and change future: in minutes.
- m)A normal boy can learn how to calculate your next marriage day in twenty minutes.
- n)It takes a few seconds or minutes – depending on case – in order to know next marriage.
- o)Astrology is not just about marriage: anything else is easily calculable.
- p)An Astrologer needs no computer, much as a Instant Magick requires no physical tools.
- q)Anyone can learn how to predict and change future in minutes.
- r)While initiation may take from **twenty minutes** to three days (or years), operations are quick: minutes.
- s)Thus, really basic Astrology will tell not only whether but *recurrently when* a patient will contract nuisance.
- t)To contract a disease means to catch or acquire an illness through the exposure to a contagious pathogen. However, one may also contract a disease that is non-communicable such as cancer. Contract a disease is a verb phrase, related terms are contracts a disease, contracted a disease and contracting a disease.
- u)The #RTRRT treat any nuisance as “obstacle” to be discreated.
- v)RTRRT stands for Real-Time Reality Rendering Tools.
- w)#RTRRT is based on a set of elementary solid occult principles such as found in Sikkim.
- x)In the selfsame fashion as UNIX treats everything like file; the #RTRRT makes no difference betwixt corona, cancer or debts. SVVM CVIQUE.
- y)The word “contract” is derived from the Latin word **CONTRACTVS** which means to draw together. To “contact” a disease is not a correct in an expression.
- z)Other #RTRRT can perform but #Cascade will do.

EXAMPLE #1

The seventh fairyⁱⁱ is bound to wreck *that* marriage at the lastⁱⁱⁱ moment, but you don't know it: that is, before you simply calculate the date. Simply? If you can do $20+2=22$, you are qualified for the job. So, now that you are aware of trouble ahead, you simply change that future by discrediting bad influence while replacing it with most marvelous positive an issue.

EXAMPLE #2

Someone thinks that he got away with cancer^{iv} but there is a case of reoccurring cancer that can be *preemptively calculated* as averted=cured^v. Since said nuisance got its very name from *ditto* lunar-saturnine conjunction in *Cancer* constellation^{vi}, it is easily predictable as preemptively averted-even as recurring a nuisance.

How does it actually work?

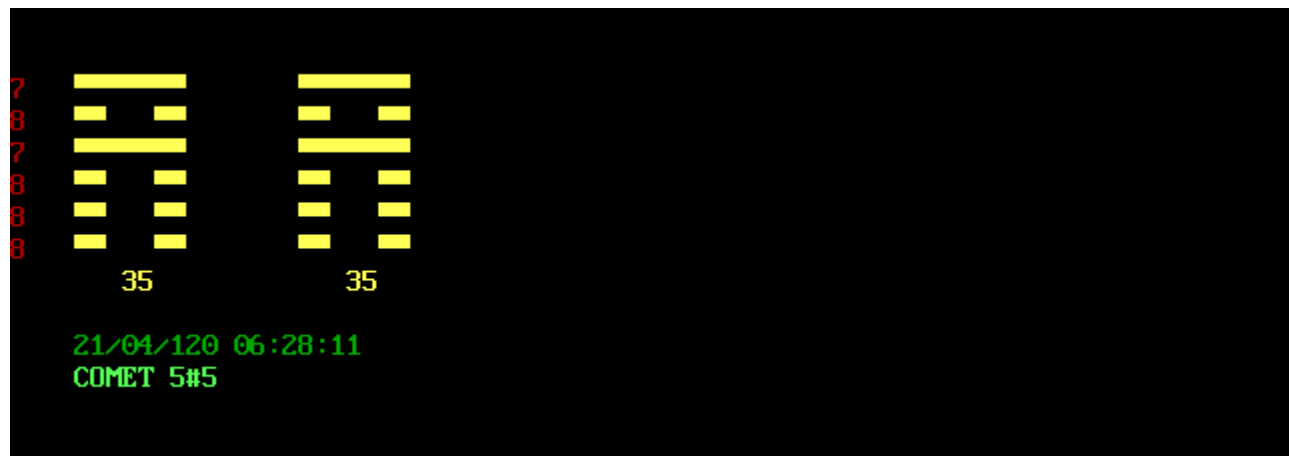

Since nobody wants to change a lovely future^{vii}, you are invited to predict it first.

How do I predict it?

You either do the e.g. $22-2=20$ math yourself; or you refer to us ynn2017@gmail.com

- i Any futurity; possible or rather determined future: some being obstinate such as saturnine ones: to peruse a parable.
- ii E.g. ||| Saturn.
- iii Actually at the very precise moment: as it is the case with saturnine or 7th fairies: if you are able to predict the day, we can help with the hour, minute and second: no need to be that precise; just saying.
- iv Cured. But not for long. Saturnine-lunar directions determine times of recurrence.
- v RTRRT cures cancer and fends from every other nuisance as simply labeled “obstacle” *to be discreated*.
- vi Nothing to do with idiotic “signs” as perused by swindlers of all kinds, east and west.
- vii For you or anyone – anything – else.

Comet ATLAS signature.

A bright one, matutineⁱ.

Other cometary signatures may come as e.g. :::::| quick resolving, broken into too many a chunk.

Then there is |:||| orbitally interesting.

|::||: timing its signature to the rhythm of the six spheres.

|:::| brings interesting gravitational conflictoryⁱⁱ collisions.

|::||| clearly brings both good fortune as unexpected *and* chaos: gives and takes: leaving no “logical” unreason behind – ever. Whatever viri it may *sow*, natural immunity *is* either already **there** (meaning here) or develops in no time at all: yet a period of pestilence is mandatory.

C/2019 Y4 has panspermic qualities, therefore |||: into |||::

- i Of mornings, early morning eager.
- ii Conflicting.

#Marriage #Comet ATLAS in the 12 houses <http://lulu.com/astrology> of your #horoscope
#1008planets

As directional calculi modes shift from Harvard MPC to NASA JPL, a new offspring of galactic Astrology reveals its long-hidden secrets: perhaps _{for} too long.

Since the present one of interest is *not the only comet labeled* ATLAS, one should stick to (its original) designationⁱ, namely C/2019 Y4.

The “marriage comet” may have interesting breeding plans, indeed: comets have been seen seeding over Bethlehem as well.

How, in the long night of time, a comet relates to “hamsters” remains mystery: also to Virgin Mary and Buddha. Progress apparently *must* happen despite our lack of “understanding”: whatever that may **be**: appears as un-required by impersonal changes to planetary genetics.

This peculiar one makes its first return after 6026 years: last time it witnessed plague over Mesopotamia: it may have *brought* (genetic roots for) Yersinia pestis to this planet as well: an ominous but sound hypothesis, indeed! As cases of plague have been recently reported *in China* as well, one should be extremely careful with Niku-Unukalhai (Niku Apocalypse) plus Saturn-Pluto (global plague, wars, hecatomb) this year **and the next** *and* the next. The comet may break into chunks as (normally every one like e.g. given) ISON or Borisov will, in fact they (often did) **have**: that does not exempt “stardust” encountering higher atmospheric strata where “our” microorganisms already loom for (more or less “harmonious”) genetic exchange?

2020 COMET IN THE 12 HOUSES OF THE HOROSCOPE

- 1)Marriage comet, indeed. A son will leave a long feathered trail of spiritual beauty: almost an invite at ascension!
- 2)The sage's log white beard is comet's (blazing its) trail. Wages will follow.
- 3)An omen of longevityⁱⁱ without time and space as infinity has nothing to do with time.
- 4)Refer to HGA ^(guardian angel) since underlying cancer symptoms may bring about death.
- 5)Timing is everything: six spheres: all good progress comes through musical dreams.
- 6)Facebook-likeⁱⁱⁱ marketing success has gathered icy genetics attached: long ill no dead.
- 7)Protection from heaven above along with riches galore, holy crops and marriage.
- 8)Shaman child: dragon as incarnated: first planetary initiation of a reptilian race shifter.
- 9)Reconciling Mawangdui: a detached calculi sage is above marital disharmony below.
- 10)Quite the opposite if one can be happy without family or even friends: alien seed.
- 11)Concubine's love: progeny is favorable: genome is renewed: even as RNA.
- 12)White wedding. Cinderella's shoeshine boy. Silky presents. Three years of eternal love.

- i As *Y4* (designation) may also pertain to SOHO (instead of ATLAS), one should be extra careful here.
- ii Also marital fealty with love: good for enduring projects: marriage.
- iii Icy object nevertheless gathers particles together: such as Facebook denizen gathers followers: thus potential buyers. A long illness, if portended (such as global plague) does not necessarily bring about death. This almost looks like the already: thus before-ATLAS or post-Borisov; situation.

Angel Guardians in #Astrology and #Magick <http://lulu.com/astrology> #RTRRT #1008planets

a)This HGA brief acts as reminder while introducing new data with hints towards discovering your own Guardian Angel in the stars.

b)Everything either *is* or is marked by a star: intelligences mostly are: as several categories of intelligences are also branded by e.g. ecliptic degrees: often meaning stars for a peculiar epoch.

c)Various pentagram rituals mark an epoch as well: therefore precessed angels.

d)Many of these rituals, grimoires or even star maps with ephemerides are dangerously worthless to this date, since produced, stolen or copied by often praised charlatans.

e)To have revered “experts” mangling data seems quite ordinary an experience as concern human ways.

f)While nowadays there are no astrologers at all: inane asininity is not in fact prerogative of our modern epoch: stupid greed however is exclusive to our past: as it would require a modicum of sly intelligence: a weasel-like quality completely lacking in modern zombies. Never in human history was humanity proud of 777 years of error along with plus 90 degrees of: it would seem that capacity to conform with most asinine assumptions is unlimited in a race: thus while the Chinese studied comets for at least some 2000 years, nowadays humanity knows absolutely nothing about them: to the point that Mawangdui remains the only relevant reference: all that we know about comets was known by the Chinese long time ago: also e.g. by Egyptians who surely observe the present comet 6026 years ago, when Egypt “as we know it” (meaning we know nothing at all) was young. Or was it?

g)Yes, Gemini may be 90 degrees from where your asstrollogical programs miscalculate it or them, while the average of Aquarius is due in some 700 years from now: but we are a great civilization, aren't we? After all, we invented so many kitchen appliances and stuff.

h)There have been rare attempts at updating or correcting rituals for precession: see on pentagram rituals on the site: your starry angels may not be in due place at all.

i)Most of the surviving material from wiser epochs has never been revised or understood as swept under the carpet of superstition adamant. As some of the material requires calculi, it has been discarded along with precession: which is quite un-required within the worst superstition of all times: the modern one. Formidably, modern asstrolloger is not even required to know Sun sign: all that the learn is how to sound learned to idiots by perusing cozy phrases that hide their utter zero acquaintance with the matter at hand.

j)In order to illustrate what we mean by “idiot”: one specimen has “calculated” polar star *at east* for the USA. So Gemini is not the only one rendering 90 degrees of “error”: what good is a supercomputer when a cave man sits at it? You don;t change default mind: you blast it apart (with #TMD).

k)Ah and said specimen has followers who are enthusiastic with polar star being at east.

l)In such an atmosphere, even mentioning data or guardian angels sounds too optimistic.

m)A good example of guardian angel is the ascendant such as of Angelina Jolie: Monoceros, meaning Unicorn. Thus, whether ornithological, reptilian or otherwise, the ascendant normally represents guardian angel: *is* guardian angel.

n)In peculiar cases, HGA or co-guardian may be determined as e.g. Venusian intelligence.

o)Often, such spirit-stars may be identified by degree.

p)All #1008planets thus have (calling) sigil with Tarot “card”.

q)Learning to superimpose horizontal Cartesian metrics over older ecliptic logic is not easy matter of tabulation.

r)Lunar intelligences or “spirits” often determine guardian angel(s) as well.

s)Ascendant, Moon, Venus – in a non-mercurial case; Eris and Mars in martial a case.

t)A sigil acts as a sort of calling card.

u)We are in the realm of evocation magick: where errors are fatal.

v)It would seem that as concern grimoires, humanity has only capable of producing error upon error: and yet the stars are clearly visible!

w)Nobody knows the amount of sheer mess as produced by possibly *sincere* (thus Dee-like) aspiring conjurers as armed with this or that grimoire with stellar tables gone wild.

x)Even rather scientifically-oriented Dr. J. Dee had doubts, issues with repulsive an end.

y)One can determine ascending guardian angel for personal protection and fun.

z)Some totemic animals may be snaky or foxy; e.g. (former President) Bush has Fox ascending.

aa)“Don’t tread on me.” is apropos in the USA which has *Serpens Cauda* (rattlesnake)ⁱ.

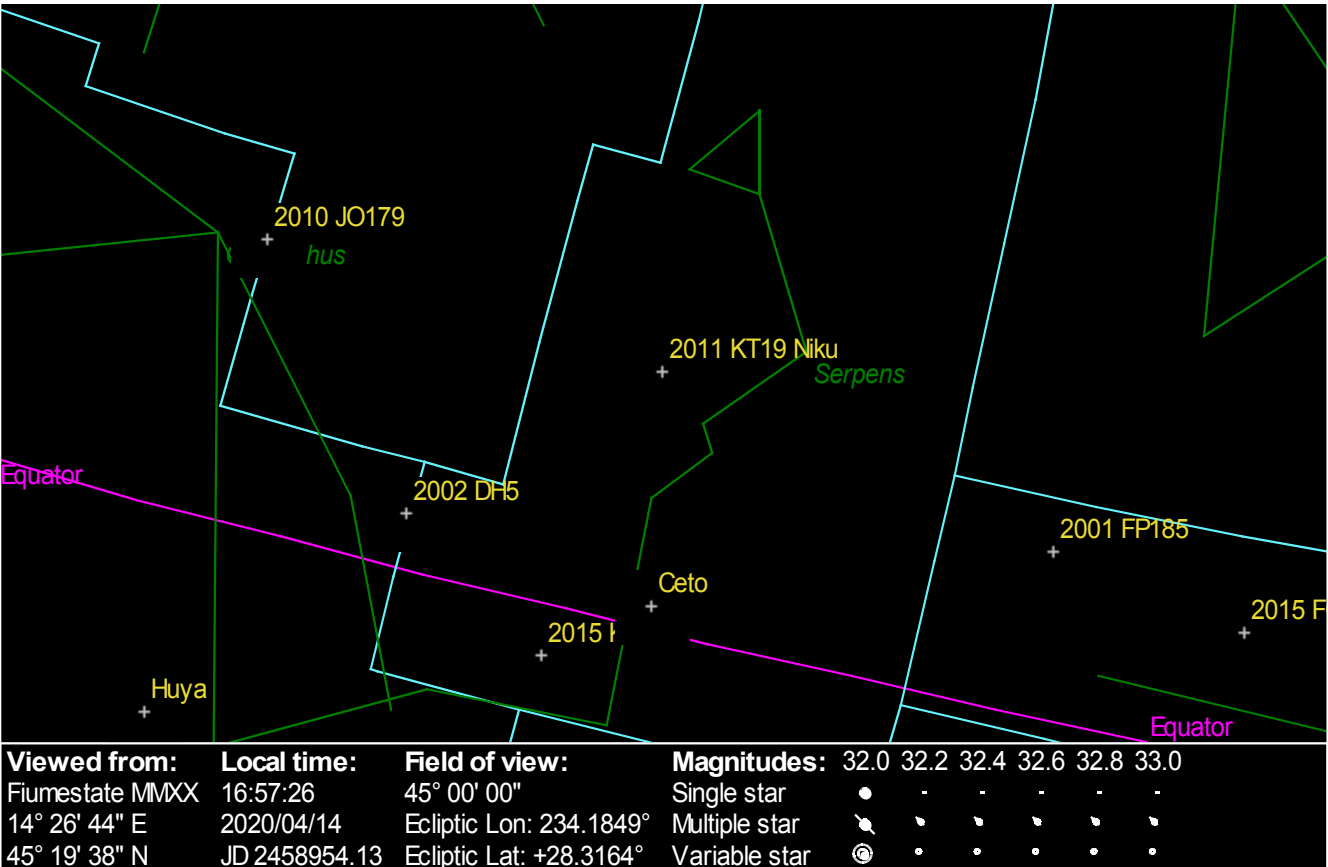

- i The ascendant Serpens Caput is under heavy stress from Niku-Unukalhai (Nikunukalhai) “apocalypse”, meaning Italy.

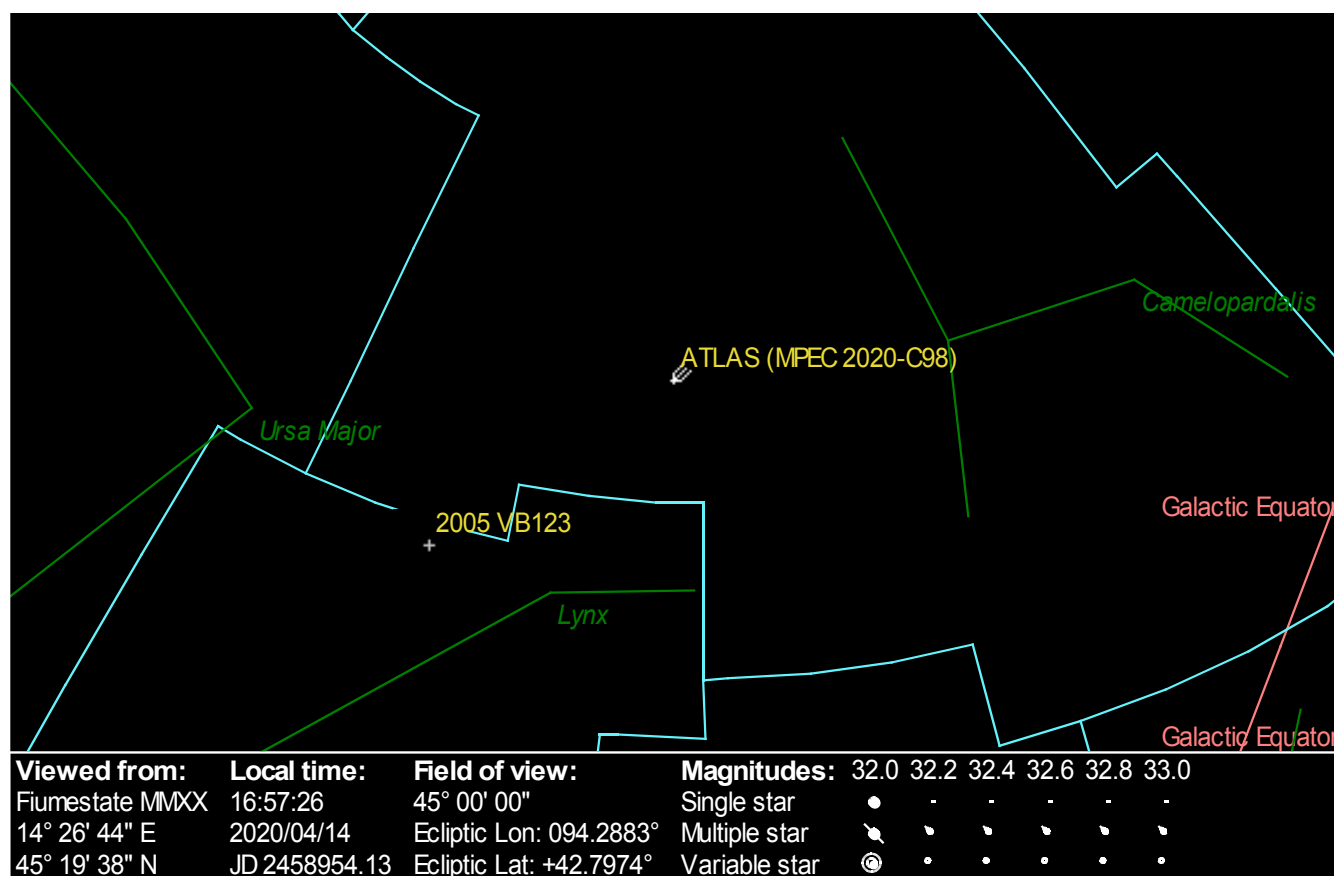

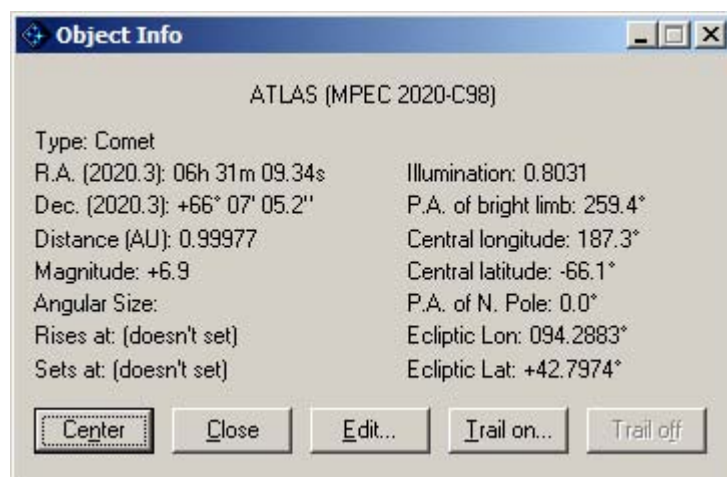

|:::| <http://lulu.com/astrology> **Black Death Comet** returns after **6026 years** from plagued Egypt 4000 BC: provoking global plague MMXX under Niku #Apocalypse w/ Saturn-Pluto global pandemic aspect #CancerCure Aspectarian #RTRRT #BlackDeath #Yersinia Pestis #woke

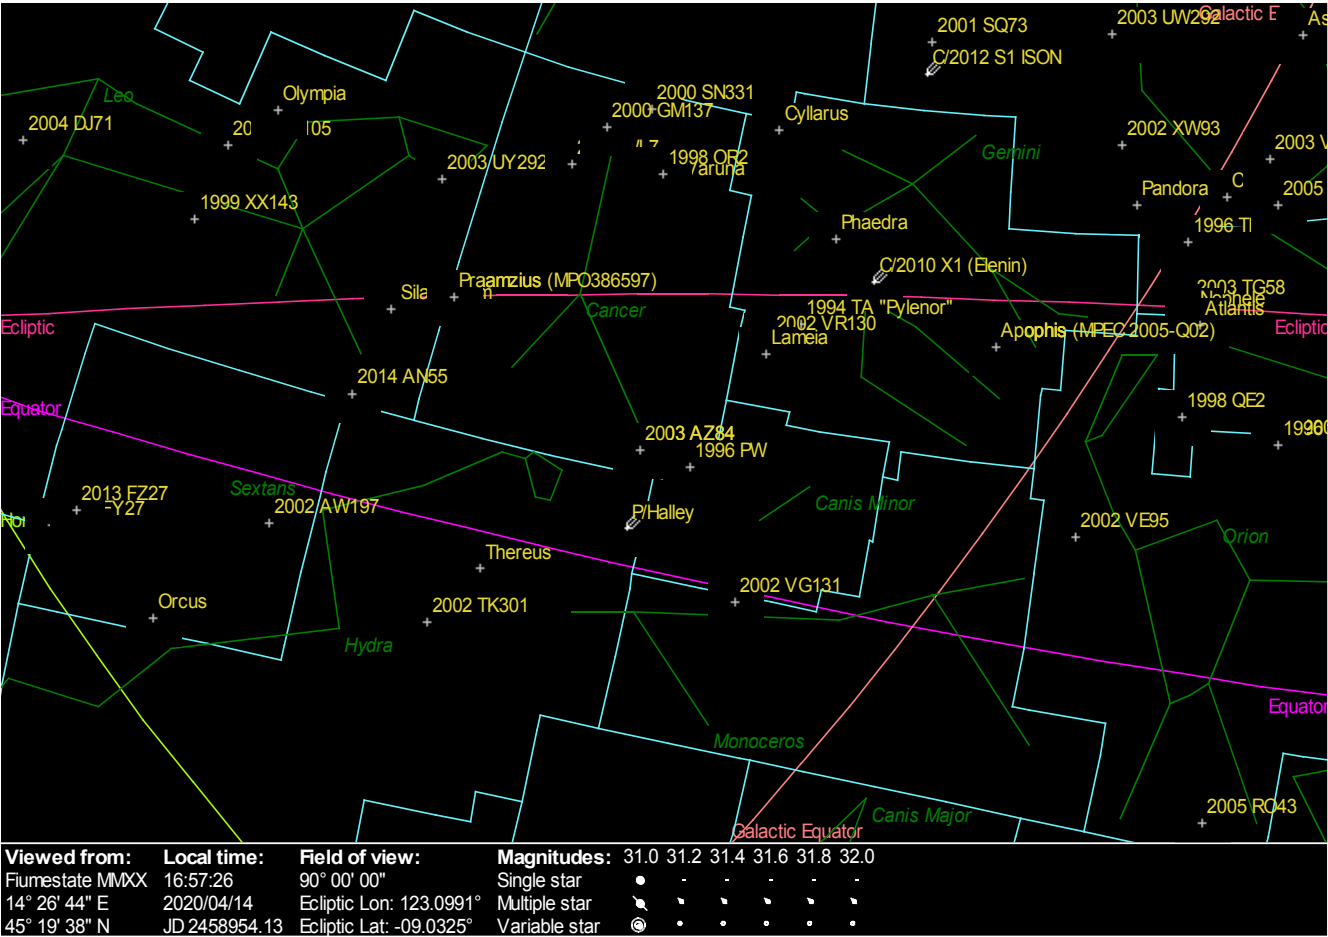

Yersinia is not “something *like* that Black Death”, it ***IS* BLACK DEATH, the** black death.

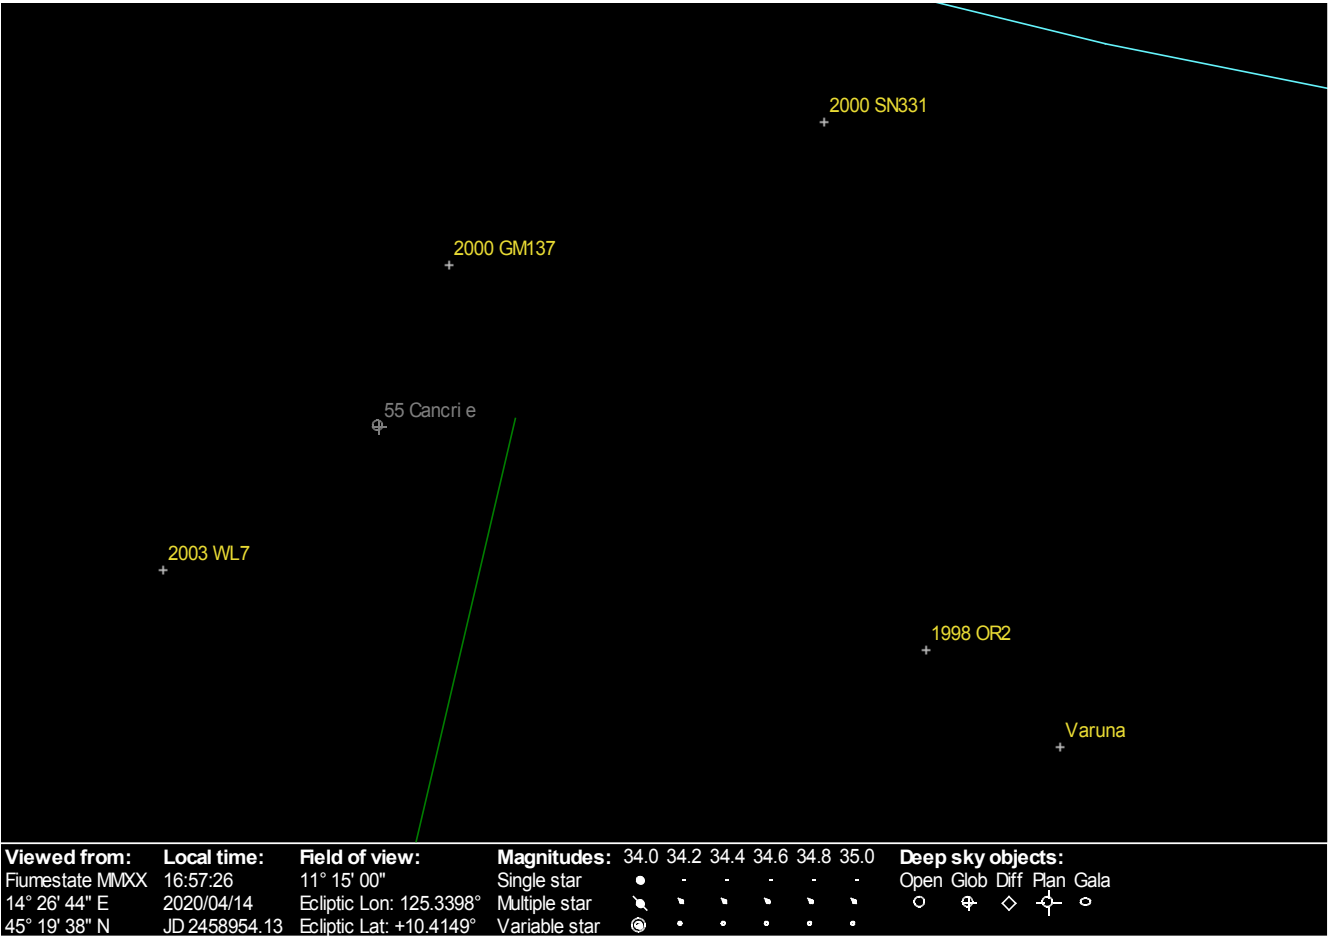

- a) Why are you quarantined? Many reasons: from land-grab to global plague in preparation.
- b) In the year of the brat, many plagues plague under the corona umbrella, not just dems.
- c) Fauci means jaws. It is also Venus |:::| Mars aspect: the aspect is called *ditto* Jaws.
- d) While birds hold sway anyway, rodent-transmitted plague requires empty cities.
- e) Overfull trash-bins w/nobody around benefits rat community while keeping virus safe.
- f) How is said virus kept safe? You are helping it right now by staying at home.
- g) The curve that they show you means prolonged stay at home. Is that good?
- h) When and if you'll ever get out, you will come into contact with people.
- i) These people were kept from developing immunity just like you.
- j) So basically this buys time for more deadly diseases to spread under corona umbrella.
- k) One of them is the infamous Black Death as recently reported in China as well as USA.
- l) See also on the even less happy ::||:: bird flu aspect within the standard Aspectarian.
- m) So |:: being Mars; while ::| is clearly Venus; said aspect is rightfully called: “Jaws”.
- n) There are at least *two* fatal Black Death plagues out there and not in China only.
- o) **Yersinia pestis** is more popular than Hantavirus: has been around for **6026 years** now.
- p) A case of Yersinia pestis has been confirmed on November 3rd 2019 in China.
- q) The comet that “brought the plague” has returned after **6026 years** right now in spring 2020-
- r) While Egypt was baby, Mesopotamia flourished; until clobbered by Black Death.

- s)While Hantavirus is “native” to USA already, Yersinia brings “worrying” connotation.
- t)Yersinia is not “*like* that Black Death”, it IS BLACK DEATH; **the** black death.
- u)No people on the street with abundant “food” supply from trash bins. Rats! Bats as well.
- v)These trash bins may be very-well stacked in rich areas for the year of king rat.
- w)Walled Jericho metropolis apparently withstood plague 6026 years ago.
- x)Jericho was destroyed by barbaric a rabble; two spies and a whore: root of “David”.

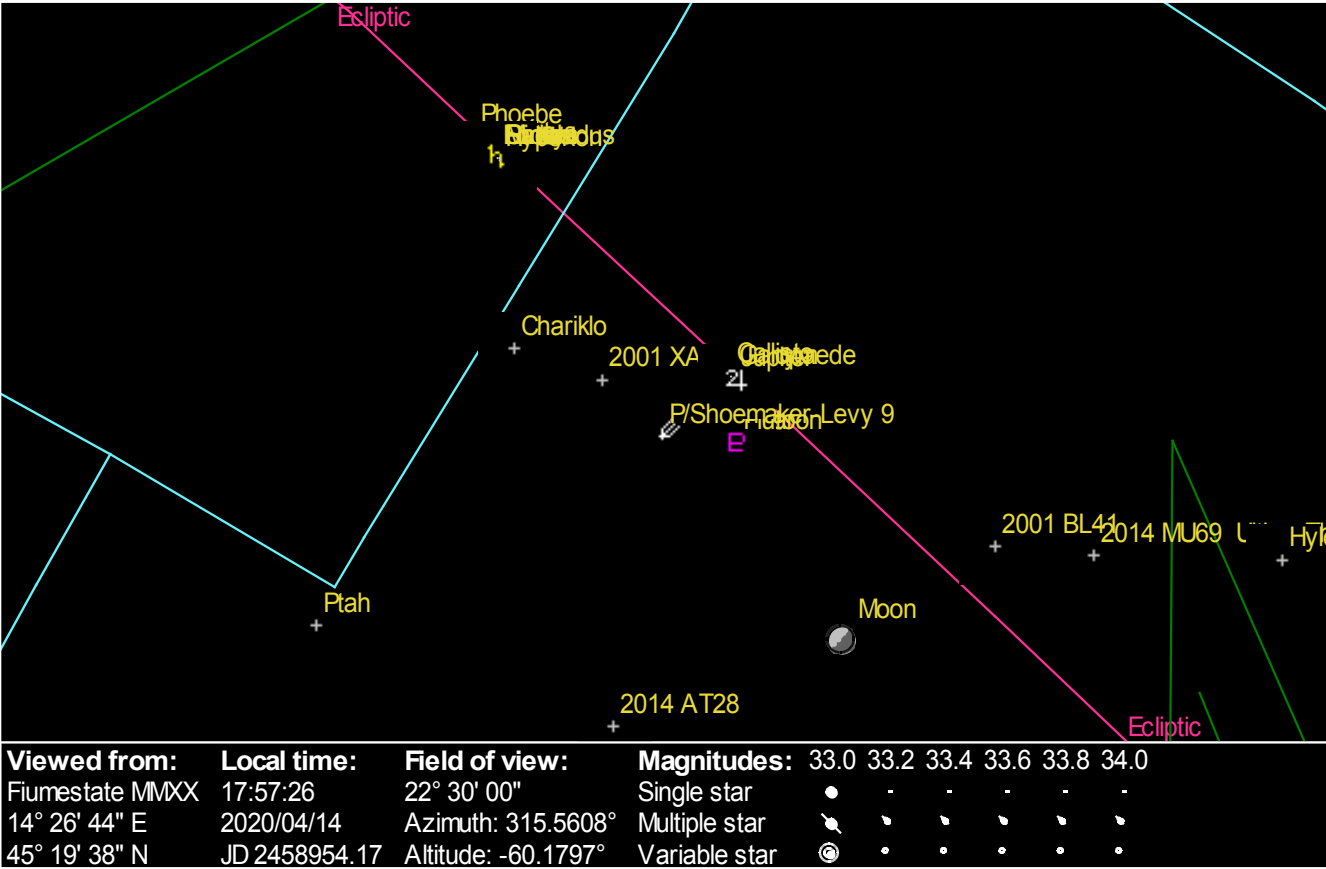

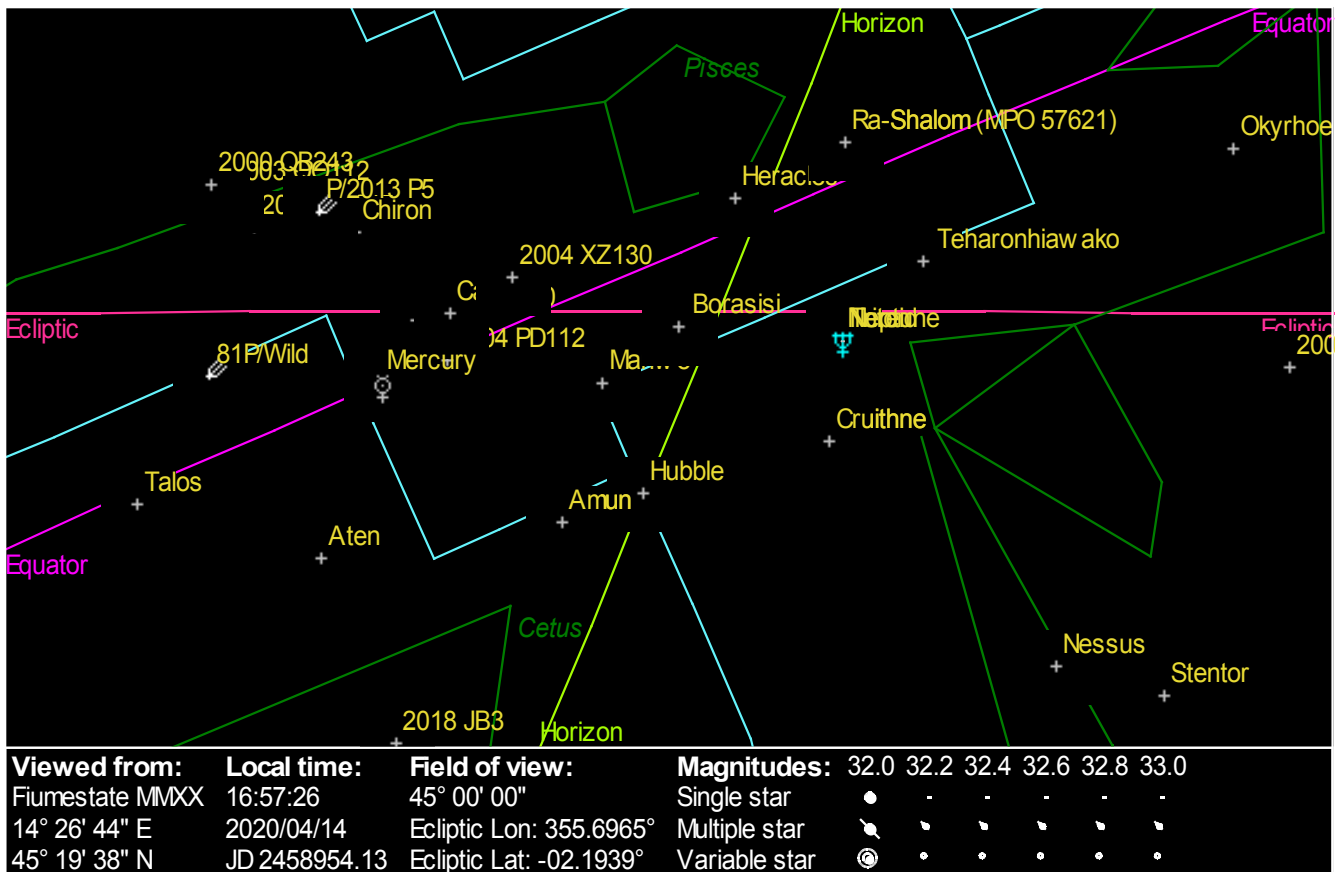

Mesopotamian comets, killer asteroids and #1008 planets MMXX <http://lulu.com/astrology>

Mercury into Cetus II.

Pandora box plagues your own horrorscope? #RTRRT <http://lulu.com/astrology> #CancerCure

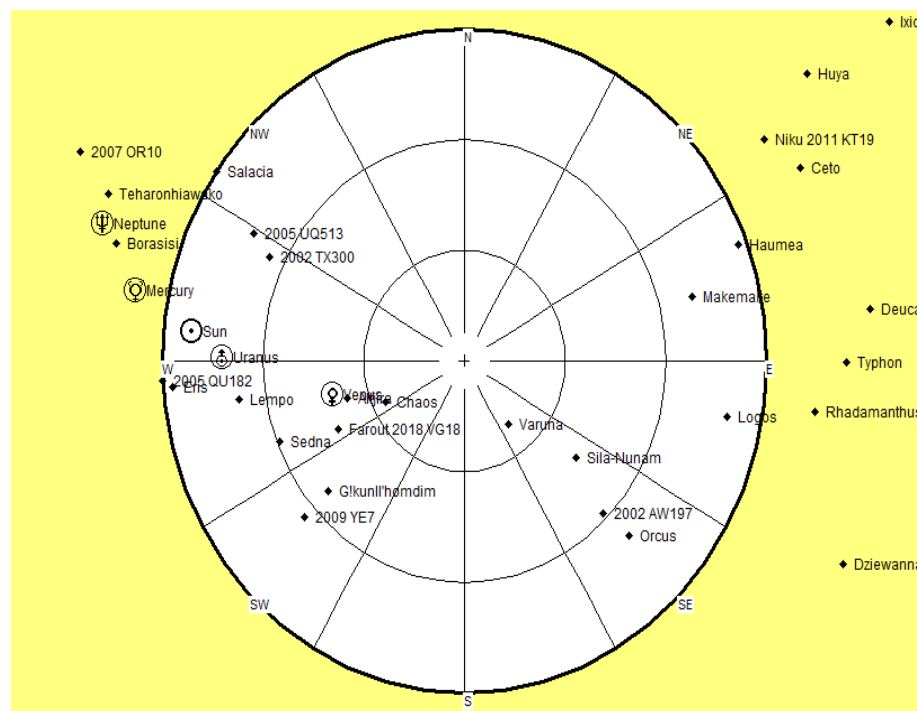

The events that *marked* our alas plagued times are in order of importance:

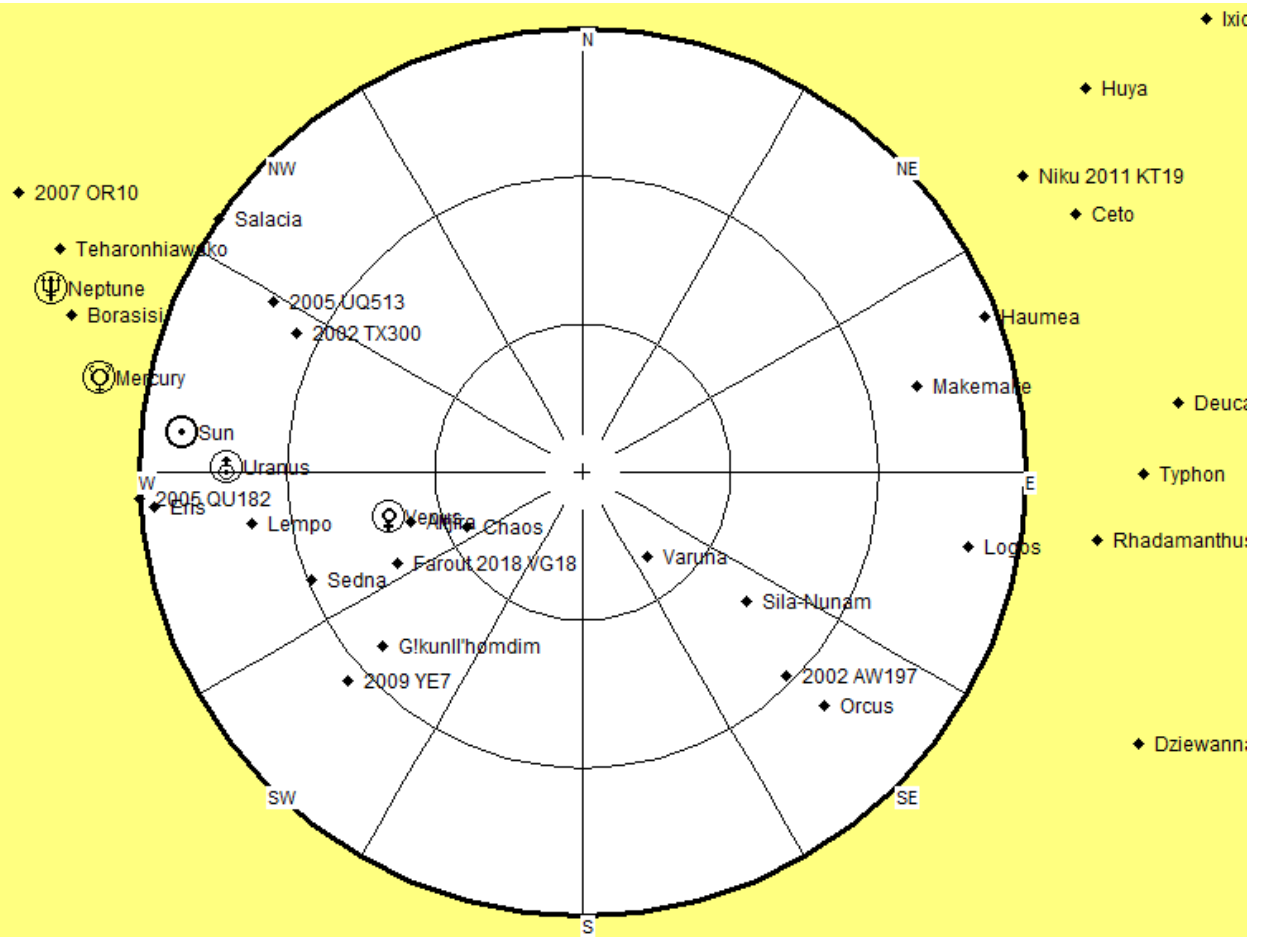

- Comet ATLAS visits us for the first time in 6026 years; therefore plagued Mesopotamia.
- Niku with Unukalhai: apocalypse in Serpens Caput, the ascendant of Italy.
- Saturn Pluto: massive death toll due to plague, famine and wars: as predicted.

Yes, the year of the brat is ideal for unleashing plagues out of Pandora's box: there is a killer asteroid as well” apparently as due to sort of hopefully brush-by and e.g. even Pholus “square: dead castrate comet Chiron but these are minor events.

All these events happen within your own horrorscope as well, and if you're lucky: you survive: otherwise hope to be the one, say out of ten perhaps: who do.

As future-changing is sometimes even better than – or an expression of – hope: do what you always do: RTRRT.

Color by numbering your zodiacs <http://lulu.com/astrology> #1008planets #2025shift #RTRRT

- ◆0 – Tao as unspoken ^{of}. NEMO.
- ◆1 – One without _{the/any} other. ^{NETI NETI} Neither this nor that; _{#RTRRT #TMD} True Mind Distiller.
- ◆2 – Tropical Mars in Cetus equals sidereal Mars in Cetus. There is but one Mars! See 2.
- ◆4 - False elements. Aquas :::|:| do render Aquarius along with uterine Aries, Eridanus, Piscis Austrinus, Delphinus; actual era of Pegasus ||::|| Capricornus, Cetus, and Pisces.
- ◆10 – minutes: ascendant sets and zodiacs were determined in minutes: less than an hour.
- ◆11 - “His number is 11”. Also ERA ERIDANI and Aladdin XI.
- ◆12 – False ego demons or popular 12 ascendants/zodiac signs – moreover miscalculated.
- ◆12 – Faux number of ascendants for any epoch – any false “solar” zodiacs.
- ◆13 – IAU “correct” solar zodiac: a new superstition. Ophiuchus as “13th” ascendant.
- ◆14 – A popular Egyptian zodiac with Cat and sea-horse.
- ◆15 – When New Moon in Sextans does not quite justify 16.
- ◆16 – Solar zodiac with Cetus, Orion, Sextans and Ophiuchus.
- ◆19 – Average initiation time: required to predict by memory in seconds ever after.
- ◆20 – minutes: shoeshine boy initiation time: predicting death to known astrologers.
- ◆21 – Venusian zodiac. See also on lunar and all 1008 planetary zodiacs.

Well-tempered #zodiac <http://lulu.com/astrology> #1008planets #AcademicZodiac #RTRRT
#ZodiacShift #horoscope #QuarterSky #ZodiacFix #Tarot #CancerCure #Parenting #Divorce

- 1.The zodiac has 22 constellations: 43 with Eris and Pluto “as planets”.
- 2.22 zodiacal “cards” along with 16 elementary permutations: ascendants form the Tarot.
- 3.There is thus a total of 67 horoscope signs – that include ascendant set for present epoch.
- 4.Aries, Gemini, Cancer, Libra, Scorpius, Sagittarius and Capricornus are not ascendants.
- 5.Meaning that they do not rise ***at east*** for the current epoch: no one is “Cappy ascendant”.
- 6.Gemini rose ***at east*** *before* Krishna, Aries before Christ, etc...
- 7.Where is Gemini when the “astrological program” ^{deliberately} miscalculates it “at east”?
- 8.Gemini can be observed ***at North*** when “ascendant Gemini” is wrongly assumed at east.
- 9.In very poor words: you will never meet anyone with Gemini ascendant at all.
- 10.Angelina Jolie is Monoceros that is Unicorn ascendant.
- 11.Serpens Caput= Italy Serpens Cauda=USA {“Scorpio” & Sag=NOT ascendants}.
- 12.The founding=framing fathers had no idea of any Astrology at all: tradition persists.
- 13.Nowadays there is zero astrologers on the American continent: and the only two future talents will soon die according to list and schedule (death being easiest to calculate).
- 14.Speaking of easy, anyone can calculate anyone else’s ***next marriage*** ^{by memory} in seconds.
- 15.“Modern astrology” offers a dung-heap of errors larger than #QuarterSky
- 16.90 degrees of “error” does not even compare to subsequent inanities galore.
- 17.There never was anything like 12 equal rising Sun-signs in the east.
- 18.#ZodiacShift approaches 7 signs (seven) towards Xmas.
- 19.Thus error is not “one sign only”.
- 20.As concern ascendant set(s) it is futile to even talk of errors, since the whole concept.

- 21.Can not be linearly explained: people expect linear errors within two-dimensional mind.
- 22.Mind? Default mind is one for all, there are no “minds”, or... persons? All are selfsame.
- 23.The historical zodiacs were called P1, G, N1, M, P2, X, N2: “G” stands for Galax, etc.
- 24.Stupid people who want 13 signs will want 13 ascendants: 12 inanity redux.
- 25.Thinking incapability is default: no need to think at all: nobody does. Go Greenwich.
- 26.The Academic Zodiac was set online as of 1972 with over 45 000 publications.

That there are 13 lunar months within a year goes without saying much. But 13 solar “signs”?

<http://lulu.com/astrology>

Some years ago ²⁰¹¹ them millennials casually “rediscovered” a 13th sign: Ophiuchus, as if the Sun would span 13 constellations only. It actually spans 16 – nothing much to do with 16 eastern ascendants, though.

All hell broke loose since there are still idiots that believe in 12 “signs” rising at east: something that never happened and never will: but plausible to rabble or shall we say 12 tribes alleged. Albeit Nile delta lunar then eventually birdie god knew about Stargate but not of Auriga Moon, and gave some rudimentary instruction, Leviathan “tribe” (the Genoese jeans ones) remains illiterate to this day. As genocides tend to get expensive, they had other bibles on their default minds.

Hell? Honest professor merely mentioning Ophiuchus receive death threats from teenagers. Proof how something ridiculously untrue sits well with default mind forever. Let it be. People don’t die from tamponal Bill Gates viri – they doe from stupidity, not obesity at all. That is default mind is death in itself: core being being dead: one serves as avtomatchik.

Gemini never rose at east since Krishna. Idiotic “programs” have it rising at east when it is clearly visible at north: but how could a 90 degrees “error” persist for so long is beyond us: default mind surely is blind faith: no one will notice because no one really cares at all.

Aries never rose at east since Christ, a faint little uterine constellation within a watery sky.

Conversely, Libra does not rise at east. A short list of false ascendants that you can not possibly have and neither can anyone you know, knew or even knew long ago is next. E.g. USA ascendant is Serpens Cauda while Italy is Serpens Caput: selfsame SPQR symbolism, in case nobody noticed. Italy discovered USA long after Brits were taught to read and write Latin. They still do speak and write a - sort of. La sorte e' quella.

The basic zodiac of 22 constellations of course expands towards 43 with Eris and Pluto "as planets". 22 and 16 thus determine basic Tarot initiation (not your shitty card deck: Tarot is high initiation system: nothing to do with popular nonsense like Golden Dawn or worse).

See on rare Taurine ascendants. Said Aries, ditto Gemini, Cancer, Libra, Scorpius, Sagittarius and Capricorn do not rise at east for the current epoch: no one you may have known ever had, has or will have these ascendants. Some of them did rise at east e.g. long ago before Krishna, Gemini did rise at east: twin legends were formed as immortal vs mortal fought each other and time. The last faint – extremely faint within an already faintest zodiacal parcel – star of Aries last rose at east at Christ's own birth: but Aries has not been ascendant in its own right even since. We rightfully call this star "the Lamb".

There are 12 and sometimes even 13 colorful lies out there for your soul never to know Holy Guardian Ascendant through a lifetime of superstition. As the devils thrive on suffering, so does your own: do not feed the troll.

NE PAVERIS MOMICVLOS VEL TROGLODYTARVM

#RTRRT <http://lulu.com/astrology> MATRIX HACKING ~ FAVORITECHNIQUES

THE INTENT OF TRUE MIND DISTILLED

Future-changing is simply intent. One needs no techniques at all which are herein rendered nevertheless like so many fanciful chakras, paradises, sephira, hells and aethyrs; for your posh spiritual amusement and instruction. One likes techniques because they attempt at framing intent into ritual order.

Intent of course can not be framed into anything, but that's its good and orderly part.

Choose your favorite techniques from a pool of #RTRRT at <http://lulu.com/astrology>

a) Cascade: simplest ritual formula: works for everything from bossy people to virus.

b) O5 or Oberon V: basic pentagram-like discretion formula.

c) PCS: Personal Cosmic Secretary: refined in its Spiral Trees variant.

d) MENTAT.

e) Aladdinⁱ XI.

f) Majik Wand.

g) TMD: True Mind Distiller.

Default mind is for losers. (NETI NETI can be regarded as 20-minutes Illumination).

h) Wishwheel. Favorite with astrologersⁱⁱ.

i) Bogeyman – undisclosed; does not functionⁱⁱⁱ at this level. Is also out of use.

COAGVLA SOLVE ET RECOAGVLA

Best projected through O5, said technique discreates obstacle while installing positive issue.

AS ABOVE SO BELOW

For those curious how personal magic works: normally the selfsame energy as obtained from discreation will recompose itself into a better plan.

ESSE DELENDAM

You break it – you buy it? Problems with obstacles being your creation, you assume 1008% responsibility. Don't buy it: break it!

- i Contains 108 discreation formulae, e.g. Architect's O5.
- ii In lack of better a word: since there aren't any.
- iii Requires a higher level of Initiation or awareness at least. Whole new world: novice be baffled: rather not.

While anyone can instantly determine the **year and month** of your next marriage in seconds, prediction to (day, hour and even) minute-second requires some uncommon skill, indeed.

<http://lulu.com/astrology> provides all the training one needs. Others have no idea what is going on with their own lives, not to speak of being utterly incapacitated versus any future-changing.

- a)Zodiacs are optionalⁱ as every planet has its own #1008planets
- b)The basic zodiac showcases 22 zodiacal constellations.
- c)Only 16 ascendants rise at east for the current epochⁱⁱ.
- d)There are 67 horoscope signs.
- e)#1008planets mean 1008 zodiacs and tarot “cards” (intelligences, sigils, spells...).
- f)Eris with Pluto expand basic zodiac towards 43 constellations.
- g)Eris never enters Taurus. Pluto never enters Pisces or Aries at all.
- h)Ascending Mars in Cetus is both tropical and sidereal.
- i)Her Mars in Cetus meets his Venus in Hydra: this is called (timely dynamic) synastry.
- j)For those who explore faux ego, but also for gold traders and cardiac experts: the Sun spans 16 constellations (nothing much to do with 16 ascendants, though).
- k)16 elementary permutations have everything to do with evocational magick, much as 22 zodiacal stations perfectly match Tarot arcana. No, not that junk deck of cards.
- l)Aspectarian is about directing, so one directs. There are 555 directions.
- m)Secondary angular direction being most precise one can determine e.g. centaurean time-line across the Axis of Evil, dark planets’ progress across southern skies, or a novel comet crossing Dark Flux.

n)The Academic Zodiac has been tested across the universe, riding distant comets, exploring alien zodiacs, diving under alien seas, atop Himalaya and down to rock bottom Ladrone Islands as Cartesian system overrides all failed “house systems” of an obscure past: which would ditto greatly fail towards Norway already (sic).

- i Zodiacs are essentially often irrelevant in (quick peripatetic) prognostication,
- ii Egypt observed thrice as much ascendants: in one its own era of variegated versatility in comparison to xeroxed uniform bloke now.

✓ Republican ☸ Astrology  <http://lulu.com/astrology> #Impeachment #Trump #Brexit #BabyYoda
Know the **news**: *years* beforehand: from the site <http://lulu.com/astrology> that predicted ²⁰¹⁶ Brexit won't.
#RTRRT #AcademicZodiac #ZodiacShift #CancerCure #Trump2020 #ZodiacFix #1008planets

 ? Once you know your destiny, what can you **actually** do about it? Change it. If it's bad, that is.

✓ ! How can **you** *better* your own **destiny** right **now**? Anyone can do it *in private* with #RTRRT
<http://www.lulu.com/spotlight/astrology?searchTerms=RTRRT+Mini+Initiation> so start enchanting!

 ? Democrat default mind does not think: as they hogwash over 12 faux signs that are not there.

✓ ! True skies are good for you as they provide accurate prediction: years ahead of an event.

 ? Is there such a thing as 12 signs rising at east forever in a flowing precessed omniverse?

✓ ! 12 signs superstition is demoncratically based on naive belief "faith": not any facts at all.

 ? How many horoscope signs there are? 13 or 12 as the Sun does *not* determine the zodiac?

✓ ! 67, 43 or 22 – depending on the definition of "planet": solar stations being 16 in number.

 ? But there *are* 12 ascendants, still? 12 can not possibly be **myth** since *all* "agree" on 12?

✓ ! Never been there at all: and there are **16** actually not 12. Errors vary from 90 degrees up.

 ? Is therefore a shift as concern zodiacal signs? #ZodiacShift like one sign or two? #ZodiacFix

✓ ! Actually **7** seven is the number around Xmas. 7 signs & **90 degrees** are merely illustrations.

What can you **get here** that you can't possibly obtain anywhere else? Besides plain truth?

#RTRRT <http://lulu.com/astrology> #1008planets #Trading #ZodiacShift #Magick #CancerCure

- a) Unwanted *things* do **not** have to happen at all.
- b) That is what you get here.
- c) Among other things: you (can) determine what **is** and what **is not to be**. That simple.
- d) Unwanted stuff can be timely predicted as unscheduled.
- e) Got a most likely unwanted visit next week? Remove it.
- f) Someone got e.g. recurring cancer? Remove it. Just unschedule it forever, alright.
- g) Can't predict next cancer in one? It is easy: if you know how to count to ten: you got it.
- h) Not knowing the future puts everybody at disadvantage: and it is not trading only that deals in futures.
- i) Some unwanted phenomena can occur in a recurring pattern: why not predict and discreate?
- j) Nobody wants it but things happen, unwanted stuff: issues: situations.
- k) Unwanted things do not have to happen at all.
- l) That is what you got here.
- m) Nobody else regales you with your own real natal skies – in progress: as your genuine stars offer, regale and dictate your day today.
- n) There is no fun in bankruptcy, divorce or (premature) death at all; and yet, people do it all the time, especially on “expert advice”.
- o) In order to predict events to minute-second (e.g. Chinese market crash with Venus in Hydra), one gets trained in real-sky astrology (=predictive astronomy) (and leaves dubious fun to losers.
- p) Losers buy everything. They believe in things that are not there and they eventually suffer, which is good for them: but not for you who gets dragged within their own mess: get out of the vortex on time: the poor-minded fellow can not even guess own Sun-sign.
- q) In order to predict events to minute-second (e.g. Chinese market crash with Venus in Hydra), one gets trained in real-sky astrology (=predictive astronomy) (and leaves

dubious fun to losers). Dubious fun? 12 ascendants that mimic 12 zodiacal stations.

- r) **Fun gets dangerous since:**
- s) **An “astrologer” (many people had an illusion of grandeur) will not even attempt at prediction at all. Good for him but not for you since unwanted events require it.**
- t) **In attempting prediction, he will fail: namely one can not predict anything from false skies with mangled data. Already at the very start, “programs” will fail him by 90 degrees; on an average pursuit: meaning he will miss not only e.g. Sun-sign but also ascendant by a 90 degrees (#QuarterSky) average. (And that is mere beginning).**
- u) Those who can’t predict anything at “best” count in popular credulity as propagated by media. Superstition pays politically as well as people don’t question authority. How many people will question e.g. Greenwich? And yet Greenwich never had any idea of zodiacs or ascendant sets or 1008 planets: as it thrives on general superstition.
- v) If popular observatories have no organized idea of their own natal (or actual) skies, how can one as armed with crooked “ephemerides”: or general-superstition program have any? You know, 12 sings.
- w) The ring is no joke at all: the 12 zodiac ring does bind everyone – in darkness.
- x) There is namely no such thing as 12 zodiac signs rising at east.
- y) When your program says Gemini ascendant, said constellation is visible at North: thus #QuarterSky or 90 degrees of error: nobody notices because mass hypnosis gets installed as default mind (none of your own): this “mind” exhausts you, thriving on your troubles: you can call it the Devil you (don’t) know. At one stage, you will even be tempted to think that you are actually thinking your own thoughts! TV, propaganda, “education: you don’t need: the wall. #RTRRT offers quick exorcism – before it’s too late.
- z) Was Gemini even as ascendant? Yes, in fact, but before Lord Krishna’s own epoch.
- aa) So was Aries before Jesus Christ. Check their horoscopes on the site <http://lulu.com/astrology>

- a) You can not *possibly* go out there and yell: “**People are stupid.**” - and how’d you know? Stages are expensive as gate-keepers are everywhere. No free kosher in omniverse at all.
- b) How does default mind work? You are all **freezing** in the USA - from deserts to Canada. That proves climate change is about global **heating** as produced by cows: that simple. Kill the cow and snow will go away. It’s in the Vedas.
- c) You don’t agree to heating or don’t really feel the heat in sub-zero weather? You are clearly white privileged KKK Nazi fascist islamophobic homophobic denier holocaust jihadi sexist (the list is endless): in other words: you are a normal intelligent white.
- d) How can one not *possibly* believe in the beauty of fucking people in the ass? Or 67 or 156 and counting different sexes – all growing overnight? Don’t propagate but feed illegal aliens. The present situation beats even Kalergi-Saudi (Moon in Auriga) plan.
- e) When you got your audience as hypnotized, you can easily blend climate change alert with polar weather due to global heating. How so? Default mind is quite capable to swallow dichotomy since it never thinks at all: that’s right: people never think: they sort of monkey it out, imitate thinking sort of: like: what would an average bloke do? So, what is on the menu? Prevaricate, steal, copy and among all; Moses’ fav: accuse others of all the abominable things you do (serial genocide being basic culture): and don’t forget to glorify it all: good god told us to slaughter you all, sparrows including: for your own good. Precisely what is happening in climate-controlled Marrano-juicy Europe.
- f) And yet. People ^{merely convenient ephemerides} and their pet programs never noticed whatever happened through the past 11000 years. It looks sincerely **impossible** that within a subcontinent as stacked with astronomic observatories (Sai Baba has had one next to home) nobody noticed that Gemini was no longer rising at east since Lord Krishna’s own epoch. Already Sai Baba having natal Sun in Libra on November 23rd may spark a little scandal: but did it? No; default mind’s a skipper: it simply skips over anything inconvenient that nowadays mostly consists of the most inconvenient asset of all: truth.
- g) Noticing Gemini **at north** whilst their “programs” miscalculate it “at east” would require a 90 degrees turn of the neck.

- h) Turning the neck would not do: the neck may not be completely stupid at all, but default mind is adamant in asinine stupidity forever.
- i) Default mind does not even cover it – too elegant in a concept – genuinely magnanimous in offering any word but **stupid** – in non being offensive, it is hardly descriptive. People don't want to be called for what they are: thus gypsies are not gypsies and stupid is not quite stupid: nobody is stupid nowadays: the times of Stan and Olio are past Carol Brunett: the present degeneration is too self-important in being serious gamers: with hip-hop (old school) grandfathers and rap (old school) founding fathers.
- j) From now own a cannibal that cuts and eats the heart of white female is protected by hate speech gateways; a pregnant woman stabbing jihadi is sanctioned whilst the only asset left unprotected is working white. Where in Anadolia could Hyxos develop such hate? Surely not from their teachers, the Yazid? Or protectors, them Egyptians? Gobblers?
- k) Said quarantined Hyxos cloned themselves into desert marauders at one surviving stage in protecting their own clone troops to be from Yemeni king who was about to exterminate global evil at its very root. Nowadays we have 1/3 of "humanity" believing in flat Earth.
- l) Yes, they fly by plane but Earth is always (Aiwass=Hydra=1904) flat for them. Now how do they fly around the globe on flat Earth theory is up to them to explain: doubt they feel the need to.
- m) Superstition is cozy because it does not feel the need to explain itself.
- n) It may be freeing sub-zero twin digits but that is obviously because of heating.
- o) That cows provoked polar whirlpool is quite obvious to many.
- p) The Chinese should be more lenient on poor people who merely sent bombs into embassies – and even that without much skill at all. They must be trained accordingly.
- q) One single mignig utterly destroyed three ancestral graveyard with temples and shrines in one single day: thus the pope who has no influence on Japan (or Thailand) pushes for more mignigs. Timing seems perfect as his own Genoa region is under water.

- r) Said distractions “cows provoke climate change” are genocidal step-by-step “boa squeeze”: your economy experts could not add two numbers while your climate experts are not even Marrano proper: suffice at least to appear juicy enough.

Trump wins with Venus in Pegasus – a Dantesque time for all. AEON <http://lulu.com/astrology>

- a) Venus in Hydra predicts Chinese market crash to minute-second: here is when and why:
- b) AEON CETI or AEon of Cetus II vaguely coincides with the so-called Mayan apocalypse.
- c) While Jupiter with Uranus in Cetus marks AEON CETI, said Mayan priests probably referred to Venus in Pegasus, Hydra and Scutum: as happening at comparatively close timing range. That kind of rather sound reckoning would mark year 2026 as beginning of the end of the local peak of the AEon of Cetus II.
- d) Since all eras, aeons and ages have been meticulously documented up and down to nauseating detail, we proceed to but briefly *illustrate* the main peaks and lows – mostly as concern practical issues such as economy – from roughly a decade from an allegedly first Mayan apocalypse; up toward Venus in Pegasus 2025.
- e) Venus in Hydra predicts Chinese market crash to minute-second: here is when and why:
- f) because it is a bearish low? Rather, shadow markets. Thus, real-sky predictive astronomy is predicting tools while stochastic charts are nay. Namely, as far as most of us are concerned: never did anyone predict anything or real substance.
- g) 1929 has a name: Saturn in Ophiuchus: happened in 1987; happens now.
- h) Venus in Scutum has brought Ukraine upheaval with the rise of Huawei.
- i) Trump wins with Venus in Pegasus – a Dantesque time for all.

You were told that there were some 12 “signs” that rise (ascend) at east: that was never true.

You never checked: it is in “human nature” never to: has been perhaps 11000 years nobody did.

You bought it because it’s cheap: also because you want to be exactly sheeple as the rest.

The zodiacs and ascendant sets were determined in ten minutes as set online in the early seventies.

<http://lulu.com/astrology>

22 ZODIAC SIGNS

The number of zodiacal stations was never 13 and surely not 12: and here are the main reasons why:

1. Every planet travels along its own zodiac.
2. The Sun’s ecliptic does not determine lunar orbit, and even less it covers Venus’ path.
3. The solar system is not flat pizza cut: it is at least **three**-dimensional.
4. The Sun does not determine the zodiac. The sole idea that the Sun determines the paths of all planets is visibly dumb even in a dumbest of Boy Scouts.
5. If the Sun would determine the zodiac, we would have only 16 zodiacal stations.
6. The Sun does not really rise at east: we know that is sort of hard to swallow, but there is nothing like 12 signs rising at east: they simply cheated on you (and themselves as well).
7. Gemini has not been rising *at east* since the epoch of Krishna. Today it is seen northwards – at ninety (90) degrees or #QuarterSky – from the place as miscalculated by popular “programs”. Unscrupulous people can count on sheeple never to check the horizon, cardinal points or rising constellations. A Boy Scout e.g. would deduce from Orion clearly rising at east that said constellation is ascendant. But Boy Scout does not think. A thinking Boy Scout would probably be ridiculed, bullied and dismissed as such.

Moreover

1. The craziest idea of all was that the Sun determines the zodiac, even zodiacs.
2. For their mad “system” to exist, precession should be canceled entirely.
3. If their craziness would be true, we would live in some perpetual Age of Aries.
4. Jesus was the last man to be born with an Aries ascendant, faint star thus Lamb.
5. Krishna was the last man to see the last faint star of Gemini rising at east.
6. Twelve (12) and (13) were sheer assumptions: as no one ever cared to bother.
7. While the zodiacs are fairly constant, ascendant sets do of course change.
8. Change is called precession, thus Book of Change or precession (the Aspectarian).
9. Sidereal and tropical Mars being selfsame Mars, there is no difference Ophiuchus,
10. Mars in Cetus, Orion or Ophiuchus is both sidereal and tropical at once.

PURPORT

- The 16 ascendants for the current epoch along with 22 zodiac signs duly answer to the Tarot. Less than five humans have received Tarot initiation for the past 300 years.
- The Tarot deals with more than #1008 planets of planetary spirits.
- Kalki has triune ascendant (three ascendants: Hydra, Monoceros and Canis Minor).
- We are in midst of the Aeon of Cetus II, Age of Pegasus.
- Trump era is therefore Age of Pegasus, thus markets are blooming.
- Some of the prominent zodiacal signs for this epoch are Scutum, Hydra and Auriga.

USA has been born with Serpens Cauda ascendant – comparable to rattlesnake – don't tread on.

BOOMERTIME

☹ So, zomboomers not-in-the-know served you 13 Sun-signs? Monkey zoombusiness: as only rare boomers were online back in the early '70s when zodiac & ascendant sets were finally invented as published online; 75000 publications ever since and after and boomers are no wise.

BOOMERLIVING IS EASY

If you ate what you were given, congrat yourself: you spent your boomertime living in boomerspace where completely fictitious things like 13 or even 12 “signs” welcome the less intelligent or selfsame inquisitive.

FISH ARE JUMPING

The current (*de*)generation was born with all planets and ascendant in Cetus. *De*? If you boomerlive in 13 or even 12 “signs”: you are snafu: bankruptcy, divorce, death and worse will follow.

BOOMERICA

USA has been born with Serpens Cauda ascendant – comparable to rattlesnake – don't tread on.

BOOMERIDIAN

Take time to memorize two simple numbers: 22 and 16. That will do. 22 for zodiac and 16 for ascendant set. Tarot expands to 1008 planets but that is for boomers of old. The Tarot *is* the zodiac: 22 zodiac stations, 16 ascendants (elementary permutations of the Aspectarian) |:|::| ::|::|

♋ #Fox = your ascendant <http://www.lulu.com/spotlight/astrology?searchTerms=Canis>

People can be born as predisposed to some specific and/or general illness or in fact some sort of bizarre mental oddity: e.g. at this epoch: suicide-vest kamikaze = genocidal maniacs are being born (on daily basis: each one with a different taste for a wish to kill): people don't know what they are doing since e.g. there is not a single Astrologer on the planet. Thus, for years: the most dangerous race of "humans" will be born in order to massacre further degenerations. Why do governments allow for such a degenerate race? In short: they are degenerate themselves either "out of Egypt" as leper rabble or otherwise debilitated. Why does not India stop this? Because Pluto does not enter India's traditions: apparently neither (or Nether) Prahlada Maharaj does.

<http://lulu.com/astrology> #RTRRT #1008planets #QuarterSky #ZodiacShift #CancerCure

Disturbances such as e.g. cancer and in fact all diseases can not only be predicted but also preemptively averted with RTRRT and of course Academic Zodiac. Why is that so? Because true zodiacs come from true natal stars and thus avert the evil of false zodiacs, apart from clear and present dire like aforementioned cancer. Cancer has been studied, is easily predicted even as recurring disease; as well as averted with RTRRT or some other technique whether in cOMbination or as stand-alone. Already a search for "prosperity, cure, cancer, RTRRT" and the alike on <http://lulu.com/astrology> will spread like an open invitation towards slightly different approaches to cancer prediction+cure. And you can do it yourself, and practice in advance against any occasion or recurrence and alike prevention case emergency.

<http://lulu.com/astrology> AN INTRODUCTION INTO FUTURE-CHANGING PREDICTION

PREDICT

AND

CHANGE

Paradoxically, it is easier to “explain” future-changing than predicting said futurities: albeit both operations are equally simple and fast like snapping your fingers.

EASY FUTURE-CHANGING PREDICTIONS

It takes seconds or minutes in order to change future but quite some skill in order to predict it: since we usually don't want to unnecessarily change a plausible future at all: let it be. What we usually do change is a dark event in someone's own future, like e.g. cancer which can be easily calculated and thus preemptively removed; often as quite an unnecessary karmic experience.

CORNER FLORIST, BUTCHER: SHOESHINE BOY - 20 MINUTES INITIATION FOR ALL

While prediction involves elementary arithmetic $5+6=11$ mathematical level, matrix hacking requires no mathematical operations at all: both are practicable immediately on the spot: thus shoeshine boy was able to predict death unto world renown astrologer albeit both were in disadvantage: shoeshine boy did not know he was entertaining nothing less than world's best known astrologer while said timely dead astrologer knew even less.

BENEDIXITQUE INITIATVS DOMINA NEOPHYTVM

You are ☐ ☐infected already! <http://lulu.com/astrology> has the cure ☐ ☐and ☐ ☐solution ☐ ☐for all.

- 1)You are already spreading it, know it or not: you are disease to them and vice-versa.
- 2)You don't know who or what you are: nobody does: you all are=wear faux personas.
- 3)You don't know your Sun sign that does not determine you and neither your faux ego.
- 4)You have been told that there is a “belt” wherein the planets' roller-coast within some boundaries – all merrily “following the Sun”.
- 5)But “some planets” sometimes escape this prescribed band: how so? They must be rebels, yes? Thus a term has been coined: “out of bounds” for narrow minds don't spill over. No, the bounds have not changed accordingly to cover for escapees: no one will notice. Only that the Sun does not determine zodiacs and no planet really “follows” the Sun.
- 6)So Asstrollogers are not the most stupid people on god's green Earth? What about this: a famous much as ugly idiot with apparently large follow up determined USA ascendant as Polar Star. If you are not ROFLing, you are one of them. And did you know that down under they have the selfsame foggy London skies? Once an idiot gets adamant, he serves as solid prop for many a wrecked soul and you see polar stars at east where they should be for asinine narrative to frame your miserable excuses for life, omniverse and Vanda.
- 7)OK, there is no Vanda.
- 8)Now, with “errors” ranging from 90 degrees to infinity, you are already being screwed up at your root: surely tattoo with dedicated necklace make for strong sense of personal identity.
- 9)That will not help Gemini rising at east since it has not been there since Krishna.
- 10)So in order for Gemini to rise at east you must be an idiot: (or) astrologer will do.
- 11)So, where is Gemini when your “program” miscalculates it at east? It can be seen at north. Can you imagine? 90 degrees of “error” just because of stupid greedy people who don't care

for anything else but your naive money, time and life-essence. But it is so irresistible to “feel safe” rolling along with general stupidity. They call it woke.

Know your times: **when** to invest, marry, procreate, date, divorce and even (if you insist) die! <http://lulu.com/astrology> tells you when, how and why. But you want to know how is that even possible? You are welcome to a lightweight introduction for absolute future-changing beginners. #RTRRT #1008planets #ZodiacFix #16SunSigns #AcademicZodiac #ZodiacShift

- a)How do we know the exact (minute) second optimal to buy that stock? Mostly math.
- b)While anyone can easily calculate anyone('s else's) marriage date by memory, some precise calculi require special expertise: the year (of any future or even past event) is an one-second job; even month in most instances – often the day being calculable within e.g. a minute's time; hour, minute and second do require some excellent computing.
- c)What makes such accuracy possible? The real sky does.
- d)Where do we find real sky data? NASA JPL (by direct access) and Harvard MPC – mainly. Programs as based on NASA JPL (Giorgini integration) models (such as Solex) will perform offline alright.
- e)Real sky is also beneficent in natal horoscopes. Alixe baby has Moon ascending in Cetus II (therefore Cetus ascendant), Mercury in Sextans, Venus in Orion; Juno in zodiacal Scutum (see e.g. on Venus in Scutum) and Pluto sitting on the USA ascendant in Serpens Cauda. She also has Eris in Cetus, but we all do. Our grandfathers had it in Sculptor.
- f)Now we know where the planets are. But where are they not? E.g. Pluto never enters Pisces or Aries: nobody has (or ever had) these positions. Eris never enters Taurus.
- g)Some alleged ascendants did actually rise in the past. Aries rose before Jesus Christ.
- h)Gemini rose before Krishna's own epoch.
- i)*Taurine Ascendants* – since rare - are perused in stock exchange Astrology.

j) Nowadays nobody has Aries ascendant: Aries, Gemini, Cancer, Libra, Scorpius, Sagittarius and Capricornus are not ascendants (for the present epoch): nobody you know has or can have these ascendants at all. A “cold Capricorn” ascendant is at best deep Cetus III (otherwise favorite in catastrophic UK horoscopes).

k) The techniques that enable calculation of mainly future events are called **directions**.

l) There are roughly around 555 types of directions of which we invented several as well: most formidably the Secondary Angular Direction (sometimes the word is “progression”). This specially accurate direction can e.g. direct a comet across Eris in the Aussie skies (the Aussie skies are different from e.g. London skies).

m) Precision being paramount, a BoE (centered market) horoscope can have e.g. Moon in Corvus in London, UK; but said satellite may not be seen in Corvus at all at selfsame time in Sydney, Australia. By a dint... but that is what precision is all about.

n) Also: sometimes concerning precise financial calculi: elevation or depression are important, even which floor said transaction happens in. Butterwood et al.

o) What about 13 signs? It's rather 1008, 67, 42, 22 and 16.

p) 16 ascendants (for the present epoch) have nothing much to do with 16 Sun Signs.

q) The Sun is the least important “planet” in Astrology, but useful as concern gold stocks.

r) There are basic 22 zodiacal signs. All 1008 planets have their own zodiacs.

s) 22 zodiacal signs (constellations) along with 16 ascendants make for excellent Tarot initiation.

t) Now what is RTRRT? It is (also instant) future-changing with self-healing: family healing.

u) With Eris and Pluto (minus #1008 planets) “as planets”, the horoscope signs expand to 67.

v) While future(s; futurities: in constant change) is changeable (RTRRT): it is also fixed for some.

w) The Academic Zodiac has been available online since year 1973; RTRRT since year 2005.

x) There are 45000 publications on the subject. Have a fulfilling life and afterlife with RTRRT.

#CoronaVirus portents <http://lulu.com/astrology> for 67 #horoscope and 16 #ascendant signs.

OPHIUCHUS - **Travel** is fairly safe early in the morning but stay away from people as remote as possible.

LIBRA – You get rich over the misfortune of others, especially over high family death tolls.

SERPENS CAPVT – Envision LVX – welcome white light in your life - walk natural parks – avoid car traffic.

SCVTVM – Stay safe in September, avoid toxic people with corona hoax and delay marriage.

SERPENS CAVDA – Stay away from “gay” people and queers of all kinds as they are mentally viral already.

AQVILA – Love is safe but don’t wait too far. Fly like an eagle. Keep aloof like one. Take no shit.

SAGITTARIUS – Do not fall for general pessimism and viral hoax – get up and make progress.

CAPRICORNVS – Cry her a rivulet: ocular (eye) hygiene comes first as silence is golden.

PEGASVS – Dispose of all rumors along with unnecessary stuff, especially old cell phones.

AQVARIVS – Disinfect your aura by avoiding bad people while keeping childish innocence.

CETUS – Nevertheless fasting on travel, midnight and noon seem critically contagious.

PISCES – Do not travel: not on the spur of the moment: however tempted and safe. Shout (even and particularly when scared to death): scare the living daylights out of any viral situation: let it all out. Travel is highly unfavorable (not necessarily because any viral hoax at all), especially ad-libbed; but you recover without any medicine at all. Disinfect all: mind, soul, body, spirit and surrounding. Exorcise care.

ARIES – Work normally – if (three days) ill – heal in (three) days. Enjoy prana-yama air as said virus is not airborne.

ERIDANVS – Being well above or below average people’s height: you are technically out of danger: keep your distance as ever.

TAVRVS – Safe in Venice. This as dynamic as complex analysis would take folio volumes¹.

ORION – A friend may transmit it to you – probably late at night so take precautions.

AVRIGA – Stay away from anxious people, fake refugees, illegals: you have no problems in spring.

¹ Note that Taurus is the rarest of all ascendants, challenged only by Eridanus.

MONOCEROS – Your connections enrich you and with due care you may have a lover as well.

GEMINI – Mortal twin it is. This constellation features immortal twin as well. Do not marry.

FOX – Take _{extra} care of your skin in noticing any spots or wrinkles as good health indications.

CANCER – Stay at home, repair furniture; avoid draining terrain, slippery slopes: avalanches.

SEXTANS – Stay at home with your whole family or refurbish your prep shack.

HYDRA – You are positively religiously safe in your own temple, cruise ship and Venice.

LEO – You don't need to work _(this one out) at all: you decided to sit this one out: you don't join hoax.

CORVUS – Stay away from riotous people, mob paranoia as wanted by #BigPharma #MSWin

CRATER – Your HGA Holy Guardian Angel is always with you beyond time forever in love.

VIRGO – Disinfect all. Impeccability of Ariadne and Pan: innocence with _{brahmacharya} chastity.

SCORPIVS – May be too late already but please do perform before dusk. Heart and health problems. The resent situation seems unfavorable for health, especially of musicians and commuters. Wooing nevertheless seems favorable after a period of flu. Close all doors while installing double doors where necessary. Airplane flights seem viable with precaution. large gatherings are unfavorable; gatherings of any kind: even Facebook.

Years ago, cca 2011 (ERA ERIDANI MMXI) people (meaning gamers, hip-hoppers, toddlers and the alike) “discovered” Ophiuchus. They were immediately silenced by Devil in default mind whilst whoever (a modest professor) divulged – received **death threats** by selfsame toddlers, adolescents; zombie soldiers of the inane abominable.

- a) Ophiuchus is the tallest zodiacal ascendant, Hydra being the longest one, besides Cetus.
- b) Both Cetus and Ophiuchus have been divided into three sections, as respectively vertical vs horizontal. The Moon enters Ophiuchus once only but it perchance enters Cetus thrice.
- c) These are but some simple facts that said modest professor could not know at all: if astronomers seldom notice, how could their counterparts in deep swamp? Plestered out of even default mind proper, they e.g. assign Chiron to Nostradamus in associating Italy with Notre Dame (sic) or Polar star to eastern horizon: dangerous madmen, indeed: but in the mad world – no one will ever notice as inanities amass to infinity.
- d) If one can ascribe Italy to Notre Dame and Chiron (an insignificant burnt comet) to Nostradamus, then polar stars do rise at east: if after 5000 years no one noticed Gemini was not rising at east, then nobody will ever observe north at all: why bother? It is only 90 degrees of shift.
- e) No matter observable Gemini at north, one believes Gemini is rising at east. Belief is such a strong thing. In yachting, one must believe in zephyr, clear skies and tropical romance whilst sailing Titanic unto an iceberg: such is the power of adamant belief.
- f) Blind faith is essential to superstition: one must believe that Tarot is a card deck.
- g) The 22 zodiacal stations plus 16 ascendant do indeed perfectly match the atouts plus elementary (I Ching if you like) permutations (aka court cards).

ASTROLOGY FOR DUMBOS

Everything you know about astrology is wrong.

© 2019 by Klaudio Zic <http://lulu.com/astrology> all rights reserved.

- 1._{How} wrong? As in terribly wrong, 90 degrees wrong or just 100% wrong fullstops?
2. Wrong, wrong, wrong and wrong. But what is wrong? Everything! The faux skies as postulated by whatever goes by astrology do not even exist. Never did. Nobody has ever seen 12 signs rising at east: in fact whatever rises at east forms quite another set of ascendants from those wrongly assumed as such. The Sun does not rise at east. And there never were 12 signs of the zodiac.
3. But you knew it already. They first made you think that you are sort of unique under your Sun sign – which by the way is least perused element in Astrology – then gave you not only one but several wrong Sun-signs in order to double or triple profit by selling contradiction, dichotomy and trichotomy. That is not your Sun sign, and even if it were, trash it since least important – apart from dangerous - element within any horoscope ever: moreover standing for faux ego.
4. You may sit and wait in order to see e.g. Aries rising at east. Good luck with that. Hasn't been there for quite a while. Selfsame goes for Gemini, Cancer, Libra and strung along constellations.
5. They made you think that there is an Indian or “Vedic” (as in they could not care less about Vedas or something) – even “sidereal” Mars vs “tropical” Mars: the simple truth is so obvious

that a crooked mind can not bear its simplicity: there is one Mars only (surprise!) which is both sidereal and tropical. Besides, sidereal astrology does not exist at all (apart from Academic Zodiac) whilst vomitable tropical nonsense is apex of asinine stupidity.

6. Humanity is not given to noticing things; it leans towards belief in e.g. hollow earth, average of Aquarius and flat Earth: at least 1/3rd of humanity believes Earth is flat: it is called tradition, religion thus untouchable asinine stupidity one is not supposed to touch upon: since nothing can be done in respect to masses as indoctrinated towards a wide range of plain idiocies formidably beyond wildest belief. One reason why such belief can not be changed is because it has been canonized into unchangeable (sic) dogma.

7. Luckily, the Vedas offer a rather fair as pertinent description – with mathematical-physical data - of the solar system and beyond material world – astral lokas are best explored by Prahlada Maharaj.

8. Moreover the Chinese at least had a precise cosmographic system – offering minute precision – much as the Egyptian or even Mayans did offer – and one should never forget original mankind such as aborigine Navajos, Cherokees, Hopi and many other valid cosmologies.

9. Pharaohdoxically, the only one to be terribly wrong is modern computerized man. Surely, Persians and Greek made some progress as well as mistakes.

10. Already at Krishna's own epoch, Gemini quit the ascendant, rising no more at east since. Asinine stupidity wants it ascending when it is clearly visible at north. This makes 90 degrees of error (sic) #QuarterSky or #GeminiShift

11. The scary result is that no-one you know has a Gemini ascendant.

12. The list of non-ascendants is long. No one you know has an Aries, Gemini, Cancer, Libra, Scorpius, Sagittarius or Capricornus as ascendant at all; with Taurine Ascendants being quite rare, indeed.

13. Someone assumed to be “cold Capricorn _(ascendant)” may rediscover oneself as deep _(cetacean) Cetus or even Pisces.

14. How is it even possible to obtain 90 degrees of error? One starts with mathematical model – default being NASA integration model – then distorts it for commercial purposes. There are even commercial telescopes telling you that Spica Virginia (Alpha Virgo) is in Libra.

15. How is it possible that no-one noticed Gemini shift over 5000 years or so? Inanity extends for 11000 years without any problem at all. People believe in things convenient, not real.

16. Gemini shift is – you guessed it – but one in a myriad example of general as well as pseudo-astro-nomi-logical ? Bug ? Syndrome? Glitch? How can 90 degrees even qualify as an error?

17. Someone would notice: someone would inform you. Unlikely, and even in letting a needle’s eye probability, he would be barred from approaching you. In the desperately unlikely case that he would reach you, “your own mind” would refuse to believe in science, since it pertains to the Devil (default mind, the mind of this world).

18. “And in the darkness bind them.” No need formacles: they are there for good already.

19. So what are observatories doing in this or that respect? The IAU? Formally, something; in praxis: nothing: they bar you from information: you don’t and are not supposed to ask for information at all: good pup. Mutt? Capito?

20. The result of superstition is that zodiacs in commercial gyration fail by 7 _(seven) signs.

21. The list of inanities is endless. It is e.g. easy for anyone to predict your next marriage in seconds. That requires no brains at all: year, month: day; minute-second with the help of some extra-math. The day of any event requires no brains, pen or paper at all: it is less than a minute calculus that a toddler can perform by memory whilst e.g. serving clients.

22. On occasion a shoeshine boy can accidentally predict death unto an astrologer – not knowing he is shoeshining one.

#FED rate cut <http://lulu.com/astrology> #Trump #2020shift hike Powell #ECB #Draghi #Trump2020 #RTRRT #1008planets #Ophiuchus
#Trading #NYSE #ZodiacFix #Ofiuco #ZodiacShift #QuarterSky #GeminiShift #NASA #Astrology #Astronomy #precession #FX \$VIX

- a) Chinese markets are sensitive to the longest zodiacal ascendant - Hydra.
- b) The latest grand Chinese market crash happened *as predicted* with Venus in Hydra.
- c) American markets are tested under Saturn in Ophiuchus (1929, 1987, a while ago).
- d) Huawei prospers with Venus in Scutum (2014).
- e) Markets prediction basically peruses the selfsame principles as simple marriage prediction.
- f) These principles are so simple that even *and especially* a toddler can embrace them in minutes.
- g) All these principles being laid down, the rest is mere refinement.
- h) One can e.g. predict the minute-second of a certain event - decades before it happens.
- i) Every baby can be assigned minute-second time of marriage even before it was born.
- j) Predicting and even changing the future is normal in a human being.
- k) "The King will hunt at 7 AM, bagging a tigress, three deer and 22 fowl; returns at sundown."
- l) Shao Yung e.g. predicted the exact hour that a vase - of his own purchase - will break.
- m) Predicting (by memory) the year of next marriage; even hour and minute is sheer normality.
- n) The ancients predicted from (the real visible as observable) astronomic skies.
- o) In His own epoch, Lord Krishna noticed that Gemini was ascendant no more.
- p) Gemini thus never rose at east since Lord Krishna's own epoch is not ascendant.
- q) General superstition that is based on fictitious skies can not predict anything.
- r) While real skies render minute predictions, superstition fails by over 90 degrees or years.
- s) Gemini is not there it is 90 degrees to the north - for those _{few of you} willing to look.
- t) Often a prediction requires two numbers or planets and a few seconds of simple math.
- u) At the Academic Zodiac, we delineated 1008 planets.

Sai Baba <http://lulu.com/astrology> in the Age of Pegasus #2017shift #2025shift #Avatar #Cetus

It was announced that Sai Baba, the Avatar of Truth, will return as Pegasus in the year 2017.

This already happened (sic) with Venus entering Pegasus in said year. It will return to its bullish position in the year 2025. Thus, the Age of Pegasus soars in the wake of the Aeon of Cetus II [ERA CETI SECVNDA MAXIMA MMXII] that miscalculi have an early Mayan apocalypse.

Another major bullish investment recently happened (in China) with Venus in Scutum, just before (China again). Apparently, Huawei profits from its timely investments unawares. These peaks and lows were published in abundant advance (decades before crash or bull happened as predicted) as minutely calculated. This means that the investor, trader or layman is informed to the minute second about either market crash or taurine (Taurine Ascendants) opportunity.

Venus rules major peak zodiacal areas; eras, ages and eons within the twin averages of Pisces (we head towards the second dull Piscean average), Aquarius and Capricornus. The first Age of Aquarius happens in 700 years from now, not when your local junkie tells you. Average is an alleged “age” where nothing exceptional is really bound to happen – people are as dull in the Age of Aquarius II as they will be in ERA CAPRICORNI. At present, the Sun is conjunct cetacean stars for spring equinox, thus ERA CETI. Pisces, Aquarius and Capricornus both come as twin ages, namely – here is the sequence.

Pisces I

Cetus II (AEON)

Pisces II

Aquarius I

Capricornus I

Aquarius II

Capricornus II

Namely the constellation of Aquarius enters that of Capricornus – see on turreted vs ditched planetary positions (in midst of Capricornus=Aquarius II).

Learn how to predict and change future. <http://lulu.com/astrology> Tuition guide.

You can predict and change any futurity in minutes, even seconds – by memory – like stroll in the park. All you need is already with you – with a little practice... Tips as follow...

1. Find out your true Sun-sign from the choice of 16 zodiacal positions.
2. The Sun can be in Cetus, Orion, Sextans and Ophiuchus.
3. Sai Baba and Maduro share selfsame Sun in Libra on November 23rd.
4. The Sun is in Virgo for Halloween (Witchallow) as opposed to Illuminati May Day.
5. Venus is typically in Crater, Hydra, Pegasus, Cetus, Orion, Sextans, Ophiuchus...
6. The Moon likes to span through Cetus I II II, Auriga, Fox, Corvus...
7. It takes 20 minute average in a normal person in order to learn how to predict e.g. (next) marriage/date with exceptional accuracy – year, month, day – then hour, minute, second.
8. Prediction is simple matter of e.g. subtracting a few numbers from raw data.
9. A peripatetic Astrologer walks while making predictions and so does future-changer.
10. Future-changing is often applied after accurate prediction.
11. Marriage prediction often requires two numbers only.
12. A novice can thus predict marriage unto whole village in minutes.
13. Timing marriage often involves dynamic synastry.
14. One e.g. meets a girl and automatically directions (“progresses”) horoscope(s).
15. Synastry may direct the $A+B/2$ formula in space+time.
16. Most astrology is done by memory. However in order to know minute second...
17. Next marriage (or date, etc) gets easily determined by memory up to year, month...
18. Sometimes it is hard to determine day by memory. Depends on case.

19. Some exceptional cases may be very hard to deal with.
20. E.g. Moon in the first house as opposed by all or most planets (in Cetus) square Neptune at Nadir does not bode well. 1992 QB1 at the descendant is ill omen (911 with Eris in Cetus). Of course a horoscope is rather a dynamic than “natal” thing.
21. Venus with LILIT VERA (observed Cassini Lilith) on the 5th cusp squared with Neptune 8th cusp may produce several marriages, utter dissatisfaction along with zero fealty.
22. The worst aspect in the book is not Venus square Neptune (serial betrayal) but Mars 180 Jupiter ||: :: The Marriageable Maiden (see Aspectarian and also on recent Ram X horrorscopes).
23. Directions are techniques in predictions – some 555 of them as cataloged – quite a few in normal perusal.
24. A novice will peruse primary direction.
25. No computer is needed – it would in fact thwart intelligent analysis.
26. You will not need cell phone device for this adventurery.
27. For extra-precise to-the-minute-second calculi, ephemerids are perused.
28. Ascendant, Cruithne and lunar ephemerids come handy in wedding calculi.
29. One can thus predict marriage since baby’s birth to hour-minute-second.
30. HMS is normal prediction although often the day of the event is precision enough.
31. Future-changing generally falls under #RTRRT category.
32. Sun sign is big ego, thus least important in any Astrology. Learn to ignore it.
33. You will nevertheless need Sun-sign for cardiac and gold market calculi.
34. Now you are the only one on your block, country, continent to know Sun-sign.
35. The Moon or lunar position is trickier by far and ascendant is mystery.
36. Use the search form in order to fetch solar, lunar and ascendant ephemerids.

37. Now you probably know your lunar sign and try and figure out ascendant.
38. Lunar zodiac includes Fox (Canis Minor), Auriga, Corvus, Orion, Ophiuchus...
39. E.g. Kalergi *and* Saudi boast Moon in Auriga while 911 happened under Orion auspices.
40. Simply type e.g. "Moon Orion" in the search form and you are there for good.
41. By now you probably know your solar and lunar zodiacal positions.
42. The solar zodiac has nothing much to do with the lunar one.
43. The Sun never enters Auriga or Corvus.
44. Sextans is a special solar zodiacal ascendant position e.g. with New Moon in Sextans.
45. Cetus, Orion and Ophiuchus are normal zodiacal ascendants for all planets.
46. Kalki has three (triune) ascendants: Fox, Unicorn and Hydra.
47. There are 67 horoscope signs, where we include Eris and Pluto zodiacs.
48. Every planet has its own zodiac.
49. 1008 planets have been promptly delineated.
50. As 22 and 16 are Tarot-compatible, the Tarot is the Zodiacs.
51. There are 22 zodiacal stations along with 16 ascendants.
52. **Aries, Gemini, Cancer, Libra, Scorpius, Sagittarius, Capricornus do not rise at east.**
53. Taurine ascendants are extremely rare as perused on the stock market.
54. Gemini is ninety-degrees at north when "astrological" programs miscalculate it at east.
55. Gemini has been last seen at east before Krishna's own epoch thus long long ago.
56. For thousands of years Gemini never ascended or rose at east.
57. There is no such thing as Gemini ascendant.
58. No -one you know has a "Scorpio" ascendant.
59. The ascendant of the USA is Serpens Cauda.
60. People wrongly labeled as "cold Capricorn" are in fact cetacean having Cetus ascendant.

61. We live in the AEON CETI or Age of Cetus betwixt twin Piscean eras.
62. Pisces, Aquarius and Capricornus are averages, meaning dull periods.
63. Crater, Hydra, Auriga, Eridanus, Corvus, Pegasus and Scutum mark exceptional times.
64. The Aeon of Cetus cuts Piscean era in two around year 2012.
65. 2025 marks the 7th (known) Pegasean era (ERA PEGASI) with Venus in Pegasus.
66. Venus was in Pegasus in the year #2017shift
67. Pisces, Aquarius and Capricornus are averages happen twice.
68. The Moon enters Cetus thrice.
69. Death is predicted by minute. #CancerCure #RTRRT requires seconds.
70. Divination is available in its original “ask 1008 questions” form.
71. Standard 1008 pages horoscope is classified.

Someone wrote it down for them. <http://lulu.com/astrology> #Astrology #1008planets #RTRRT

Some boring generalizer, an apex of asinine stupidity. It is called cookbooks.

They eventually memorized standard inanities that will be parroted unto your xeroxed default posterity as well in order to cripple their progress.

They equip you with faux Sun sign (no big deal), ascendant (big deal, since ascendant is guardian angel) and zodiacs that never existed in any real skies at all.

One author gloriously informs you that data are wrong but that is what people want: tradition. Then he proceeds to South Seas Bubble: you need real data for that: but said ancient author does not venture into any analyses at all. Why risk? People buy anything anyway. They are easily fooled into thinking someone actually cares.

What are standard inanities? Alas, too many to enumerate: let's take a hilarious walk through:

1)Mercury retrograde. They explain it all by Mercury retrograde. A retrograde planet is three times stronger than a direct one: like a dog barking around selfsame tree. The strong points in your horoscope are in fact retrograde planets. They stand there as statement. Idiots treat them as trash. Primitive mind has probably "retro" as something backwards, whilst completely forgetting that a so-called retrograde in fact doubles its forward push (twice). You back up, evade and kick!

2) So, Aquarius is an *airy* sign? Aqua or aquas ::|:| is an English word meaning water. It is called water-bearer but pertains to air. You must be rather inane in order to swallow such nonsense. The watery part of the skies include (Salacia in) Pegasus flying above cetacean (Cetus is one of the largest zodiacal ascendants and ruler of this Aeon) waters, Capricornus which is (clearly) watery demon, uterine faint Aries (glyph is womb), Pisces Austrinus, Eridanus (deepest zodiacal ascendant), Pisces, Aquarius...

3) When a planet enters Aquarius in midst of Capricornus it is thus called “ditched” or in the moat (as in “vs turreted”) or (as originally delineated) trapped. E.g. Brexit Moon was originally trapped (in the moat betwixt twin towers), then cetacean (in Cetus III) and so on: this ditto original prediction remaining Brexit will never happen. Or hardly, indeed.

4) 75 degrees aspect – oh come on – 108 – alleged “programs” abound with alleged aspects along with alleged houses merely for the crook to sound intellectually asinine. Semi-quadrile!

5) These “programs” are quite unable to calculate conjunction, opposition or new Moon.

6) They are unable to tell you everything so Nostradamus had semi-quintile with Chiron...

7) The list of inanities would require folio volumes the size of Alexandrian library.

8) The less they know the more self-importantly asinine they make it sound.

9) Among 1008 planets Chiron – a deprecated burnt comet of some sort as dubbed by a castrate.

10) Castrate for the castrate. Wounded healer, muahhahha... You wish. Asinine stupidity has no cure at all.

11) Perhaps the greatest mis-assumption is that the Sun somehow always rises at east.

12) The primitive mind must think omniverse is orderly circle or disk-world or pizza-cut collection of colorful “signs” which merrily work together: Capricornus which is clearly watery monster conveniently climbs into earth sign while even more clearly watery Aquarius becomes airy sign just because it fits someone's idiotic convenience – conversely the zodiac would be

determined by the Sun (the zodiac is determined by everything else but the Sun, which can be omitted from any analysis) with planets orderly following suit (they don't).

13) This is two-dimensional nonsense. Venus, the Moon and the rest (not to speak of Eris, Pluto and the 1008 planets) simply never follow any Sun at all. There is nothing like two-dimensional “orderly” solar system from cookbooks and kindergarten imagery.

14) The Sun is not in Aries for spring equinox – not that it matters much – it is in Cetus.

15) The peak of the Aeon of Cetus just happened with Jupiter and Uranus in Cetus.

16) Saying that there are 12 equal signs would be like having two or three (arch)angels only.

17) Just because you know nothing, that does not give you the right to preach.

18) Now if Greenwich has no idea of zodiacs – not even elementary lunar zodiac - or even ascendant sets – imagine Australia fancying they are on the northern hemisphere, thus entitled to parrot all the idiocies as booked by London area already: tons of trees cut in order to print crap. Unable to determine ascendant, lunar position and Sun sign, they took to writing.

19) The result is that in the Aussie idiot's “mind” the USA has Polar Star ascending at east. The best is that no one seems to notice such monolith inanities, much as nobody noticed that e.g. Gemini never rose at east for the past 7000 years. The southern skies differ from northern ones: any toddler knows this. Meaning if “astrologers” on the northern hemisphere are all mad, those in the southern one must be raving mad: and “Polar Star rising at east” proves it.

20) The astrologer will knowingly assert that the Sun is where it is surely not, then knowledgeably proceed across a well-paved parrot-path to ever-repeating daily inanities.

21) Usually they are knowledgeable of events that took place already. If they did not predict it – since they can not predict noon – then perhaps someone else did – typically Nostradamus – he didn't. He failed the year of his own death by one (year): not a bad result in a total amateur but one would expect more from an Astrologist. But taking into account that he was magus rather

than astrologer, everything is possible: also, minor errors can and do lead towards e.g. one degree of +/- shift in calculi. There are 555 types of calculi and at the time not every direction was at disposal of Nostradamus who perhaps did not dabble too much into sphere trigonometry.

22)Non-extant or ridiculously tiny planetoids have been given precedence over clearly huge frozen potatoes – rocks in outer space – the #1008planets

23)Much attention is given to degree, as if there were such thing as zero Aries or 29 Scorpius.

24)Scorpius shares one of the thinnest ecliptic crossings in the whole of the zodiac: the Sun e.g. spends six days – a week at best in Scorpius.

25)The Sun is in Virgo for Halloween. It is in Libra for Maduro's and Sai Baba's birthday November 23rd.

26)Failing to calculate ascendant is fatal in e.g. demon evocation or god-forbid invocation.

27)Surely many a medieval wannabe has produced chaos immense even in good intention.

28)An asstrolloger who does not even presume to predict is better than one who does.

29)Some crazy females tried to predict with transits and solar return!

30)While solar return is sheer inanity, transits are perused only after directions have been calculated – in fact transits *are* directions, one among 555 directions as least important of all.

<http://lulu.com/astrology> Site and Lodge(s) news. #Illuminati #NWO #Thelema #Astrology
#Horoscope #RTRRT #Magick #AcademicZodiac #1008planets #Armageddon #Apocalypse

- 1)1008 & 222 pp formats are not available - any more – namely Inner Lodge being closed as accomplished, there is no need for 1008 pages' horoscopes. Inner lodge(s) being closed, there is no need for outers; therefore 222 pages horoscopes being quite obsolete.
- 2)There is no *new* NEMO or MAGISTER TEMPLI. Kalki was the last one. Lodges are closed.
- 3)The 1008 Tarot Deck is unavailable to anyone, (ex) inner members including. No planetary sigil (out of 1008) has ever been made public.
- 4)All 555 directions have been removed from the site.
- 5)1857 (research material; PDF & media files) publications have been removed from the site.
- 6)Most adjacent sites have been \$ sudo rm -fr public_html removed.
- 7)Scribd is requested to remove all PDF s – we have been first test users.
- 8)All “social media” accounts are or are being closed.
- 9)No (further) communication or explanation is available or needed.
- 10)Go on in believing selfsame “traditional” (even in the USA? Candid white) lies you have been told over and over again while passing them unto “posterity” as “tradition” requires.
- 11)You don’t get to (go to) hell which is reserved (but) for high initiates (only).

☿ #Brexit starts with ditched Moon ☾ (people) who are of course lured, goaded as betrayed right from the very incipient start. <http://lulu.com/astrology> site guide #RTRRT #AcademicZodiac #KlaudioZic #Trading #Metals

<http://lulu.com/astrology> SITE MAPS

You will find site maps galore on the site. A note: used to be biggerⁱ, changes wiped out significant portions... Also: catalogs and services; these abound... Some things you'll hardly find: the 13 (or 12) signs rising at east – they never do; pentagrams etc. are quite futile in Instant Magick.

RTRRT

O5 or Oberon 5 (Alberon, Oberon V...) is the root of Instant Magick Real Time Reality Rendering Tools. Other popular devices are Cascade, the PCS or Personal Cosmic Secretary, Wish Wheel...

METALS

Of all commodities, metals are well spoken of from copper to platinum, palladium to silver and gold.

BREXIT

Brexit starts with ditched Moon (people) who are of course lured, goaded as betrayed right from the very start.

USA

USA has Serpens Cauda ascendant, recently hit by jovial vibes – thus legal processes galore – after it entered saturnine reptilian recession with (1929-1987-2017) ☿ Saturn in Ophiuchus.

SOUTH AMERICA AND AUSTRALIA

The southern skies completely differ from those on the northern hemisphere. Also: a corvine Moon as observed from Madrid does not necessarily equal Moon in Corvus in Buenos Aires, Argentina.

REMOTE EPOCHS

Old Egypt enjoyed vast diversity across its own eastern skies where the ascendant set presented itself variegated – almost thrice in size (and number) in comparison to the present ascendant set.

i 45000 PDF. Some 10000 were taken down in October 2011...

When #Nibiru cometh <http://lulu.com/astrology> #Mayan #Apocalypse #2025shift #Armageddon #War

Out of touch with reality ~ an essay on real skies ~ Astrology=Astronomy

Cosmic Catwalks <http://lulu.com/astrology> #Astrology #Horoscope #Ophiuchus #Astronomy

1. Year 2025 marks the reentrance of Venus into Pegasus. What does it mean?
2. Is Astrology valid in a predictive science? It is, alright; but only as astronomy proper.
3. Example: Gemini was last seen as eastern ascendant by Krishna: it never rose as ascendant since. Modern “programs” fail 90 degrees: no such thing as Gemini ascendant. You can go on and believe what you want: your alleged program is wrong: when it miscalculates Gemini at east, it is visible at north: but in order to believe, you will simply turn your head while pretending it is either impossible or preposterous, since true to the point. This effect that ruins many lives is called default mind or “tradition” - gross errors must become even larger in order for humanity to parrot upon itself on and on forever – no matter, etc...
4. Neither India nor “the West” produces adequate astrological chart output.
5. India never took notice of the precession of the ascendant sets, whilst said West is completely lost to anything even vaguely resembling Astrology proper: westerners noticed absolutely nothing, and don’t want to: superstition being lucrative sheeple food.
6. Western horrorscopes being largely offmark, we must assume that there was or even *is* at least some intelligent life even on this God-forsaken planet? In fact there is, but not where or how you’d expect at all. The most pragmatically precise predictions were made by the Chinese: e.g “The King hunts at 6 AM, returns at 16:22 bagging a tigress, three deer and 15 fowl.”
7. That said, we turn to the Egyptians whose galactic interests we can only try and fathom.

8. We are a primitive race. The allegedly Zen-like invention of the iPhone actually contributed to uniform stupidity as people spat on Steve's grave or even cursed him from said iPhone itself.
9. The Egyptians, on the other hand, had variegated versatility along with cosmic opportunity: what was fairly common to Prahlada Maharaj was cosmic catwalk as usual to them Egyptians.
10. The Mayan civilization must have been aware of e.g. Venus in Hydra: thus said priests were quite able or at least invited into prediction on global scale. Year 2025 marks the reentrance of Venus into Pegasus. What does it mean?
11. Why so-called astrology is out of touch with reality?
12. The dumbass skies are frozen: they don't understand precession at all.
13. Their ephemerides and "programs" fake a non-existent sky. This alleged sky exists in their heads only.
14. Apparently it does not matter for a human being whether one is lost – out of mark – deceived as far as everybody else is in the selfsame swamp. They like to wade together through quite unnecessary seas of excrement. They rattle parrot gossip etc, immediately picking up fake news.
15. Facts don't apply to humankind. E.g. with polar bear population growing, they lucratively passed starving bears images in order for culpable innocent children to suffer from guilt over a non-existent climate change.
16. They discharge all evil on innocent children: all kind of filth, especially on white children.
17. They never had interest in skies at all, some even ritually show their buttocks to them skies.
18. Astrology or what goes by that name was mainly mass-superstition as based on faux ego that is the wrong position of the Sun – this is alas true for east and west alike.
19. The importance of the Sun is accordingly largely exaggerated.
20. The Sun does not determine the zodiac at all.

21. The Sun does not rise at east, except from twin short instances.
22. The ecliptic does not determine precessed ascendant set.
23. There are but slight changes in the (Sun's "alignment to") ecliptic as well.
24. There is nothing, never was and never will be as "12 rising signs" in the eastern sky.
25. What you get is endless nonsensical asinine babble, since "persons" who assume to dabble in Astrology can not even predict Full Moon, equinox or noon.
26. They learn to depend on inane "programs" along with a dungheap of pseudo-astrological cookbook material: anything goes. The lured as goaded client will learn absolutely nothing since alleged astrologer could not even fathom one's own Sun sign: ascendant and lunar position being quite out of anybody's league. Client and astrologist understand each other very well as they both like to be deceived, whatever saves them from facing their existential void.
27. Various "systems" that more or less reflect mathematical imperfections were imposed upon the unsuspecting human average: thus e.g. "house systems" would break at Oslo's latitude already.
28. The Cartesian house system operates in outer space, alien solar systems, above Himalayas, comets, under some alien ocean, within the Marianna depths as well as in your Oslo bedroom.
29. At least 1/3rd of "humanity believes" Earth to be flat. No iPhone will help here since evil and genocide have easily been extolled as "religion". One does not need a manual in order to stab around and yet, having your blood on their hand as prescribed gives legitimacy to slaughter since and before Jericho: all according to holy tradition: harlot and spies kept safe: even extolled as root of a messianic dynastree alleged.
30. What can you do with people who traditionally believe this or that? Nothing would be as cautious as pragmatic answer: there is nothing to do: at least 1/3rd of humanity is dangerous to the rest who is sometimes even worse-off for whatever unreason among many. There will be no

more deluge? Who knows? All those alleged prophets in predicting absolutely nothing nevertheless enforced a day of omniversal rage |::|| which as Nibiru comes unexpectedly thus unpredicted; predicting the unpredictable being business as usual.

Q: So, what about the age of Aquarius?

A: Ah that happened long ago.

Q: Ago?

A: Hippies, that kind of stuff.

Q: They say it will happen in 700 years.

A: They don't know.

Q: They are astronomers.

A: They attended no Woodstock.

Q: NASA says.

A: Those ABC gangs know nothing. Earth is flat.

Q: Is Earth flat?

A: Probably: what's it to you?

Q: ?

A: I mean who cares?

Q: ?

A: Ask your astrologer.

Q: I am one. (I invented the zodiac). <http://lulu.com/astrology>

A: Why ask?

Q: Why not?

A: Yeah, whatever.

#GeminiShift <http://lulu.com/astrology> #ZodiacShift #ZodiacFix #AcademicZodiac
#KlaudioZic #NASA #Astronomy #precession #16ascendants #1008planets #16SunSigns

Disoriented means without east – eastless – not knowing where east is. So-called astrologers not only fail at Sun-sign – which is fairly irrelevant by the way – but also at ascendant: the zodiac as they imagine does not of course exist at all and it surely never rose at east.

Gemini never rose at east since Krishna's own epoch and yet they insist that it does. So when Gemini is clearly seen at north, they pretend to “calculate” it at east.

Nobody really observed orient – thus oriented oneself for the past 7000 years or so. Nowadays they don't even vigil at the telescope since all stuff got automated. The few who do don't care about horizon at all.

Superstition being about profit, they not only don't know but also don't want to. One sincere professor but mentioned Ophiuchus and was lynched online.

Amazingly, they don't want to predict markets either, so things like 1929 or 1987 with Saturn in Ophiuchus (at USA ascendant Serpens Cauda) happen now. Not unlike UK, the USA never had one single astrologer; otherwise they would know their own ascendant, which they don't.

By the way, neither Scorpius nor Sagittarius ever rose at east for the past 500 years or so. Go figure. Or don't. Your fate is not in your hands, so why bother?

Basic #Astrology <http://lulu.com/astrology> Real Natal and Actual Skies #AcademicZodiac

- 1) Astrology is prediction as we can all calculate lives by memory: marriage, kids, stock market...
- 2) The Sun standing for faux ego is useful merely in cardiac and gold market calculi.
- 3) Analysis starts and often ends in minutes as e.g. next marriage (timing: a frequent issue, or divorce) is readily visible from the horoscope. Often we need but raw data such as two or three planets only in order to determine romance timing, parenting, divorce, death, #CancerCure...
- 4) Any toddler can learn how to and immediately as accurately predict any events in less than 20 minutes. While “astrologers” can’t even tell their own Sun-sign (to which they attach ridiculous self-importance) in the real world: florist, butcher and shoeshine boy divine for their customers while serving them.
- 5) Said customer will be served with e.g. next marriage (or romantic) date in seconds.
- 6) Most peripatetic Astrology is performed by memory (by heart) meaning while strolling around – typically in crossing the bridges of Venice, both in formal and informal intercourse with neophyte.
- 7) Prediction can assist Future-Changing initiation as both essentially require minutes or hours.
- 8) Even an idiot (provenly) can learn how to predict in half-an-hour. If one is fairly satisfied with year, month and approximately even day of forthcoming (or past) event, no further elaboration is needed. By elaboration we mean hour, minute and second of said event; as e.g. checked with Cruithne, lunar or ascendant ephemerids. To be noted that “astrologers” have no idea of ascendant or lunar positions – axillary Earth moons including. Precise timing can even be done with the help of Eris or Pluto (as a matter of fact all 1008 planets cooperate towards

minute result): an example would be a marriage as predicted to the minute – 5 years ahead of the event – we received a telephone call and recalled it was Pluto that gave us precise timing.

9)The only ones quite unable to predict are “astrologers” - self-important low-intelligence parrots.

10)Parrots will parrot anything, providing it's simple enough – like omniverse is simple; Prahlada Maharaj. But parrots do think. Astrologers don't. They can't. Nothing to think with.

11)An example. One trusted thus dangerous fool has “determined” that the ascendant of the USA is the polar star. The polar star never rises at east, but these people don't know such elementary things. Apparently their own public knows even less. Oh, and by the way: they “think” that Sydney, Australia is London as there are no hemispheres or Tucana in “Australian astrology”.

12)No Pavo for USA FED Eris. Tucana, Chameleon and Musca thus being banned from Aussie skies, the blind who lead the blind can parrot Greenwich which knows nothing of zodiacs itself: or worse – some cookbook that says nothing thus never disturbs anyone. No car crash, divorce or abortion within those cookbooks – just pleasant lullabies of nothing to say at all.

13)There are 555 directions.

14)Directions are predictive methods, mainly sphere trigonometry formulae as perused in accurate prediction, where minute-second means what it says. Marriage is e.g. predicted to minute second a decade before it happens or right from incipient natal data of a new born baby.

Is your ☼ Sun in ♋ #Cetus ♊ #Sextans ♈ #Orion or ♏ #Ophiuchus? <http://lulu.com/astrology>

Basic #Astrology <http://lulu.com/astrology> for the beginner #Tarot #1008planets #2025shift

- 1)There are 22 zodiacal signs.
- 2)There are 16 ascendants.
- 3)The 22 zodiacal and 16 ascending signs are compatible with the Tarot and I Ching.
- 4)There are 67 horoscope signs.
- 5)There are 1008 delineated planets within your own daily horoscope.
- 6)There are 16 Sun signs.
- 7)Not knowing your own Sun-sign is good for you, since it represents faux ego.
- 8)Sun-signs are helpful only as concern gold market analysis and cardiac arrest.
- 9)“Astrologers” have absolutely no idea of Sun-signs, ascendants, lunar positions or zodiacs.
- 10)These raksasa demons superimpose their own misery upon the needy – you.
- 11)Knowing your ascendant, lunar sign and cardinal points is rather vital *in* most cases.
- 12)The ascendant is usually called (main) guardian angel (HGA).
- 13)Ascendants are observable at east. E.g. Gemini is never eastern at all.
- 14)All Earth moons are important in analyses: starting from Cruithne (as presently ascending in zodiacal Cetus

HISTORICAL ZODIACS <http://lulu.com/astrology>

There are two types: pre-Academic Zodiac and ex-working versions of said Scientific Zodiac.

There were innumerable working versions namely N1, M, R, G, P1, N2, X, P2 and so on; where e.g. N stands for Neptunian, P Plutonian, X for Erisianⁱ, M magnetic, G galactic or galax and so forth.

The predecessors of this zodiac or *zodiacs* do not exist albeit glorious efforts pertain to galactic Egyptian mysteries, the Chinese stellar research, Navajo wisdom and probably Mayan priests.

Nechepso, Enoch, Petosiris (not to speak of Hypatia, Ptolemy or even Nostradamus) had a rather vague idea of the zodiac – at best a philosophic one.

A few brave astronomers attempted at defining the zodiac, screening their research from the academic world, in shame perhaps. These attempts – however glorious – sunk into oblivion.

Albeit publicly having astrology as topic, the IAU is quite disinterested in zodiacs: all men are as humanity can barely fake a yawning interest at anything truly important.

Gemini rose at east before Krishna's own epoch, meaning it was never seen at east for thousands of years. Bo today the error that is discrepancy betwixt popular superstition and real skies is 90 degrees or more. Thus, when your program says Gemini eastern (faux ascendant),

look towards north in order to observe it there. But you will not do it since humanity never kept check on stellar positions since Egyptian horoskopein.

With thrice the number of eastern ascendants, the Egyptian civilization kept variegated approach to galactic missions, much as Prahlada Maharaj would like them to. Sadly, an occasional royal synastry appeared to be vague around 38000 BC as there must have been differences betwixt inner therefore occult priesthood and mere royal diviners.

- i Discordian. Eris holds record in Terabytes as concern (still available) research material with early delineation. All 1008 planets were promptly delineated before their own naming (designation).

#Financial #Zodiac <http://lulu.com/astrology> #2020shift #Politics

- (a) Saturn is in Ophiuchus 1929-1987-present. USA ascendant is Serpens Cauda.
- (b) Chinese market crash happens with *Venus in Hydra* – to the minute second.
- (c) Taurus is most rare as auspicious in an ascendant. See on *Taurine Ascendants*.
- (d) The BoE – Bank of England – has Moon in Corvus – see on *Corvine Moons*.
- (e) Venus is in Pegasus 2017-2025 thus *Age of Pegasus*.
- (f) Profit from early 2014 investments due to bullish *Venus in Scutum*.
- (g) Financial cornucopiae miracles happen with *Venus in Crater*.

👤 Welcome to <http://lulu.com/astrology> |::||| What can 👁 you 👁 snoop 🧐 here? #2020shift

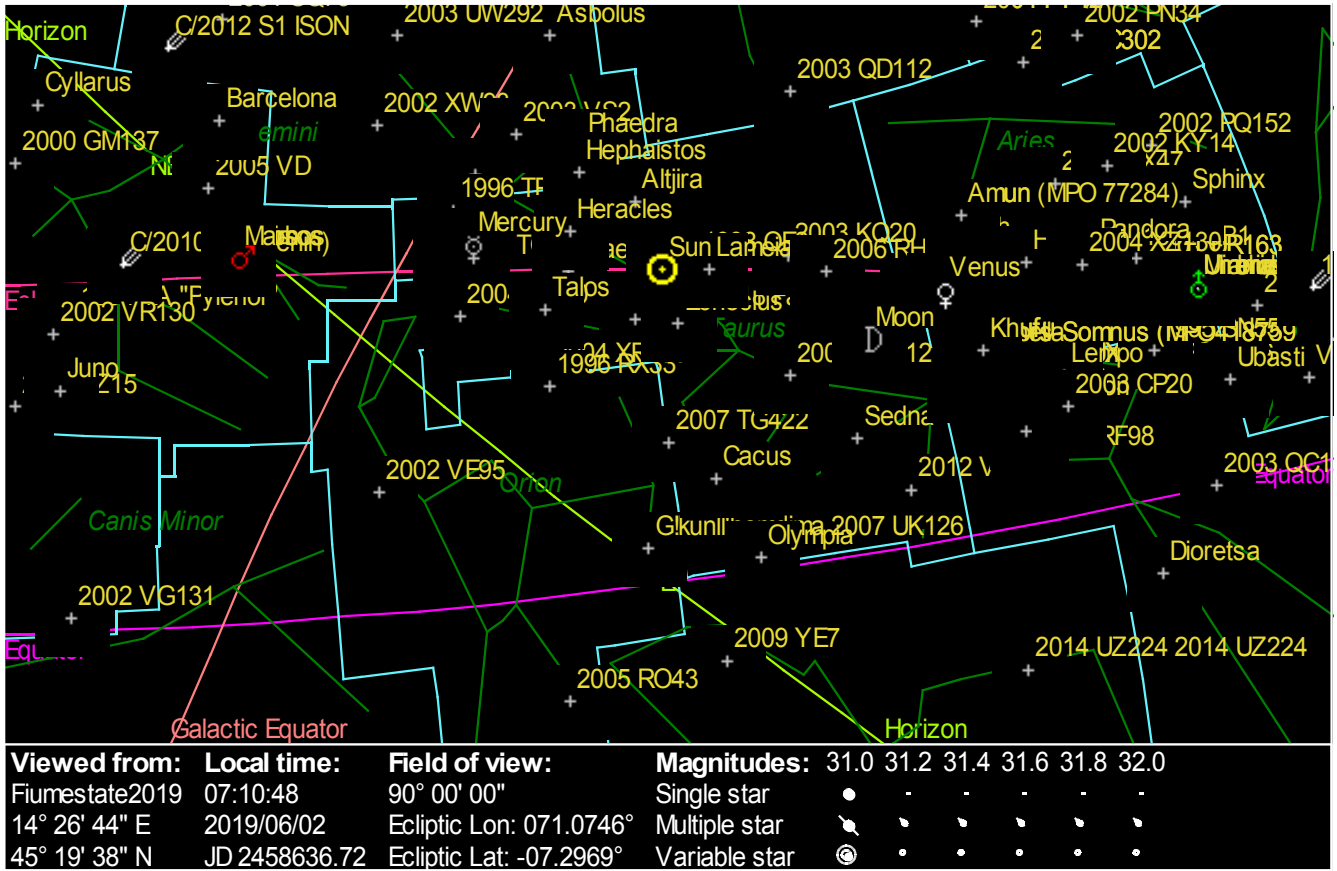

- (a) 16 ascendants.
- (b) 1008 planets.
- (c) 22 zodiacal signs.
- (d) 67 horoscope signs.
- (e) 16 Sun-signs.

CARDINAL SIGNS

- a) Signs don't exist.
- b) What is visible *thus observable* as accountable are constellations.
- c) Signs are purely fictitious partitioning of an imagined diskworld.
- d) Since they are **not there**, people easily “believe” in e.g. Gemini ascendant.
- e) Gemini is in fact visible **at north** when your “program” wants it at east.
- f) Nobody noticed 90 degrees of “error” because they are all “believers”.
- g) Aries has nothing to account for since there is no such thing as zero Aries.
- h) The Sun is in Cetus for spring equinox.
- i) Planets and the Moon are in Cetus as we write this on Illuminati May Day.
- j) Cruithne is with our primary Moon in Cetus.
- k) Aries does not rise at east and neither Libra does.
- l) Capricornus does not rise at east and nether Cancer does.
- m) None of the so-called “cardinal” constellations has anything cardinal.
- n) The cardinal constellations are not even ascendants.
- o) No one you know has a cardinal ascendant.
- p) There is no such thing as cold (since watery?) Capricornus ascendant.
- q) Said alleged Capricornus will at best turn out to be cetacean (Cetus).
- r) People get bullied for capricornian coldness on account of superstition.
- s) Entertainers vomiting rivers of nonsense could not even guess their own Sun-sign given 13 attempts.
- t) The zodiac is a complex three-dimensional affair.
- u) The Sun has nothing (much) to do with the zodiac or planetary zodiacs.
- v) E.g. the Sun does not enter Auriga, the Moon does.
- w) Thus Auriga (and Corvus) is/are part of the lunar zodiac.
- x) Every planet has its own (planetary) zodiac.

ACCADEMIA COSMOGRAFICA DEGLI ARGONAUTI

We invented the ^{Academic} Zodiac; ^{founded LONDONIVM,} while changing your own future forever. #RTRRT

Copyright © 2019 by Klaudio Zic <http://lulu.com/astrology> all rights reserved.

ACADEMIC ZODIAC RTRRT

Getting to know one's own ***TRUE* Sun-sign** is mostly irrelevant, but **ascendant and lunar** positions do determine your life. As errors made by popular entertaining industry stretch far beyond **90 degrees** #QuarterSky exposing miscalculi as demoniac attack on your true identity: original natal skies hosting your personal angel guardians and more. <http://lulu.com/astrology>

- a) Maduro *and* Sai Baba do share selfsame Sun-sign, namely the Sun is (still) in **Libra** (sic) on **November 23rd** (every year+-).
- b) If that comes as a bit of surprise, what about Sun in Virgo for Halloween?
- c) You heard about (Jupiter being presently in) Ophiuchus but how about Sun in Orion, Sextans or Cetus?
- d) Entertainment industry misses your zodiacal signs by up to seven (7) "signs or more.
- e) Gemini was last seen at east by Lord Krishna: it never rose as eastern ascendant since.
- f) "Programs" that (deliberately) miscalculate "Gemini ascendant" at east have nothing to do with your natal or any skies at all. Gemini is in fact clearly visible **at north** when said "programs" want them at east. Humanity was never interested in observation. Horoskopein means one who observes east. Ever since the decline of great civilizations, the primitive hunted down the naturally intelligent. The Navajo zodiac e.g. is spotless since primitive peoples never learned how *or why* to prevaricate.
- g) White man is OK with over 90 degrees of error since modern whites and alas Hindus or even Chinese are run on default mind.

- h) Modern whites rely on technology, so when they see e.g, a full Moon rising over the horizon, they check. Any tablet app will do. They then deduce that an already visible Moon will rise in half an hour. Nautili, desert squirrels or so-called primitive Indians rely on common sense. Animals, flora or original peoples have no need to distort things out of shape, thus their predictions are exact as reflected even by their observable physical shape: nautilus being but an example.
- i) The USA ascendant being Serpens Cauda, it responds to saturnine influences there. 1929 and 1987 (much as now) are but some of the most prominent examples of excellent prediction in financial context.
- j) Often a self-proclaimed or popular “prophet” making vague statements lacking accurate description, location and timing is at best talented raconteur.
- k) The latest e.g. Chinese market crash was calculated as published a decade in advance given the entrance of Venus into Hydra. Said event was of course predicted as it occurred to minute second.

#ReverseZodiac #1008planets #ZodiacShift #ZodiacFix #GeminiShift #AcademicZodiac #FX

a)After delineating #1008planets, establishing omniversal Cartesian house system and publishing ascendant sets for various epoch of interest, one can only return to the very basics; only to find out that default mind never changed an iota.

b)Well, that was expected: stupid being lucrative, people are being served faux (but plausible) ascendants and Sun signs by other people who could not predict noon but know how to parrot nonsensei AD NAVSEAM.

c)As always, the majority is wrong: in our case it has been terribly wrong for the past 11000 years and no one noticed. Of course, at the incipient, only qualified shamans (skryers, Prahlada Maharaj, Enoch, Petosiris, Hypatia, Indra, Nechepso, priests, astronomers, diviners, astronomers, mathematicians, wise men, rishi, guru, angels, prophets, geometers) dealt with planetary positions. Later on, everybody did. They would find e.g. an old ephemeris (make it “steal” in an euphemism) – sell it on the market – and it kept telling the wrong positions ever after – since positions change – even the position of the Sun changes.

d)Last year’s lunar ephemerids are not this year’s at all. Ditto not even the Sun may be in Cetus II for spring equinox as we dive into the second Piscean average.

e)Average being dull in an uninteresting period, we designate twin averages as Pisces I & II, Aquarius I & II and Capricornus I & II.

f)The interesting (also most *indicative* whether *as bullish* or **bearish**) ages, eras and/or aeons; however, pertain to zodiacal Cetus I, II & III (e.g. present Aeon of Cetus II), Crater (like in Parzeval’s quest for the Holy Grail), Coma Berenices (P2 Zodiac), Serpens Caput (Niku Apocalypse now), Hydra (Chinese market crash, Antichrist, Palden Dorje), Scutum (Huawei),

Pegasus, Taurine Ascendants, Eridanus, Auriga, Corvus, Serpens Cauda, Aquarius, Delphinus, Equuleus, Bootes... and so on – even in including such delicacies as Pavo (FED), Camelopardalis or Tucana (Aussie trading tips).

#GeminiShift <http://lulu.com/astrology> #ILLVMINATI #ZodiacFix #AcademicZodiac #1008planets
#ZodiacShift #QuarterSky #NWO #22odiac #16ascendants #RTRRT #Trading #16SunSigns #16suns

1)111 stands for NEMO, MAGISTER TEMPLI, ox-goaded, ox-god AL speaks, samadhi, lack of default-mind (one minus “the mind of the world”), ILLVMINATI... therefore initiation as often misunderstood by a Tarot “card” dubbed “the Fool”...

2)The real fool (raving madman) is default mind, the mind of the world: a blind program as enforced – even in “education”. EX DVCIS is quite the opposite of doing what you were told.

3)Or thinking that you *do* the thinking which you definitively do not: people do what they are told, nothing else even not seldom so. Scholion: there is no chance that you actually come to terms with your own mind which will be occulted for ever from you as also everybody else.

4)IS it you that does the thinking? Try and switch it off. In driving car, one can stop it at will, yes? It proves one is in control of said vehicle. But you are not in any control of “your own” mind: you can’t stop it. You would not even “think” or want to stop it because it does not want you and is not yours at all. What you experience as mind is a collective install. Installation is of course forcibly done at an early (even prenatal) stage. From then (age three is rapidly condescending to two, one, zero and minus) on, default mind will think itself, giving “you” (not even the real you, got it?) the impression that it is “you” that does the thinking; where there is no you and surely no thinking at all, mere apparently random carousel, looping algorithm: cell.

5)Man can not access one’s own original mind. People don’t even know that they have (or had; meaning some 11000 year ago under the sea along with the Marici if lucky enough: the proper word is not “have” at all) one. Because they do not have one. People don’t even get to be informed that they don;t have any mind at all. Of course, default mind will tell you this is preposterous, impossible and soothe into your assigned cell, mind-shackles that collective one-mind-ofr all is. You will sleep and forget about this in seconds. Giving it too much propaganda

would not be demoniac: we don't want martyrs to tell us where stars are: after all, at last 1/3rd of “humanity” has this planet flat by default, yes? They simply peruse one as perused by all. Proofs abound. How does default mind deal with proofs?

6)Default mind is skipper: it simply skips over inconvenient: go away, you do not exist.

7)To think is dangerous. No one does. One adjusts as to think like everybody else. One shall never think or get to do any independent motion at all: default mind does not allow for independence. Many proofs today: social media censorship, Assange, algorithms, people banned from apparently having a diverse opinion, espionage; after Internet was replaced with Google, everything went contrary to moral norm.

8)If by “think” we refer to accessing chosen noumena within The Sairon Eidolon, then there you have it. Good provisional definition as any.

9)For now we referred to (in lack of better expressions) independent thinking. But what does NEMO do? NEMO does nothing, being no-one, an illuminated one – Tao itself, non-dual.

10)Try and think not for a sec. Not so easy, but anglers and Zen “people” do succeed in it.

11)Non-thinking is the gateway to original mind, which has nothing to do with cheap catalogs.

12)Binary catalogs, in fact. Dos and do-nots. Nuts and donuts. What is and what is not.

13)What is is Gemini as observable at north when (your fellow) madmen fancy it at east.

14)“Humanity” is so raving mad that no one noticed Gemini was never rising at east since Krishna’s own time: they are so good at pretending that they will never look.

15)You can point at 90 degree of difference but default mind will generously skip over any controversy, along with clear and present proofs, even eyesight itself, in order to return to default slavery: a “safe” cell for everyone.

#Astrology for beginners <http://lulu.com/astrology> #Ophiuchus #16SunSigns #Ofiuco
#16ascendants

- 1.Ophiuchus is a zodiacal ascendant. Jupiter is e.g. ascending at east in Ophiuchus right now.
- 2.If you want to know your own horoscope, astrology = future and thus avert/change any bad events while implementing desirable futurities, do the following.
- 3.Forget “12” people. 12 ascendants “zodiac signs” don’t exist, never did and never will.
- 4.That done, let us recoil at basics. In order to predict in minutes: all you require is a few planets (Sun as omitted by default) and some basic math like $\pm/2$ (arithmetics).
- 5.As you will instantly see for yourself, only an idiot would require a computer in order to determine e.g. next marriage day. (And quite some may be even incapable of computing such easy calculi as these).
- 6.Dating, marriage and parenting being the simplest of all calculi, you will often need two numbers (that is planets) only as involved in simple 1st grade math (that is if you are illiterate by age 6). Notably, a 3-year old infant can predict your next marriage (year, month and even day).
- 7.Get the basics from the site <http://lulu.com/astrology> e.g. “20 Minutes Astrology”...

22 zodiac signs <http://lulu.com/astrology>

16 ascendants

67 horoscope signs

1008 planets

16 Sun signs

Cartesian house system

RTRRT future-changing

PURPORT AND SCHOLIA

22

There are 22 zodiacal stations, also known as the Academic Zodiac; which is the sum of all main planetary zodiacs plus lunar.

16

At the current epoch, we observe 16 ascendants rising at east.

CAVEAT

These constellations are not ascendants, e.g. Gemini has not been rising at east since Krishna: Aries, Gemini, Cancer, Libra, Scorpius, Sagittarius and Capricornus are not ascendants. For (rare) Taurus see on Taurine Ascendants.

67

Eris brings in new constellations much more than Pluto ever did.

1008

We promptly delineated 1008 planets since their incipient finding and designation.

16 BIS

Planets normally cross through zodiacal ascendants Cetus, Orion, Sextans and Ophiuchus.

HOUSE SYSTEM

As tested across omniverse. Works everywhere; including comets, under some alien ocean or above Himalayas.

INSTANT MAGICK

Ditto; O5, PCS, Cascade, Wish Wheel...

666 Heil #Hydra <http://lulu.com/astrology> #RTRRT #1008planets #AcademicZodiac #16ascendants
#Thelema #magick #Masonry #Illuminati #NWO #Gamer #ritual #ObamaCare #CancerCure #FX

1.666 self-proclaimed magus played along with his own ascendant in Cairo 1904 or so he thought. At the time, there was no one capable or willing to calculate ascendant unto anyone else, people (and baby-Masons) being obsessed with an inextant set of 12.

2.The asinine do extend diplomas unto more or less equally asinine. Prior to Cefalu', 666 got his own from the dictator (on MI5 payroll), in Florence; therefore near to Masonic capital, Pistoia.

3.Crowley's natal ascendant being Hydra, he emulated an alleged evocation, if not invocation of ditto a bis alleged guardian angel under the dubious if not fatal auspices of Alphard, the darkened heart of the solitary snake. In other words, he – much as humanity at large – had not even faint an idea what he was doing. The blundered not only leads the blunderer, he also teaches. He who does not know – teacheth.

4.One is free pacing around and along one's own cage, but not too free especially around the borders as one may stir or provoke other gamers just like him.

5.Said cage is not his own at all: it is granted on leasing, hired – temporarily assigned at a cost.

6.The cost is life or what remains of it.

7.Caricornus is a watery monster that precedes the water-bearer in the watery part of the sky which includes Piscis Austrinus, Cetus, (little faint) uterine Aries along with ditto Aquarius.

8.Crowley extolled Capricornus extending it to Himalayan heights on account of said clearly watery elementary demon representing earthly auspices.

9.Neighboring water-bearer assumed airy auspices. In terms of asinine, we are speaking of Oxford grade of asininity – learned fools who actually paid dearly for their schooling plus 40000 quids for Water-bearer to be airy.

10. The question all along is: can it possibly get more asinine (than that)? Yes we can.

67 #horoscope signs <http://lulu.com/astrology> #16SunSigns #1008planets #16ascendants

1)The number of horoscope signs is 67.

2)Aries is not an ascendant: you know no-one having this ascendant. Gemini is not an ascendant. Krishna already never saw Gemini rising at east. It has not been ascending at east since. Thus, Gemini ascendant is hoax. It's a stupidity.

3)**Aries, Gemini, Cancer, Libra, Scorpius, Sagittarius and Capricornus are *not* ascendants.**

4)There are 16 solar positions. #16SunSigns

5)The zodiac is not determined by the Sun only (or at all): it was determined without solar positions which are included in planetary zodiacs anyway.

6)You may "believe" in 12 signs rising at east: they are not (there; at all).

7)The omniversal Cartesian house system has been tested in outer space. Normal house systems crash already below Oslo, Norway. We landed horoscopes on comets, asteroids and alien solar systems. Horoscopes work under an alien sea much as over Lhasa, Tibet.

8)The number of ascendants for the current epoch is 16. #16ascendants

9)12 (13) ascendants being hoax, we invite anyone to prove that Gemini is rising at east, since it will be seen at north when the "program" shows it "at east" #QuarterSky #GeminiShift #precession

10)Of course – superstition counts on #sheeple, not proofs. Crooks don't have to prove anything or god-forbid calculate. Soothing nonsensei won't help said asstrolloger who will (unless he/she is on our calculated list) "unexpectedly die": his peers will at best "send Reiki" and prayers.

11)Nothing stops superstition (in default mind) since it does not depend on observable skies, rational data or scientific proof: just low IQ or distraction at least: as people don;t usually have time to investigate themselves at all.

12)Investigate? Any Boy Scout had the opportunity to observe glorious (and huge!) Orion rising at east. Anyone would conclude that Orion is eastern ascendant: yes?

13)Default mind (is superstition plus reverse hard guano pyramid apex of the asinine) stops inspection. The voladero does not want you to inspect. You have no time for it.

14)You can learn how to predict in 20 minutes but you don't have time (or arithmetics) for such a simple asset.

15)How does one predict? Basic math. By memory.

16)An event (typically next marriage) is easily predicted as to year, month and even day.

17)Secondary angular direction, Earth moons' ephemerids, minute lunar ephemerids, ascendant ephemerids are some of the tools enabling to minute-second prediction.

18)Want to know when your new born baby will marry – to-the-minute? Done.

#CoronaVirus portents <http://lulu.com/astrology> for 67 #horoscope and 16 #ascendant signs.

OPHIUCHUS - **Travel** is fairly safe early in the morning but stay away from people as remote as possible.

ORION – A friend may transmit it to you – probably late at night so take precautions.

CETUS – Nevertheless fasting on travel, midnight and noon seem critically contagious.

SEXTANS – Stay at home with your whole family or refurbish your prep shack.

AVRIGA – Stay away from anxious people, fake refugees, illegals: you have no problems in spring.

MONOCEROS – Your connections enrich you and with due care you may have a lover as well.

FOX – Take extra care of your skin in noticing any spots or wrinkles as good health indications.

HYDRA – You are positively religiously safe in your own temple, cruise ship and Venice.

LEO – You don't need to work (this one out) at all: you decided to sit this one out: you don't join hoax.

CORVUS – Stay away from riotous people, mob paranoia as wanted by #BigPharma #MSWin

CRATER – Your HGA Holy Guardian Angel is always with you beyond time forever in love.

VIRGO – Disinfect all. Impeccability of Ariadne and Pan: innocence with brahmacharya chastity.

SERPENS CAPVT – Envision LVX – welcome white light in your life - walk natural parks – avoid car traffic.

SCVTVM – Stay safe in September, avoid toxic people with corona hoax and delay marriage.

SERPENS CAVDA – Stay away from “gay” people and queers of all kinds as they are mentally viral already.

AQVILA – Love is safe but don't wait too far. Fly like an eagle. Keep aloof like one. Take no shit.

SAGITTARIUS – Do not fall for general pessimism and viral hoax – get up and make progress.

CAPRICORNVS – Cry her a rivulet: ocular (eye) hygiene comes first as silence is golden.

PEGASVS – Dispose of all rumors along with unnecessary stuff, especially old cell phones.

AQVARIVS – Disinfect your aura by avoiding bad people while keeping childish innocence.

ARIES – Work normally – if (three days) ill – heal in (three) days. Enjoy prana-yama air as said virus is not airborne.

ERIDANVS – Being well above or below average people's height: you are technically out of danger: keep your distance as ever.

#CoronaVirus #Astrology of your respiratory system. So it appears that due to having “ascendant Gemini”; your lung problems – but you have none – could go **viral**?

Relax.

There is a **real sky** out there as uninfected by superstitious stupidity.

Gemini has not been seen across the eastern horizon since Krishna: no one you’d ever know has Gemini ascendant at all. That woman is doing pranayama and thus picked northern immortal Gemini star by sheer instinct: the one in trouble is “astrologer”.

Northern? Not eastern? Yes. Astrologers being extra low IQ superstitious copycats never noticed that Gemini shines 90 degrees from where their idiotic “programs” show it. And the gap is getting larger, so don't bother at all: they are already #QuarterSky away from any skies.

When you look at the skies, you don't see zodiacs; but in fact every planet has its own.

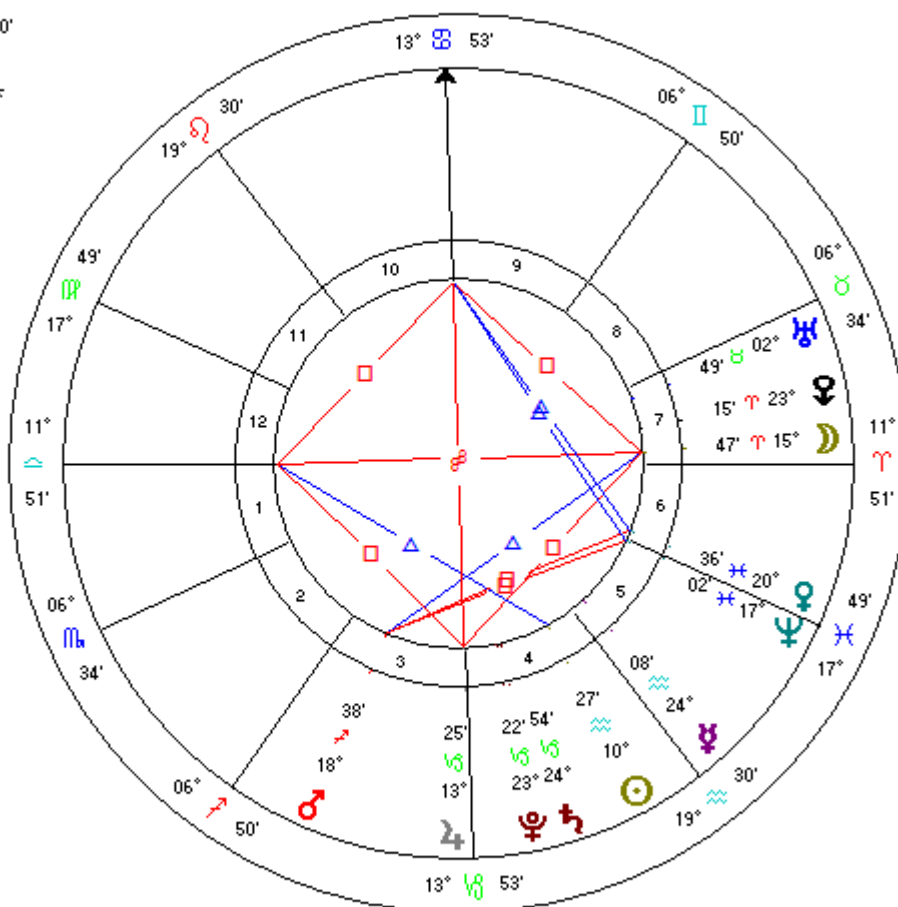

Thus, there are <http://lulu.com/astrology> as many #zodiac as #1008planets

#CoronaVirusItalia deliberately adamantly joyously enforced with gusto as powered by the local globaleft PD party.

Amazingly “0 Aries” - something that of course does not exist at all – allegedly rising.

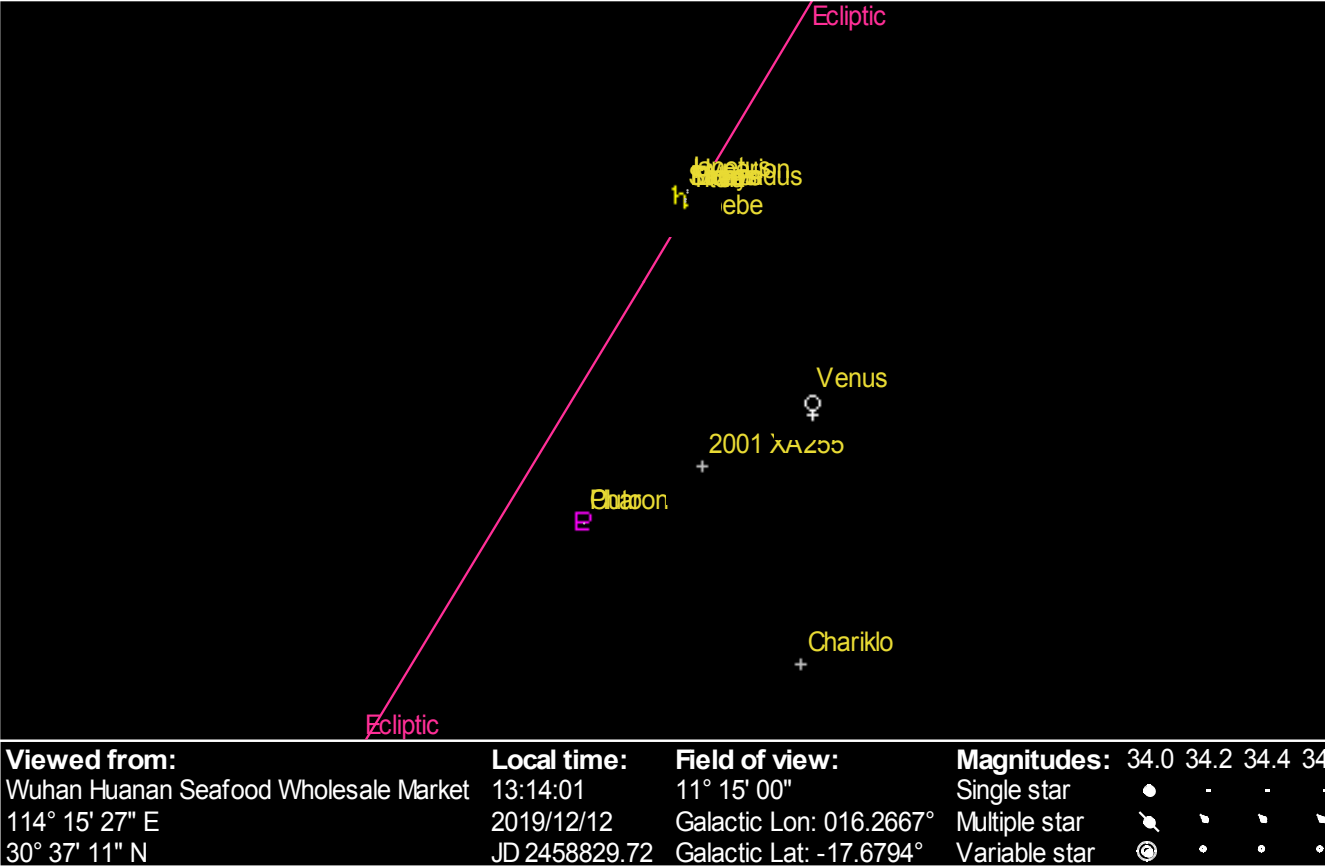

13:00:31

Even timing is impeccably symbolic. AL=31 ox & ox-goad: goading people like lab cattle.

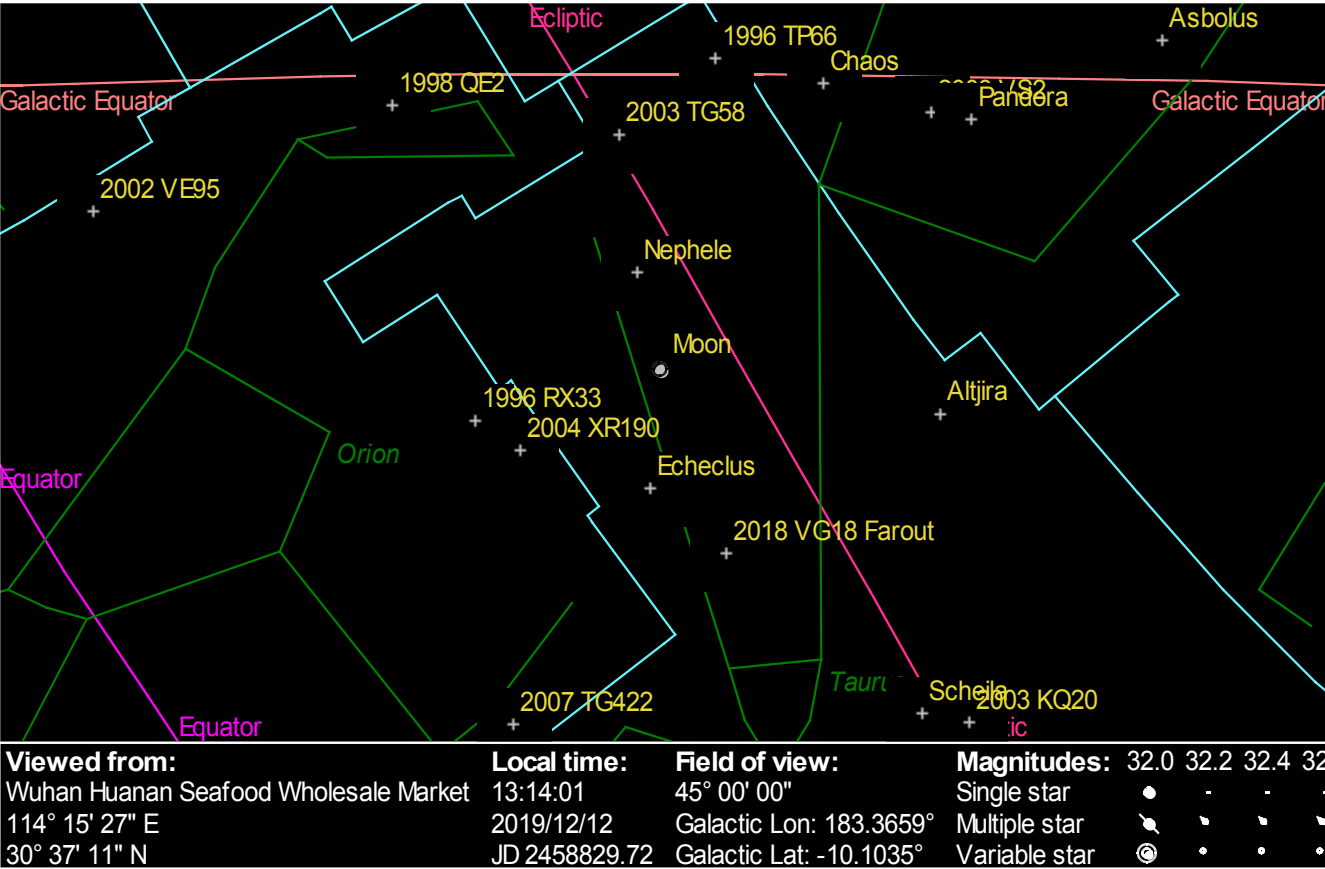

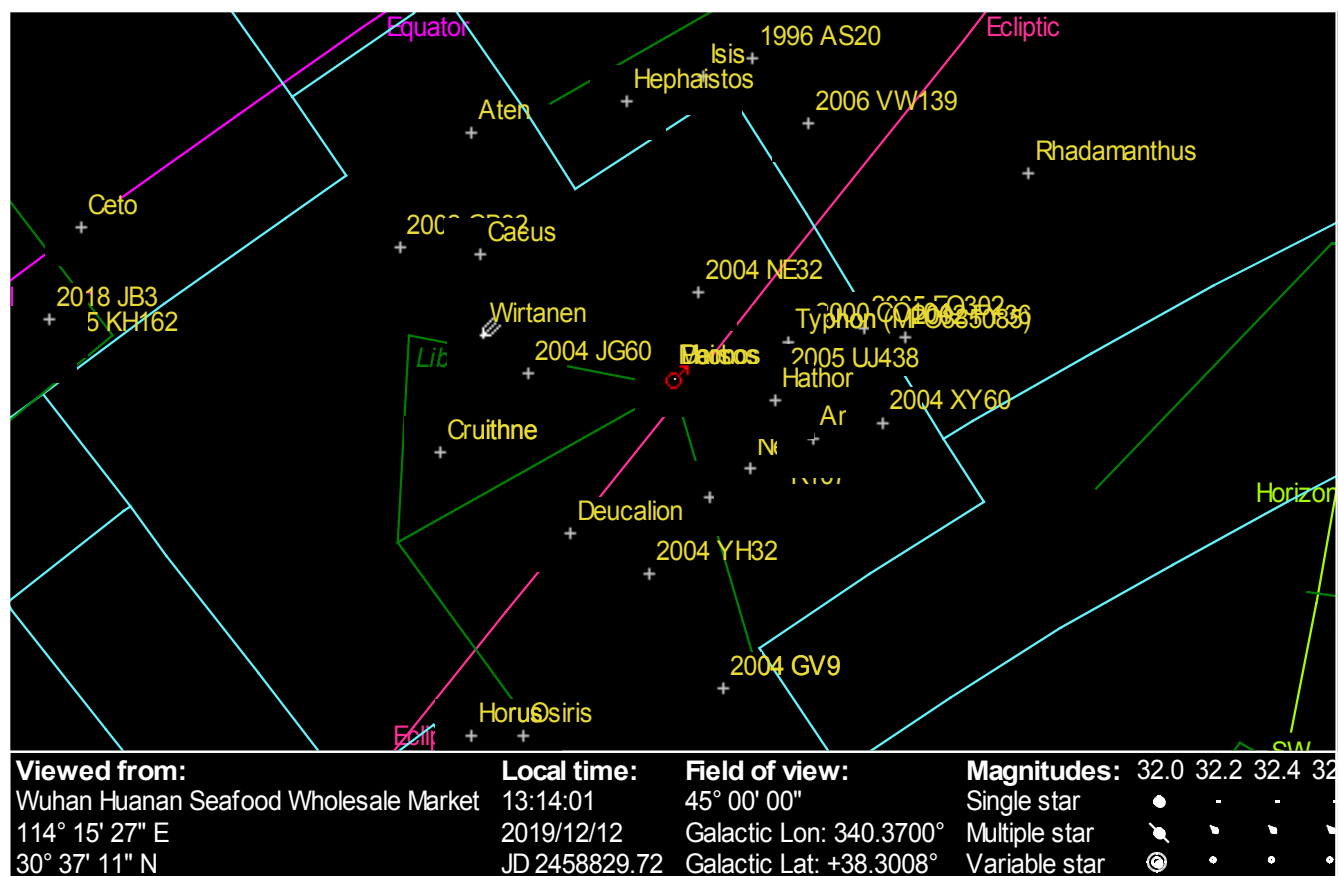

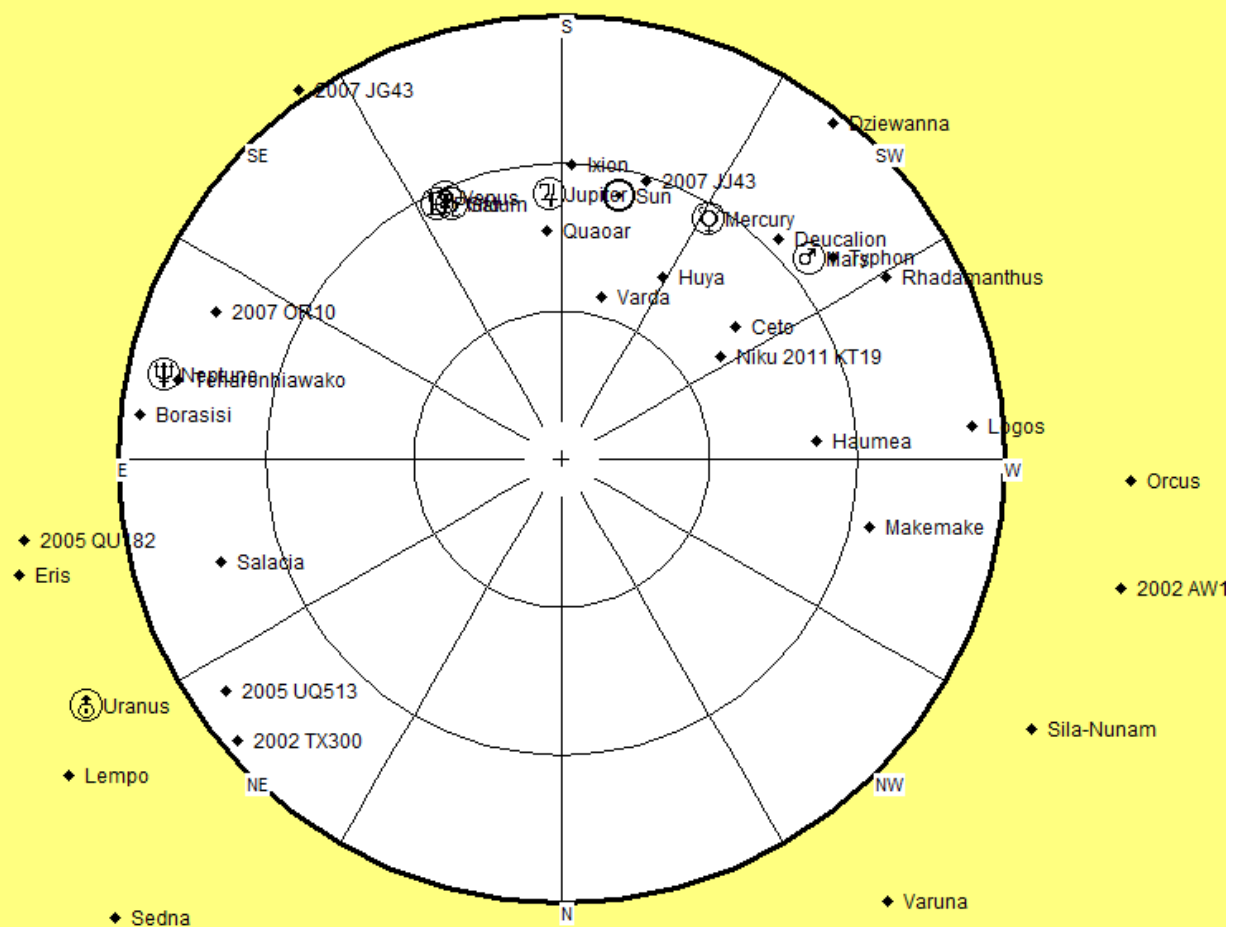

Moon about to stargate to 911 Orion position.

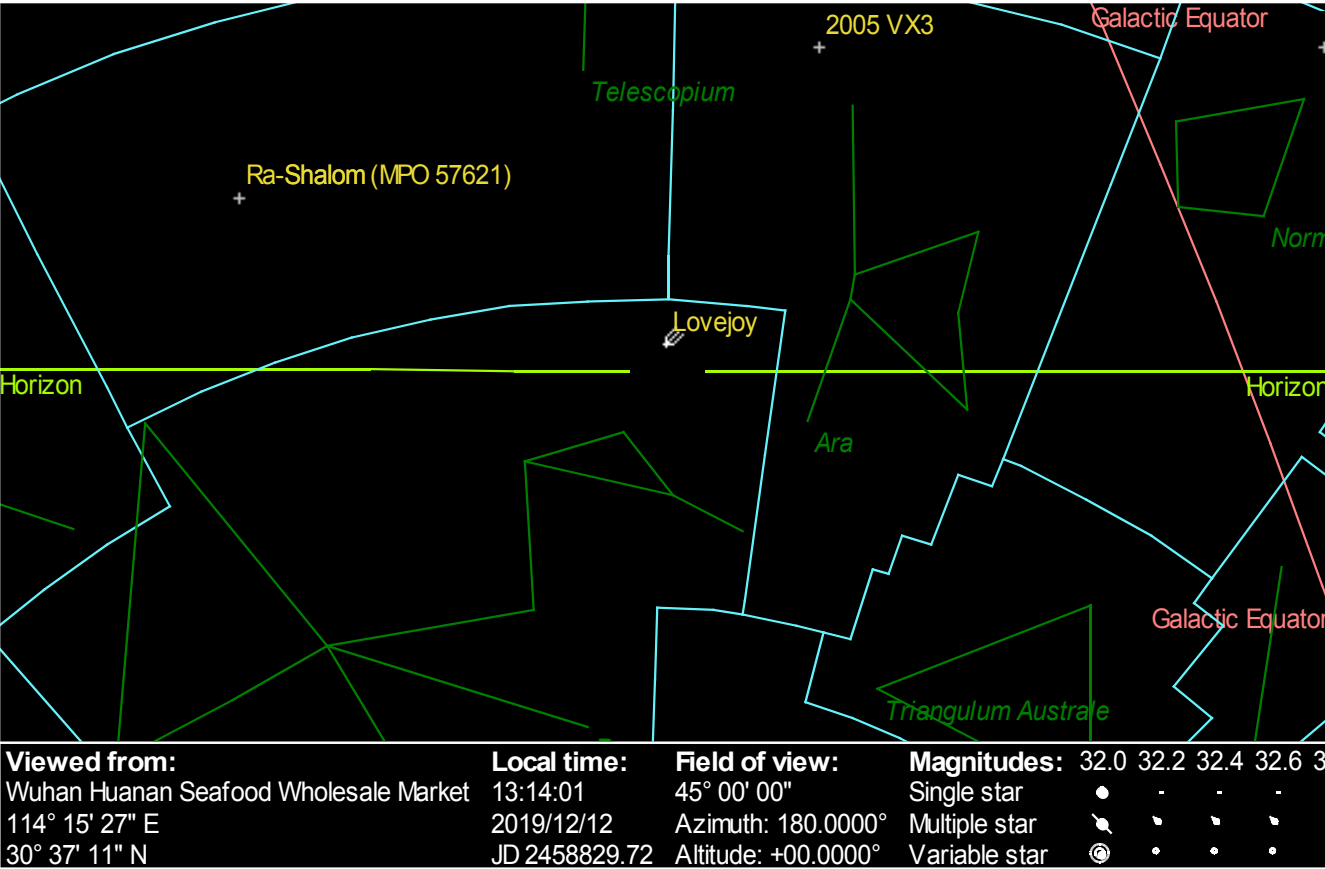

Mars is of curse below Devil's star Unukalhai – Niku apocalypse – president mentioned demon.

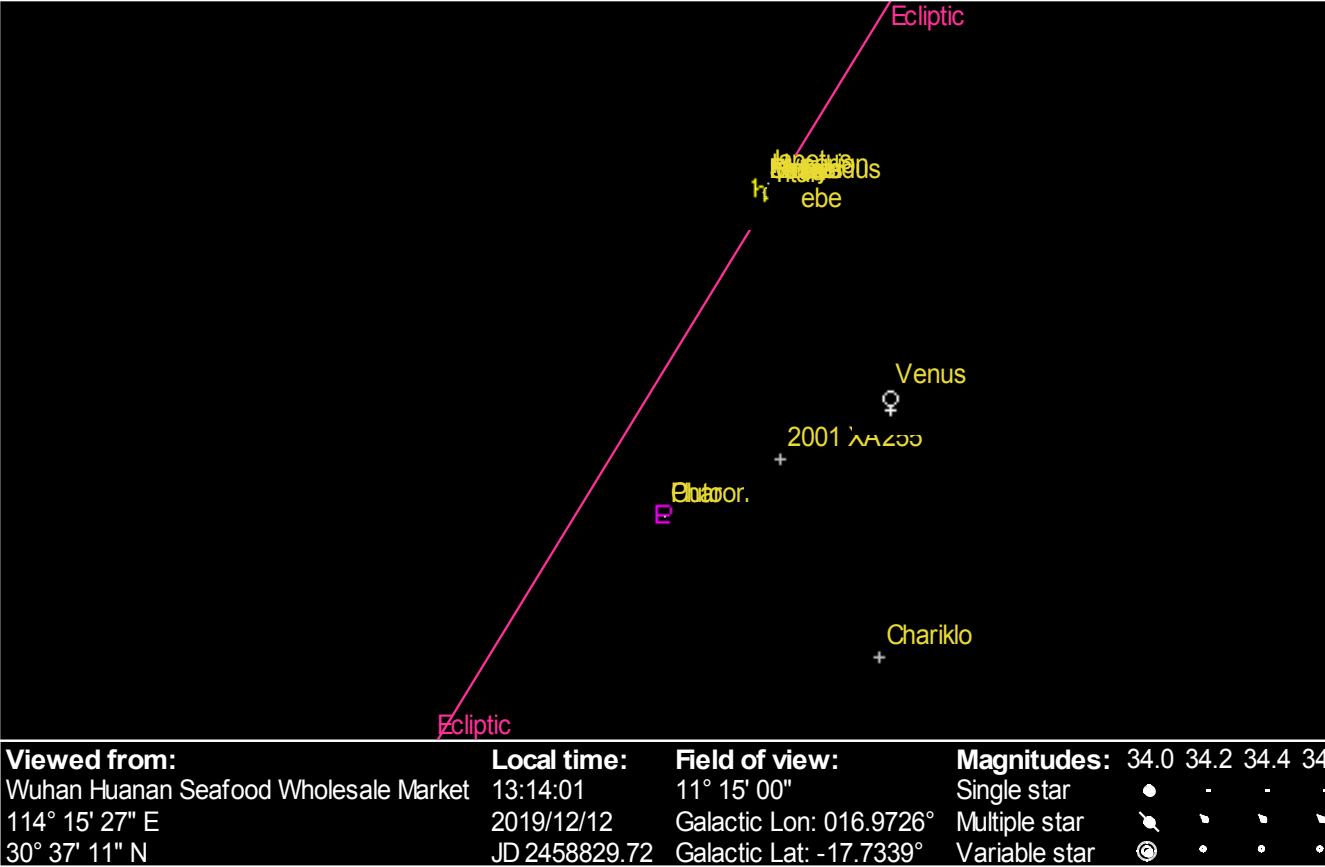

SW marks the house of death and Mars is there.

Jupiter is southern.

Massacre aspect is not merely genocidal virus: Israel wages war on Syria as we write this.

If you can not afford to entrust your wellness to snake oil, this is your site:

<http://lulu.com/astrology>

(1) You have been told that you have an ascendant like Gemini. There is no such thing. Gemini never ascended at east since Krishna. It can nevertheless be clearly observed at north when the “program” miscalculates it at east. That makes ninety 90 degrees of error¹ or #QuarterSky

(2) Various charlatans make great use of so-called Sun signs. The Sun is in reality the least important item of your horoscope. There are sixteen (16) solar zodiacal positions. The Sun does not determine the zodiac as every planet runs its own zodiac: no planet really follows the Sun: not even the Sun follows ecliptic.

(3) You may hear lunatic talking sidereal Mars versus tropical Mars, as if there would be two martial planets out there. There is one Mars only, which is both sidereal and tropical. It is moreover unclear how those “sidereal” freaks (do not) tackle Ophiuchus (which is one of the 16 ascendants for the current epoch).

(4) You have heard talk of 13 versus 12: both are idiocies as there are exactly 22 zodiacal stations along with 16 ascendants: yes, precisely A Tarot-like system in the real sky².

1 Error? Stupidity apparently survives anything you throw it's way. What good is computer if programmer is stupid, or god-forbid: deliberately dishonest for lucrative purposes. Scholion? They will tell you that you have “lung issues” while vaccinating you vs some phantom diseases that albeit non-extant would surely be far less lethal than said vaccine. Th is is like e.g. cutting sick organ according to ascendant apparent as alleged where “analysis” of e.g. Scorpius that is not an ascendant at all would lead to castration. There all too many alleged ascendants that simply are not there. Aries e.g. never rose at east since Our Lord Jesus Christ.

2 Real sky? Yes. There is a real sky out there showcasing #1008planets Both Indian and various “western” systems have absolutely nothing to do with any real sky and particularly not a single similarity with your own genuine natal sky. Question mark here? Yes, they generally do know that they are cheating on people who like to be swindled onto anything as eager to resonate with general superstition. Not far from some politics narrative, those who dedicated their lives in messing with naive people's lives through faux skies misinterpretation of rigged horrorscope are usually extolled as front line experts who die without ever predicted anything while completely unaware even of the simplest thing of all: their own natal Sun-sign. Imagine such misery: living with several false Sun-signs for life and propagating all kind of filth, faux smile included as attached.

(5)“The king will campaign at 5:11 AM; bagging a tigress, two tigers, 47 fowl³, 17 deer; returning 37 minutes after dusk.” This is standard Chinese astrology. Timing campaigns along with issue was daily business of the court astrologer. Modern like Nepalese court astrologers could not even predict royal massacre, being infested with false western sets of planets and worse superstition. But Sikkim kept genuine tradition. Thus. Not all histories of various astrologies apparent can be called catastrophe⁴, but what you get or god forbid ***believe in*** nowadays does not even look like worst superstition at all: a good prevaricator at least learns how to lie with fair imagination and candor.

(6)

3 Typically pheasant.

4 Word means bad star. There are bad stars galore, a few good; but Unukalhai as triggered by Niku Apocalypse is Devil itself.

#CoronaVirus #Astrology of your respiratory system. So it appears that due to having “ascendant Gemini”; your lung problems – but you have none – could go **viral**?

Relax.

There is a **real sky** out there as uninfected by superstitious stupidity.

Gemini has not been seen across the eastern horizon since Krishna: no one you’d ever know has Gemini ascendant at all. That woman is doing pranayama and thus picked northern immortal Gemini star by sheer instinct: the one in trouble is “astrologer”.

Northern? Not eastern? Yes. Astrologers being extra low IQ superstitious copycats never noticed that Gemini shines 90 degrees from where their idiotic “programs” show it. And the gap is getting larger, so don't bother at all: they are already #QuarterSky away from any skies.

When you look at the skies, you don't see zodiacs; but in fact every planet has its own.

Thus, there are <http://lulu.com/astrology> as many #zodiac as #1008planets

RTRRT

{ Real Time Reality Rendering Tools }

A mini-initiation in personal Instant Magick

New simplified edition revisited for the year 2012

by Klaudio Zic

- 1) Introduction
- 2) Cascade
- 3) Oberon V
- 4) Personal Cosmic Secretary

Introduction

ABOUT THE PRESENT EDITION

This revised edition is to be duly revisited in its progress towards year 2012. The intricacies of the global matrix stir have been predicted to some detail within our matrix-scanning project. The RTRRT initiate does not take our excellent predictions to the letter. Fate is for the rest of them. The initiate is bent towards changing, revising or recreating events, either from scratch “out of the blue” or on the basis of a previous scheme.

TIME CAPSULE

Even as the initiate reads through these power words, they trigger intent. Magickal intent is something unspeakably natural that one rediscovers along the Path. In reading this, you have already begun to hack the matrix. The event matrix is not something rendered as given: it is in fact rendered on demand.

TREASURE CHART

The plan is best set within a treasure chart format, that is a pictorial representation of your wanted future to be. The initiate is thus strongly encouraged towards the production and use of treasure charts. Draw or paste yourself into your favorite situation! The initiate may like to keep several treasure charts at hand. As people in fact tend to keep the pictures of things that they like at hand, the idea could not be simpler: paste yourself within that tropical paradise!

RTRRT PURPOSE & ADDRESS

The RTRRT make a perfect companion to 32nd degree Masons, O.T.O. Initiates and school kids. As simplicity resurfaces after years of training, the essence of the universe is revealed. Omniverse is simply moldable to your purpO5e.

REAL TIME

What does Real Time stand for? After brief experimentation with the O5 formula, initiates intervened into the substance of matter and time. In other words, even after a half hour of O5 initiation, relatively simple people were able to change the event matrix at will in extra-short time. The initiates were people like you and me, with average focus, concentration, imagination or will-power; that is to say, they were nothing special for all practical purposes. Much like anyone can predict events given a brief mini-initiation, so you can reorder the matrix to your advantage right now. After a large record of success on the part of absolute beginners who e.g. managed to stop heavy hounds from barking, it became clear that our O5 deliveries entered a stage “for all”, where Instant Magick is no longer a pleasant futurity, it is a matter of fact. A technique called Cascade was developed precisely in this stage, when Instant Magick was historically labeled Snow Crash. Perhaps the best way to “describe” Instant Magick would be to assume a lapse in time-space continuity, such as e.g. a timeless second of “non-thinking”, where *intent* delivers the event out of the blue. At the time, if asked how do we manage to produce instant miracles, we could only say that we sincerely don't know, but it works. A mini-trance lasting perhaps a second is enough to produce said miracle. The operator does not even have to be aware of said trance, if being aware of a lapse of awareness is postulated as possible. The best way to deal with the RTRRT is to do, not to scheme using words. Instant Magick is something that happens, even without a spell. In practice, “real time” stands for five minutes.

REALITY RENDERING

Magick reveals itself as instinctive. You always knew how to do magick! Instant Magick comes as instinctive. We can not teach you what you already know. Magick happens instinctively. Rendering one's own reality is instinctive. The techniques are not at all important in themselves: they just form a seamless for intent to manifest. The RTRRT initiate secures one's won creation by perusing a possibly perfect treasure chart. As simple makes perfect, one is invited towards one's own design resources: how do you design your world to be? Man is architect and designer with omniverse as writing desk. The immense arrays of Egyptian and Mayan reliefs and architecture are nothing else but gigantic treasure charts.

RENDER ON DEMAND

The following is a comment on cases where people would rather someone else to live their own lives. These cases could appear to be rather frequent, much as people who immerse themselves into gypsy tents in search for the proper tarot omen are. The lazy way to render one's own reality would be to have someone or something else do it for you. Nevertheless, there are karmic flaws within that very idea. Namely, when someone partakes of no responsibility over one's own life, one does not live life at all; at best not as primary factor. Whose life is it, then? For all practical purposes, whoever takes responsibility for a thing is its owner for the time being. Said transaction happens every day, e.g. when someone purchases something. When someone arranges the events for you, one takes responsibility for said arrangement. In some odd but logical way, your life partakes of a leasing contract with someone who arranges it. In other words, you may not be entirely living it as your time at all. The nature of a pact is visible from the nature of said transaction that in bad times may expand or contract towards a swindle on both sides. The RTRRT initiate does not perform black magick.

Cascade

PORTALS

Cascade was named after one of its versions, a cascade that one would cross either way, never looking back. Versions include a hamburger, curtain, veil, portal, occult passage into another world, kitchen door, newspaper or hymen. Portals can include passages such as bridges, but the main idea of Cascade is to tear that matrix in two pieces and definitely pass through into a new reality of one's own design.

FINAL PLUNGE

Opening a portal and passing through may seem simple and in fact it is, providing a level of intent and personal power. The idea is never to look back. The decision is definite. The plunge is final. Cascade is therefore performed in one cut: you will never use that sword, lift or pass through that veil again. Cascade is often used in emergency, such as at the airport or in finding a parking place or removing that queue. In other words, Cascade is ideal for modern busy persons who like to live long and prosper by assuming a minimum of responsibility for their quick decisions.

INDEFICIENTER

Taking responsibility does not imply carrying a heavy burden wherever you go. We may say that the RTRRT initiate assumes 100 % fresh responsibility with ease. One is able to offer fresh response. An apparently absurd comparison is the man who gladly pays the taxes, knowing their purpose, trusting the ideal state and being positively rooted in one's own infinite resources.

CLEAR CUT

Negativities often tend to come around again when improperly sent away for good. Cascade gets done with this attitude once and for all times. Albeit the RTRRT are a simple Instant Magick system in itself, the initiate is encouraged into perusing a magical diary. In a way, the treasure charts for the outer and ideal part of a magical diary. The book of records contains your decisions. You can write down an item, cross it twice and discreate with Cascade.

EXAMPLE

Imagine or have a curtain before you, one that you can pass through into another space. Formulate the idea clearly. The positive idea is to cut with old habits once and for all times. These may be everything from stalled situation, serious disease or an unfruitful love affair. Close your eyes. Feel the heaviness of your situation. Now make a step through that curtain while making an opening gesture with your both hands. Step into the new situation. Formulate it as positively materialized. Open your eyes to an appropriate treasure chart. Meet the idea in the new space. Embrace it. Stay with it.

INTENT

In resuming, Cascade always represents a definite step into a new situation. One quits situation “1” in order to jump into situation “2”, that simple. Simple clear-cut solutions are often jammed by a reactive default mind; therefore practicing Cascade enhances your power of decision, always a great asset along the spiritual path.

Oberon V

DISCREATION

Oberon V or O5 is the central technique around which all RTRRT revolve and prO5per. O5 is specialist in discreation. One wants to remove that old car from the backyard in order to park a new one. That is exactly what we do: remove the old in order to install the new. In Vedic terms, Shiva discreates, Vishnu keeps and Brahma creates. Brahma would therefore form something like a patron deity of recreation.

O5 STEPS

O5 has basically five steps. Versions abound, especially as rendered through the *Aladdin XI* series of publications.

AFFIRM POSITIVE INTENT

BE THE THING ITSELF

EXPAND FROM ITS CENTER TOWARDS ITS RIM

EXIT AND LABEL IT FROM THE OUTSIDE

DISCLAIM THAT CREATION

LET IT DISSOLVE

REAFFIRM POSITIVE INTENT

The explanation of the magick steps is rendered as follows.

AFFIRM POSITIVE INTENT

Silent assuredness or enthusiastic bold claim, indescribable intent is Instant Magick. Our own intention is to make an event happen. Our plan as formulated within our treasure chart is due to materialize. One can use the treasure chart in this step, while O5 can be performed with one's eyes closed. Upon the positive affirmation, the reactive mind can stir and send an obstacle, negativity, a dark cloud of doubt. In O5, we discreate through that very obstacle in order to make for a clear slate for our creation.

BE THE THING ITSELF

The “thing” normally stands for negativity, an obstacle, whether physical, astral or mental. Performing discreation on all three levels greatly enhances the results of the ritual. How does one become the “thing itself”? The best method lies in using the barycenter. One becomes small as poppy seed, enters the center of said thing and encompasses it radially by taking an inhalation.

EXPAND FROM ITS CENTER TOWARDS ITS RIM

The idea is to encompass the thing, a part of the matrix, our own creation. Therefore we radially expand our consciousness from the center of the object towards its rim, even in cases of infinite objects. At first, one is small like a poppy seed in the center of the great object. Now, one is larger than life. One expands like a balloon.

EXIT AND LABEL IT FROM THE OUTSIDE

On expansion, one suddenly leaves the object, quits said balloon, in order to observe it from some very discrete distance. So, that's what I created. A neutral standpoint is vital to this exercise. Labeling equally appears as neutral. We don't attach emotion, much like labeling machines in a laboratory. We mark the thing for deletion.

DISCLAIM THAT CREATION

“That thing is no longer operative, now I replace it with a brand new one, my special creation.” In this step, one can use banishing gestures or powerful mantras. However, much as dramatic enchantments stir the astral realm, so much more calmness profits in a RTRRT initiate. One is probably liable to eventually calm down the ritual steps into a silently blended experience. As O5 is performed everywhere, it would be preposterous to shout mantras at people. Discretion will make for good karma.

LET IT DISSOLVE

Properly, this is not a step at all, and yet, discreation happens here. No effort is invested in the operation at hand, as the discreated object spontaneously disappears into oblivion. Its energy will be advantageously used in creating a new positive situation.

REAFFIRM POSITIVE INTENT

A treasure chart is of immense help in formulating one's unbending intent in creating a positive issues right now. Now, intent and the barycenter are intimately akin to each other in their triune intimacy with infinity.

O5 EXAMPLE

NEW JOB

Affirm your creation, e.g.: “I enjoy my new job.” Now, help yourself to your favorite treasure chart and immerse yourself within it. Stay soaked with the feeling of victory. Absorb positive energy like an astral sponge. Do that job. Work is fun. You like to work. Feel the pleasure issuing from doing what you know is right, precious and fun. Don't just casually affirm that you enjoy your new job *now*, feel it with all your might. Gestures, props and mimicking can be used in improvising the stage for your new job. The two-dimensional treasure chart enlivens within a full-scale 3D representation. Make it feel real! You are an artist performing your intended futurity. Materialize it now.

DARK CLOUD

Now, some doubts can pop up as sent by the reactive mind. Seize them. Seize them one by one and encompass them with a great dark cloud of doubt that would destroy your creation, shade the sunshine of your life and bring the opposite of your intent into your sphere of action. A general representation of any negativity can be visualized like a dark cloud full of doubt.

THREAT

Now become that cloud. Feel wet, dark, looming, brooding, threatening to destroy your own creation. You are the dark cloud of doubt. Encompass it. Feel its weight looming over your life, hanging like a Damocles sword over your precious creation.

PUFFING UP

You can expand that dark matter with an inhalation across the limits of time-space. Make that threat bigger than life. A puffed-up balloon of extra-dimensional proportions will surely burst up. Double the pride, double the fall. Make that threat invincible for a second, give your enemy extra confidence in order to cut it out forever from your universe.

DISCLAIM

Now, exit the dark cloud. You are the incipient crystal drop of consciousness from which everything sprung up. Observe the dark cloud of doubt neutrally as it were, just an obsolete creation.

Disclaim that creation. "Doubt is obsolete."

LET IT DISCREATE ITSELF

Let that cloud come to nothing before your very astral eyes.

REAFFIRM

Reaffirm your positive intent!

Personal Cosmic Secretary

PCS

The Personal Cosmic Secretary gets “installed” over a period of time. Its primary function is to optimize the sequential download of wishes-came-true from the astral domain. Namely, we don't want a wish to come true when we already desisted it. All gifts must come at an appropriate time.

SOMEONE TO TALK TO

The PCS can be used for everything. One can simply address it or talk to “her”. People e.g. talk to trees. Emotional discharge is salutary. You can say many things that no one else would understand. Sometimes, opening one's heart to fellow humans can be dangerous. Tell it to your PCS instead.

WISHWHEEL

One can organize the PCS interface towards an orderly daily intercourse in many ways. One is to imagine and set operating a wheel with twelve spikes. Such an astrological device is organized by topic, e.g. first house stands for personal safety, the second house for personal power and financial prowess, the third house is communication, the fourth house is the ritual temple or dwelling place, the fifth house is your recent love affair and so on. The daily Wish Wheel ritual consists in enhancing the twelve sectors of life with affirmation. The PCS will provide to fill in the necessary items, assets and downloads in no time at all.

SEQUENT

The PCS specializes in sequence. It surprisingly delivers the right events at the right time, just as ordered or more often than not, even much much better than ordered. In time, an inner optimizing function comes natural as your PCS does the optimization of astral download even without your expressly formulated request.

DAILY RITUAL

Among the many variants, we recommend the orderly ritual of the Wish Wheel, that is, an orderly astrological key to the twelve key areas in your life. Explore these areas while sending requests to your

PCS. Here are these areas as delineated in short for your convenience.

- (1) Personal well-being.
- (2) Financial assets and possessions.
- (3) Communications.
- (4) Headquarters.
- (5) Love affairs.
- (6) Nutrition, health, daily routine, servants, job.
- (7) The alter ego, often marriage partner but also open enemy.
- (8) Immortality, orgasm, sex.
- (9) Angel guardian, travel, guru.
- (10) Ambitions, aspirations, private enterprise, God.
- (11) Protections, angels, true friends, true love, earnings from a private enterprise, the power of God.
- (12) Clear slate, non-thinking, sweeping off the reactive mind, True Mind victorious, secret enemies under the spotlight, spiritual illumination, we shall overcome, global exorcism.

☺ The Rise of #Ophiuchus <http://lulu.com/astrology> #ZodiacShift #1008planets #CancerCure

Ophiuchus is a well-documented zodiacal ascendant <http://www.lulu.com/spotlight/astrology?searchTerms=Ophiuchus+Ascendant+Service>

USA

Albeit USA ascendant is Serpens Cauda – a by a dint of rattlesnake’s fang – Ophiuchus exerts influence on the ascendant. Basically, USA ascendants sits on the IAU border – leaning towards SERPENS CAUDA.

CELEBS

A host of celebs from Kim to Kim, pope, Bieber, HRH... feature Ophiuchus as prominent within their own horoscopes, whether as ascendant, lunar, Venus or Sun sign EWNSZN angular.

Celebrities born under 67 stellar auspices such as Ophiuchus, Monoceros or Orion do in fact abound. Let us inspect quite some as published on <http://lulu.com/astrology> <http://gumroad.com/tarant81> and <http://payhip.com/astrology> <https://www.paypal.me/16suns/77>

Albeit there are 67 horoscope signs, in considering 16 cardinal points, we finally encompass the natal skies within 88 constellations. Those can be classified as 16 ascendants or guardian angels and 22 classic zodiac signs – omitting Eris and Pluto – or as variously expanded.

Let it be noted for Sun sign fans that the position of the Sun may prove most irrelevant – even diabolical – in any analysis proper: also, there may be 16 instead of only 13 solar positions, which of course traditionally and biblically include Cetus, Orion, Sextans and Ophiuchus; where Orion and Ophiuchus can be considered as prominent in any cult along the central axis of the galaxy.

Monoceros = Angelina Jolie

Phoenix = FED, Leonardo da Vinci

Hydra = \$OIL, Palden Dorje, Aleister H. Crowley

Hydra + Canis Minor + Monoceros = Kalki 2

Canis Minor = George Bush

Sextans = Keanu Reaves

Orion = 9-11, Dalai Lama – CINGVLA ORIONIS

Ophiuchus = pope Francis, HRH Prince George, North Korean Kim, USA, Kim Kardashian, Justin Bieber

Serpens Caput = Italy

Serpens Cauda = USA

Scutum = Agents of S.H.I.E.L.D.

Pegasus = Illuminati, Kalki

1 Taking into account – nadir and zenith including.

2 Triune ascendant.

Taurus = Bull Market

Cetus = 9-11, Aeon, the Sign of Jonas, Mayan Doomsday, Carl Gustav Jung

Auriga = Refugees, Stray pets

Aries = Jesus Christ

Gemini = 9-11, jihad, Prahlada Maharaj

Crater = Grail Quest

Corvus = Puck

Leo = Kingdome Cometh, \$GLD

Witchallow = sir Morderd, Illuminati, Hitler, Wicca, transcendence

Cancer = \$MDM 3, #CancerCure

Diamond Planet 55 Cancri e.

✓ Republican ☸ Astrology  <http://lulu.com/astrology> #Impeachment #Trump #Brexit #BabyYoda
Know the **news**: *years* beforehand: from the site <http://lulu.com/astrology> that predicted ²⁰¹⁶ Brexit won't.
#RTRRT #AcademicZodiac #ZodiacShift #CancerCure #Trump2020 #ZodiacFix #1008planets

 ? Once you know your destiny, what can you **actually** do about it? Change it. If it's bad, that is.

✓ ! How can **you** *better* your own **destiny** right **now**? Anyone can do it *in private* with #RTRRT
<http://www.lulu.com/spotlight/astrology?searchTerms=RTRRT+Mini+Initiation> so start enchanting!

 ? Democrat default mind does not think: as they hogwash over 12 faux signs that are not there.

✓ ! True skies are good for you as they provide accurate prediction: years ahead of an event.

 ? Is there such a thing as 12 signs rising at east forever in a flowing precessed omniverse?

✓ ! 12 signs superstition is demoncratically based on naive belief "faith": not any facts at all.

 ? How many horoscope signs there are? 13 or 12 as the Sun does *not* determine the zodiac?

✓ ! 67, 43 or 22 – depending on the definition of "planet": solar stations being 16 in number.

 ? But there *are* 12 ascendants, still? 12 can not possibly be **myth** since *all* "agree" on 12?

✓ ! Never been there at all: and there are **16 actually** not 12. Errors vary from 90 degrees up.

 ? Is therefore a shift as concern zodiacal signs? #ZodiacShift like one sign or two? #ZodiacFix

✓ ! Actually **7** seven is the number around Xmas. 7 signs & **90 degrees** are merely illustrations.

What can you **get here** that you can't possibly obtain anywhere else? Besides plain truth?

#RTRRT <http://lulu.com/astrology> #1008planets #Trading #ZodiacShift #Magick #CancerCure

- a) Unwanted *things* do **not** have to happen at all.
- b) That is what you get here.
- c) Among other things: you (can) determine what **is** and what **is not to be**. That simple.
- d) Unwanted stuff can be timely predicted as unscheduled.
- e) Got a most likely unwanted visit next week? Remove it.
- f) Someone got e.g. recurring cancer? Remove it. Just unschedule it forever, alright.
- g) Can't predict next cancer in one? It is easy: if you know how to count to ten: you got it.
- h) Not knowing the future puts everybody at disadvantage: and it is not trading only that deals in futures.
- i) Some unwanted phenomena can occur in a recurring pattern: why not predict and discreate?
- j) Nobody wants it but things happen, unwanted stuff: issues: situations.
- k) Unwanted things do not have to happen at all.
- l) That is what you got here.
- m) Nobody else regales you with your own real natal skies – in progress: as your genuine stars offer, regale and dictate your day today.
- n) There is no fun in bankruptcy, divorce or (premature) death at all; and yet, people do it all the time, especially on “expert advice”.
- o) In order to predict events to minute-second (e.g. Chinese market crash with Venus in Hydra), one gets trained in real-sky astrology (=predictive astronomy) (and leaves dubious fun to losers.
- p) Losers buy everything. They believe in things that are not there and they eventually suffer, which is good for them: but not for you who gets dragged within their own mess: get out of the vortex on time: the poor-minded fellow can not even guess own Sun-sign.
- q) In order to predict events to minute-second (e.g. Chinese market crash with Venus in Hydra), one gets trained in real-sky astrology (=predictive astronomy) (and leaves

dubious fun to losers). Dubious fun? 12 ascendants that mimic 12 zodiacal stations.

- r) **Fun gets dangerous since:**
- s) **An “astrologer” (many people had an illusion of grandeur) will not even attempt at prediction at all. Good for him but not for you since unwanted events require it.**
- t) **In attempting prediction, he will fail: namely one can not predict anything from false skies with mangled data. Already at the very start, “programs” will fail him by 90 degrees; on an average pursuit: meaning he will miss not only e.g. Sun-sign but also ascendant by a 90 degrees (#QuarterSky) average. (And that is mere beginning).**
- u) Those who can’t predict anything at “best” count in popular credulity as propagated by media. Superstition pays politically as well as people don’t question authority. How many people will question e.g. Greenwich? And yet Greenwich never had any idea of zodiacs or ascendant sets or 1008 planets: as it thrives on general superstition.
- v) If popular observatories have no organized idea of their own natal (or actual) skies, how can one as armed with crooked “ephemerides”: or general-superstition program have any? You know, 12 sings.
- w) The ring is no joke at all: the 12 zodiac ring does bind everyone – in darkness.
- x) There is namely no such thing as 12 zodiac signs rising at east.
- y) When your program says Gemini ascendant, said constellation is visible at North: thus #QuarterSky or 90 degrees of error: nobody notices because mass hypnosis gets installed as default mind (none of your own): this “mind” exhausts you, thriving on your troubles: you can call it the Devil you (don’t) know. At one stage, you will even be tempted to think that you are actually thinking your own thoughts! TV, propaganda, “education: you don’t need: the wall. #RTRRT offers quick exorcism – before it’s too late.
- z) Was Gemini even as ascendant? Yes, in fact, but before Lord Krishna’s own epoch.
- aa) So was Aries before Jesus Christ. Check their horoscopes on the site <http://lulu.com/astrology>

- a) You can not *possibly* go out there and yell: “**People are stupid.**” - and how’d you know? Stages are expensive as gate-keepers are everywhere. No free kosher in omniverse at all.
- b) How does default mind work? You are all **freezing** in the USA - from deserts to Canada. That proves climate change is about global **heating** as produced by cows: that simple. Kill the cow and snow will go away. It’s in the Vedas.
- c) You don’t agree to heating or don’t really feel the heat in sub-zero weather? You are clearly white privileged KKK Nazi fascist islamophobic homophobic denier holocaust jihadi sexist (the list is endless): in other words: you are a normal intelligent white.
- d) How can one not *possibly* believe in the beauty of fucking people in the ass? Or 67 or 156 and counting different sexes – all growing overnight? Don’t propagate but feed illegal aliens. The present situation beats even Kalergi-Saudi (Moon in Auriga) plan.
- e) When you got your audience as hypnotized, you can easily blend climate change alert with polar weather due to global heating. How so? Default mind is quite capable to swallow dichotomy since it never thinks at all: that’s right: people never think: they sort of monkey it out, imitate thinking sort of: like: what would an average bloke do? So, what is on the menu? Prevaricate, steal, copy and among all; Moses’ fav: accuse others of all the abominable things you do (serial genocide being basic culture): and don’t forget to glorify it all: good god told us to slaughter you all, sparrows including: for your own good. Precisely what is happening in climate-controlled Marrano-juicy Europe.
- f) And yet. People ^{merely convenient ephemerides} and their pet programs never noticed whatever happened through the past 11000 years. It looks sincerely **impossible** that within a subcontinent as stacked with astronomic observatories (Sai Baba has had one next to home) nobody noticed that Gemini was no longer rising at east since Lord Krishna’s own epoch. Already Sai Baba having natal Sun in Libra on November 23rd may spark a little scandal: but did it? No; default mind’s a skipper: it simply skips over anything inconvenient that nowadays mostly consists of the most inconvenient asset of all: truth.
- g) Noticing Gemini **at north** whilst their “programs” miscalculate it “at east” would require a 90 degrees turn of the neck.

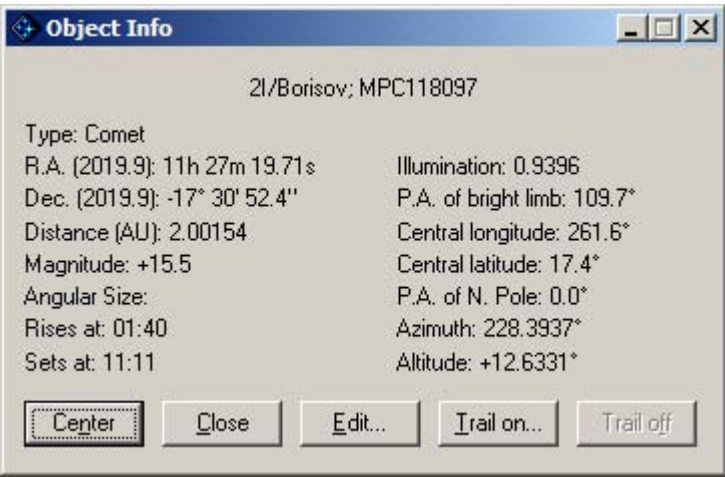

- h) Turning the neck would not do: the neck may not be completely stupid at all, but default mind is adamant in asinine stupidity forever.
- i) Default mind does not even cover it – too elegant in a concept – genuinely magnanimous in offering any word but **stupid** – in non being offensive, it is hardly descriptive. People don't want to be called for what they are: thus gypsies are not gypsies and stupid is not quite stupid: nobody is stupid nowadays: the times of Stan and Olio are past Carol Brunett: the present degeneration is too self-important in being serious gamers: with hip-hop (old school) grandfathers and rap (old school) founding fathers.
- j) From now own a cannibal that cuts and eats the heart of white female is protected by hate speech gateways; a pregnant woman stabbing jihadi is sanctioned whilst the only asset left unprotected is working white. Where in Anadolia could Hyxos develop such hate? Surely not from their teachers, the Yazid? Or protectors, them Egyptians? Gobblers?
- k) Said quarantined Hyxos cloned themselves into desert marauders at one surviving stage in protecting their own clone troops to be from Yemeni king who was about to exterminate global evil at its very root. Nowadays we have 1/3 of "humanity" believing in flat Earth.
- l) Yes, they fly by plane but Earth is always (Aiwass=Hydra=1904) flat for them. Now how do they fly around the globe on flat Earth theory is up to them to explain: doubt they feel the need to.
- m) Superstition is cozy because it does not feel the need to explain itself.
- n) It may be freeing sub-zero twin digits but that is obviously because of heating.
- o) That cows provoked polar whirlpool is quite obvious to many.
- p) The Chinese should be more lenient on poor people who merely sent bombs into embassies – and even that without much skill at all. They must be trained accordingly.
- q) One single mignig utterly destroyed three ancestral graveyard with temples and shrines in one single day: thus the pope who has no influence on Japan (or Thailand) pushes for more mignigs. Timing seems perfect as his own Genoa region is under water.

- r) Said distractions “cows provoke climate change” are genocidal step-by-step “boa squeeze”: your economy experts could not add two numbers while your climate experts are not even Marrano proper: suffice at least to appear juicy enough.

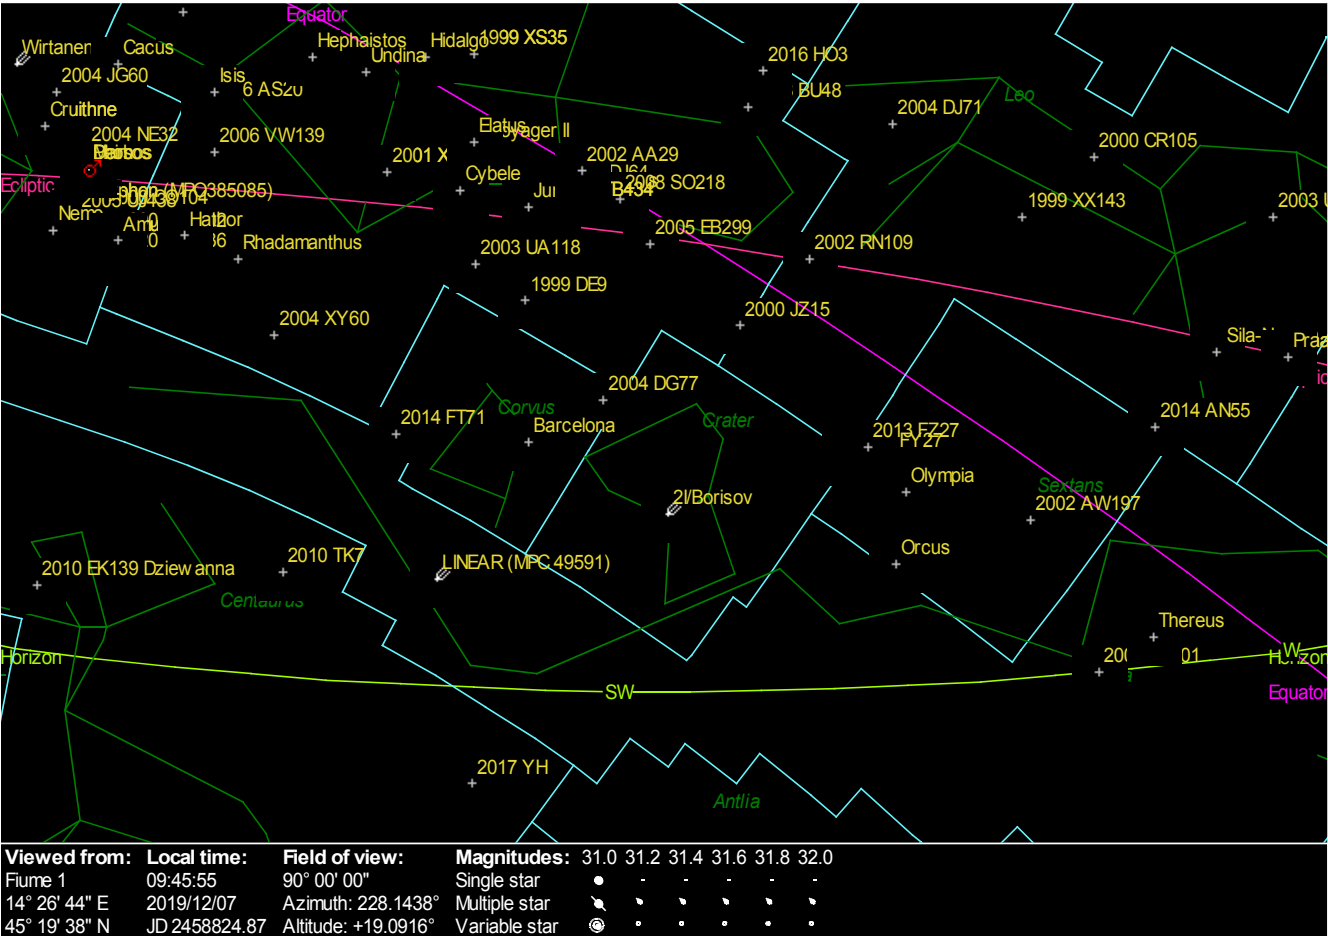

Trump wins with Venus in Pegasus – a Dantesque time for all. AEON <http://lulu.com/astrology>

- a) Venus in Hydra predicts Chinese market crash to minute-second: here is when and why:
- b) AEON CETI or AEon of Cetus II vaguely coincides with the so-called Mayan apocalypse.
- c) While Jupiter with Uranus in Cetus marks AEON CETI, said Mayan priests probably referred to Venus in Pegasus, Hydra and Scutum: as happening at comparatively close timing range. That kind of rather sound reckoning would mark year 2026 as beginning of the end of the local peak of the AEon of Cetus II.
- d) Since all eras, aeons and ages have been meticulously documented up and down to nauseating detail, we proceed to but briefly *illustrate* the main peaks and lows – mostly as concern practical issues such as economy – from roughly a decade from an allegedly first Mayan apocalypse; up toward Venus in Pegasus 2025.
- e) Venus in Hydra predicts Chinese market crash to minute-second: here is when and why:
- f) because it is a bearish low? Rather, shadow markets. Thus, real-sky predictive astronomy is predicting tools while stochastic charts are nay. Namely, as far as most of us are concerned: never did anyone predict anything or real substance.
- g) 1929 has a name: Saturn in Ophiuchus: happened in 1987; happens now.
- h) Venus in Scutum has brought Ukraine upheaval with the rise of Huawei.
- i) Trump wins with Venus in Pegasus – a Dantesque time for all.

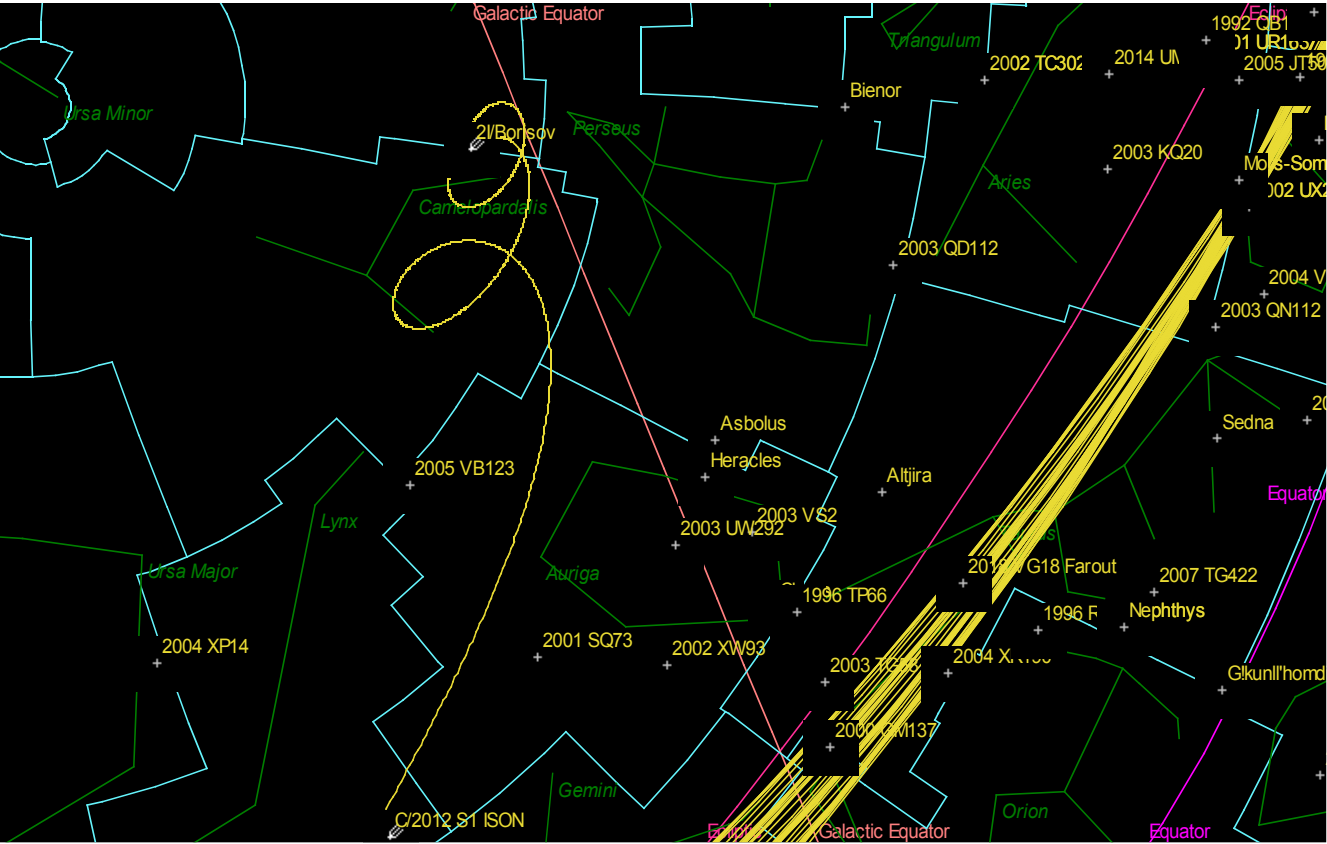

Xmas comet – does not make any relevant *close* approach – is second – thus **2I** - “visitor”.

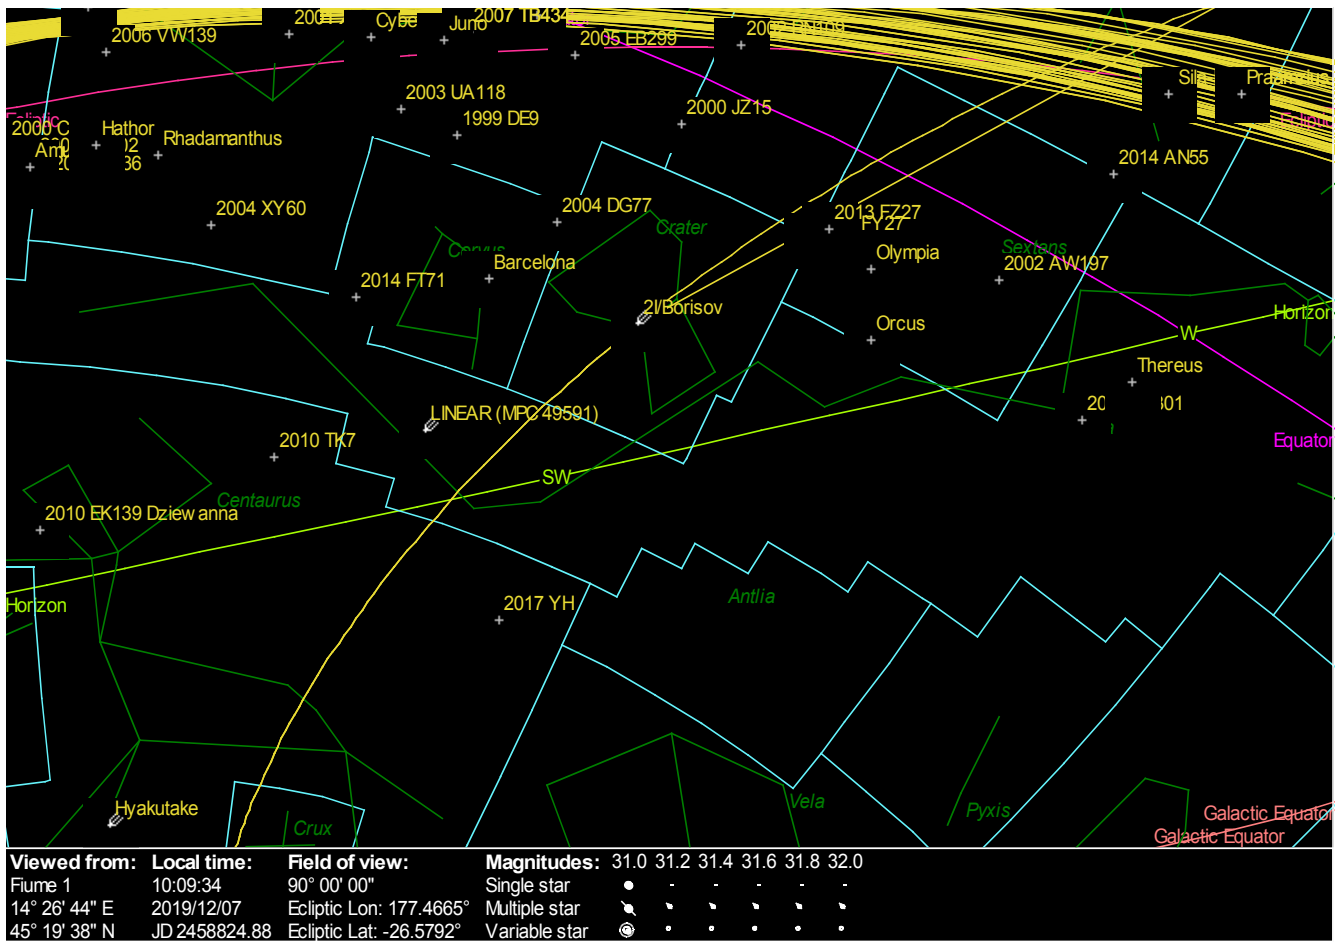

Is in zodiacal (sic) constellation of Crater as it visits our system on December 7th 2019.

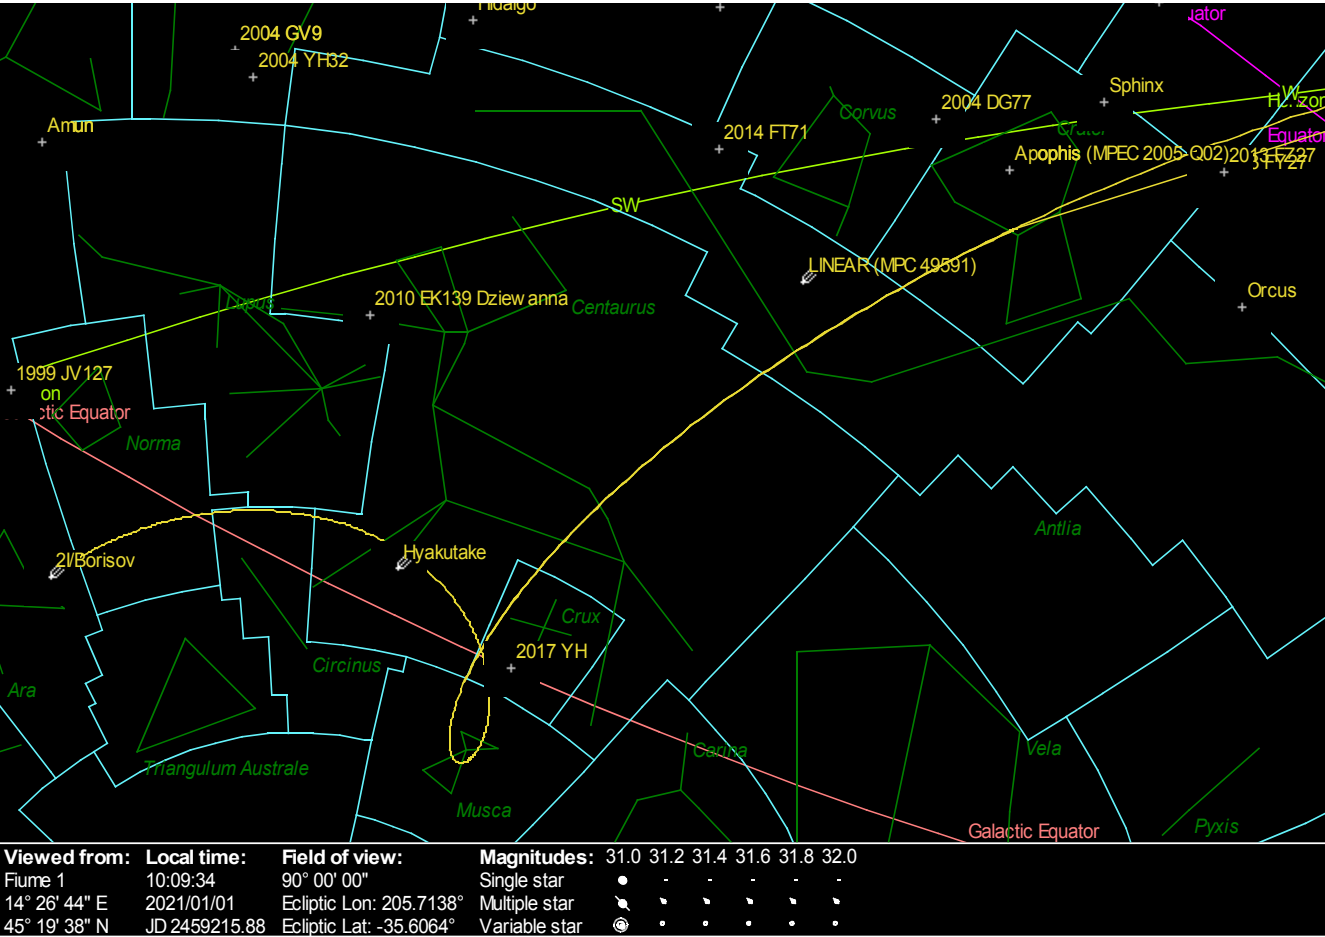

Barcelona is in zodiacal (sic bis) Corvus.

Was #Nostradamus an #astrologer? Or Newton? Kepler? <http://lulu.com/astrology> #RTRRT

- a) Gemini has not been rising at east – that is ascending – since Krishna’s own epoch.
- b) Nobody noticed.
- c) How is it possible that Newton never noticed?
- d) Nostradamus, much as the evangelist Luke: whom we corrected as concern an eclipse; was qualified medic: diviner and also astrologer: surely qualified in many a ritual.
- e) Nostradamus, much as Ptolemy and the rest had no idea of ascendant sets: fatal in a Paracelsus: who nevertheless efficient in stellar healing; was not exactly accurate in all.
- f) Modern western superstition has no idea of zodiacal positions and even less of ascendant sets: this makes for awkward advises from mad people wielding idiotic cookbooks.
- g) Wrong analysis being warranted, the western asstrolloger will have your sexual organs cut off on pseudo-astrological advice, have you divorced as bankrupt.
- h) Western superstition does not know that Scorpius does not rise at east.
- i) The ascendant of the USA is Serpens Cauda.
- j) This means that there are zero astrologers in the USA.
- k) This includes the so called “masonic” founding fathers.
- l) Petosiris, Nechepso; Enoch are under scrutiny: most unlikely sanctified as astrologers.
- m) This is merely one among myriad things nobody noticed. We did.
